PROFESSIONAL SUMMARY

- Data Analyst with 4+ years of experience delivering data-driven solutions in healthcare and financial services.
- Proficient in Python, SQL and statistical modeling to extract actionable insights and drive business optimization.
- Demonstrated success in improving predictive accuracy by up to 25% through advanced analytics and effective data preprocessing.
- Hands-on experience developing ETL workflows using SSIS and Talend and building interactive dashboards with Tableau, Power BI and SAS Visual Analytics.
- Strong team player in Agile/Scrum environments with a focus on data integrity, cross-functional collaboration and clear stakeholder communication.

SKILLS

Methodology:	SDLC, Agile, Waterfall.
Tools:	MS-Office suite (Word, Excel, MS Project and Outlook), VSS.
Language:	Python, SQL, PL/SQL, UNIX shell Scripting.
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, gplot2, dplyr, tidyr, plotly.
Visualizations:	Tableau Desktop, Tableau Server, Tableau Reader, Power BI, Microsoft Excel.
Cloud Technologies:	AWS (S3, Redshift, Quick Sight), Microsoft Azure.
IDEs:	Visual Studio Code, PyCharm.
Data Modelling:	Star-Schema Modeling, Snowflake-Schema Modeling, FACT and dimension tables, Pivot Tables, Erwin, Data Wrangling, Data Cleaning.
Database:	MySQL, PostgreSQL, T-SQL, Monet DB, Teradata, ETL (SSIS) MongoDB, SQL Server, Oracle, Teradata, MS SQL Server, MS Access.
Other Skills:	Machine Learning Algorithms, ETL (SSIS), OLAP & OLTP, Unify, SAS, KPI, Vision, Strategy Status, Research, Decision Making, Business Models, Analytics, Validation, Stakeholders Probability distributions, Predictive Modelling, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, SSIS, SSRS, Data Mining, Data warehousing, Data transformation, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Data Architecture, Database Building, Data Analysis, Jira, Confluence, Apache Kafka, Airflow, GitHub, SVN.
Operating System:	Windows Variants, Linux.

EXPERIENCE

McKesson, TX | Data Analyst | Sep 2023 – Current

- Utilized Python and Pandas to extract, clean and integrate data from Electronic Health Records (EHR) and clinical trial databases, enhancing model performance and predictive accuracy by 25% through robust preprocessing techniques.
- Applied advanced statistical analysis and machine learning techniques to clinical trial datasets, driving a 25% improvement in predictive accuracy across patient demographics, treatment efficacy and adverse event profiling.
- Developed interactive dashboards in Tableau, incorporating geo maps, Gantt charts, Pareto charts and scatter plots to deliver comprehensive, multi-dimensional insights—boosting informed decision-making by 15%.
- Designed and maintained SSIS and DTS packages to automate data migration and transformation from heterogeneous sources (flat files) into SQL Server, ensuring high data integrity and reliability.
- Led the end-to-end analysis and optimization of over 50 healthcare models, leveraging data-driven insights to refine model architectures and achieve a 25% improvement in overall predictive performance.
- Integrated Azure Data Factory to orchestrate data workflows, enabling seamless ingestion and transformation of EHR and clinical trial data, enhancing scalability and efficiency in cloud-based analytics pipelines.

Zensar Technology, India | Data Analyst | Jun 2019 – July 2022

- Led Agile and Scrum practices to drive collaboration and efficiency on the Churn Prediction Financial Solution project, leveraging Jira for streamlined communication and project tracking.
- Created customized reports and dashboards using SAS Visual Analytics, enhancing clarity of data-driven insights and improving communication with non-technical stakeholders by 30%.
- Utilized Python, SQL and statistical techniques (predictive modeling, regression, hypothesis testing) to implement effective churn prediction strategies in the financial domain.
- Designed and managed ETL workflows with SSIS, increasing data accuracy and enabling more actionable insights across the organization by 15%.
- Built complex data pipelines in Talend, integrating, transforming and loading data from diverse sources into centralized data warehouses and analytics platforms.
- Collaborated with frontend teams to integrate interactive Power BI dashboards using DAX, resulting in a 20% boost in user engagement and client satisfaction.
- Leveraged AWS S3 and AWS Glue to manage and transform large-scale financial data, enabling efficient cloud-based ETL processes and seamless integration into data warehouses for advanced analytics.

PERSONAL PROJECTS

- | | |
|--|---|
| • Personalized Fitness Planner (Git) | SpaceX Falcon 9 First Stage Landing Prediction(Git) |
|--|---|

EDUCATION

Masters in Data Science - University of North Texas, Denton, TX.
Bachelor’s Degree in Mining Engineering - IIT Banaras Hindu University, Varanasi, India.

CERTIFICATION

- | | | |
|-----------------------|-----------------------------|---------------------------|
| • IBM in Data Science | • IBM in Data Visualization | • IBM in Machine Learning |
|-----------------------|-----------------------------|---------------------------|
