PROFILE SUMMARY

Passionate about leveraging data-driven insights to improve business decisions and seeking an entry-level data analyst/data engineer role to apply analytical skills and problem-solving abilities.

SKILLS

- Programming Languages: Python, SQL, Java, C++.
- Tools: MS Excel, Power BI, Tableau, MySQL, PyCharm, GitHub(basic).
- Libraries/Frameworks: Pandas, and NumPy (Basic)
- Soft Skills: Problem-solving, Teamwork, Time Management, Adaptability, Communication.

EXPERIENCE

Data Analyst - Freelancer | Remote | India

2022 NOV – 2023 FEB

- Worked with two local hospitals to analyze patient admission data and staff utilization using Excel and Python (Pandas)
- Built a staff shift optimization model to align nurse availability with patient inflow patterns, reducing overtime costs by 12%.
- Designed Tableau dashboards to visualize patient trends, common diagnoses, and bed occupancy rates.
- Cleaned and transformed large datasets (up to 100K rows) to support analysis and improve data reliability.
- Wrote Python scripts to automate daily reports on staff attendance and patient counts, saving hours of manual work.

Retail Manager | Retail Store | India

2012 FEB – 2022 OCT

- Increased sales revenue year-over-year by analyzing customer demand and adjusting product assortment based on seasonal trends.
- Improved store profitability by optimizing inventory and enhancing pricing strategies, while focusing on customer retention efforts.
- Boosted customer retention by 40% through targeted promotions and personalized customer engagement.
- Streamlined store operations and reduced operational costs by identifying staffing, supply chain management, and process inefficiencies.
- Managed day-to-day operations of the store, ensuring smooth function and maintaining high customer satisfaction.

PROJECT

Sales Data Analysis | SQL, Power BI, Tableau

Objective: Analyzed mock sales data to identify trends, product performance, and customer behavior

- Extracted, cleaned, and transformed data from a relational database using SQL queries to ensure data accuracy
- Used Excel to analyze exploratory data, including pivot tables to uncover key sales insights.

Created a Dashboard in Tableau to visualize sales performance, highlighting top-selling products, sales by region, and seasonality trends

Outcome: These insights lead to better business decisions that improve sales, optimize stock levels, and enhance overall profitability.

CERTIFICATION

- Python Essential Training
- SQL Essential Training
- GitHub Learning Certification (Basic)
- Microsoft Azure Fundamentals: Cloud Concepts

EDUCATION

Bachelor Of Computer Engineering-2011

Nagpur University | Bapurao Deshmukh College of Engineering | Wardha, India
