PROJECT EXPERIENCE

Capstone Aero

Denver, CO

Student Analytics Consultant

Jan '25 – Present

- Lead development of a Stored Jet Demand Forecasting Tool as part of a graduate consulting engagement with Capstone Aero.
- Design predictive models to estimate future demand using historical trends, seasonality, and macroeconomic indicators.
- Apply time series analysis and regression methods to support accurate capacity planning and strategy formulation.
- Collaborate with Capstone Aero's executive leadership to ensure alignment with operational and business objectives.
- Deliver an interactive forecasting dashboard and insights to guide data-driven decision-making.

Movie Review Sentiment Analysis (Python, VADER, ChatGPT API)

Mar – June '25

- Built using Python, VADER sentiment analyzer (rule-based), and OpenAI's ChatGPT API (LLM-based) to assess and compare review sentiment.
- Created a 1,000-review sentiment analysis pipeline using both rule-based and LLM-based classifiers
- Manually labeled deceptive vs. truthful reviews; compared model accuracy using true class labels.

Lung Cancer Prediction Dashboard

Jan – Mar '25

- Built an interactive dashboard to predict lung cancer diagnosis using support vector machines in R
- Modeled key predictors like smoking history, family history, and early detection across classification and regression models.
- Included accuracy, sensitivity, specificity metrics with visually clean, interactive outputs.
- Deliverables include a fully functional forecasting dashboard and strategic recommendations for operational decision-making.

PROFESSIONAL EXPERIENCE

Foundit (formerly Monster.com)

Bangalore, India

Assistant Manager

May 2023 – February 2024

- Managed back end operational work for the recruiter side of the platform with a team of 8 to 10 interns and implemented new initiatives to automate process and to ensure smooth functioning of the platform.
- Analyzed user data to understand recruiter needs and utilized Power BI to create presentation decks to pitch new clients and company leadership, increasing recruiter sign ups to the platform by 15 % week over week
- Developed a customer success process including inbound/outbound calls, email support, platform demo sessions and other support functions for all recruiter clients of Zuno.
- Conceptualized and developed processes on acquiring recruiter clientele and creating demand for the platform.
- Analyzed marketing campaigns for existing users and targeted email campaigns to acquire new users.
- Collaborated across all teams in highlighting product, tech and design issues critical for the function and improvement of the platform.

Headout

Bangalore, India

Senior Operations Associate

November 2019 – April 2023

- Contributed to the growth and development of the customer operations team of Headout by assisting in back end operational work including customer support, demand and ticketing fulfilment.
- Conducted data analysis with Excel and Looker on incoming customer queries and reviews, identifying patterns for incoming volume reduction initiatives.
- Led projects aimed at enhancing Net Promoter Score (NPS) for the organization.
- Managed daily operations of 40+ customer experience and operations team, ensuring smooth functioning.
- Led internal audit efforts and managed a quality assurance team of 4 to ensure quality assurance of customer interactions.
- Automated individual audit and quality assurance reports to team members and consolidated reports to senior leadership at regular intervals.
- Developed and implemented streamlined protocols, initiatives and daily workflow optimizations for a 24x7 operations team of 40+, ensuring efficient and seamless operations.
- Collaborated with vendor partners at multiple locations all over the world to resolve issues related to reservations and customer feedback.

CERTIFICATIONS

PCEP – Certified Entry-Level Python Programmer, Python Institute — May 2025
