## Professional Summary

- Experienced professional with 5+ years of hands-on experience as an SAP Security Consultant, focusing on **SAP Security Architecture, GRC Access Control, and compliance auditing**, with deep experience across SAP S/4HANA, ECC, BW, CRM, and Fiori environments.
- **SAP System Administrator & Security Specialist** with 5+ years of experience **configuring, maintaining, and supporting SAP ERP applications across finance, supply chain, and production.**
- Strong expertise in SAP S/4HANA, ECC, BW, CRM, and Fiori environments with proven experience in system administration, access controls, performance monitoring, and compliance.
- Skilled in **system upgrades, patches, change management, disaster recovery, and troubleshooting** across global SAP landscapes.
- Adept at collaborating with cross-functional stakeholders to support supply chain, finance, and production operations while ensuring alignment with **compliance and audit requirements (SOX, GDPR).**
- Proven ability to deliver SAP system enhancements, end-to-end implementations, and technical training in fast-paced, global organizations.
- Skilled in **application lifecycle management, Tier II troubleshooting, and cross-functional collaboration** to ensure operational efficiency and compliance.
- Proven ability to manage **SOX compliance monitoring, audits, and risk remediation, reducing audit exceptions** and strengthening internal controls.
- Experienced in **creating technical training, user documentation, and reporting/analytics solutions** to support business operations.
- Strong communicator with expertise in **vendor coordination, project support across SDLC phases, and on-call application support.**
- Proven track record in designing and implementing SAP Security roles and authorization concepts across modules suStrong hands-on expertise in **SAP GRC Access Control modules (ARA, ARM, EAM, BRM, UAR)** with end-to-end implementation and support experience.
- Skilled in **SAP Security Role Design, Role Redesign, and Authorization Management**, ensuring **Segregation of Duties (SoD) compliance** and mitigating SoD conflicts.
- Proven ability to manage **compliance and risk management frameworks** aligned with **SOX, GDPR, and internal audit standards.**
- Adept at **security architecture design, access provisioning, and risk analysis**, ensuring secure and compliant business processes.
- Experienced in **User Access Reviews (UAR), firefighter ID monitoring, emergency access management, and remediation of audit findings.**
- Strong communicator with ability to **collaborate across stakeholders** business process owners, auditors, IT teams, and compliance officers.
- Delivered system upgrades, migrations, patch management, and audit readiness activities across multiple global SAP deployments.ch as FI, MM/IM, PM, PS, QA, and SD.
- Expertise in **SAP GRC 10.1 and 12.0** including **Access Risk Analysis (ARA), Emergency Access Management (EAM), Business Role Management (BRM), Firefighter ID management, MSMP and BRF+ workflows.**
- Conducted SOD analysis, simulations, and remediation strategies ensuring SOX and GDPR compliance, including **User Access Reviews (UAR)** and audit support documentation.

- Proficient in **STAUTHTRACE, ST03, SU53, ST01** for root cause analysis, penetration testing, and security audits.
- Skilled in managing **SAP GRC 10.1 and 12.0, including Access Risk Analysis (ARA), Emergency Access Management (EAM), and Business Role Management (BRM).**
- Experienced in troubleshooting Firefighter ID issues, SOD conflicts, and end-user access problems.
- Strong background in supporting non-SAP critical business applications like **ServiceNow**.

## Work Experience

**PepsiCo - Kansas,**

January 2024 – Present

### **SAP Security Consultant**

- Led **SAP GRC Access Control (ARA, ARM, EAM, BRM, UAR)** implementation, covering user provisioning, firefighter ID management, and business role workflows.
- Designed **role-based access models** for ECC and S/4HANA systems, ensuring **SoD compliance** and resolving conflicts proactively.
- Conducted **risk analysis and SoD simulations** to identify conflicts, created mitigating controls, and reduced audit exceptions by 30%.
- Facilitated **UAR campaigns** in compliance with **SOX and GDPR**, ensuring accurate user certification and removal of excessive access.
- Partnered with auditors and compliance teams to remediate risks, streamline workflows, and strengthen internal controls.
- Developed **SOPs, security documentation, and training materials**, improving knowledge transfer and audit readiness.
- Provided **authorization troubleshooting** (SU53, ST01, STAUTHTRACE) for incidents across ECC, BW, and Fiori landscapes.
- Troubleshoot authorization issues using **STAUTHTRACE, ST01, SU53**.
- Administer and maintain internal SAP and non-SAP applications supporting financial and production operations.
- Conduct **Tier II troubleshooting** for application errors (authorization, provisioning, Fiori issues) and collaborate with vendors on escalations.
- Monitored application activity to ensure **SOX compliance**, supporting audits and remediation activities.
- Developed **reporting and analytics dashboards** for compliance tracking and user access management.
- Supported **SDLC phases** including design, testing, cutover, and post go-live stabilization.
- Created **technical training documents and user guides**, and delivered workshops for business users.
- Provided **on-call support during go-lives, migrations, and emergency access management**.
- Executed cutover planning, user migration activities during go-lives. Conducted detailed testing of fixes and enhancements, executed User Acceptance Testing (UAT), and collected feedback to ensure alignment with system standards.
- Created comprehensive training materials and conducted workshops to enable business users and support personnel to adopt new features and understand resolved issues.
- Managed security compliance, performed regular internal audits, and enforced patch updates and system documentation controls.
- Provided support during system go-lives, migrations to S/4HANA, and internal audits; documented SOPs and technical artifacts.

- Enforced security patch updates, maintained compliance documentation, and ensured timely SLA-based user provisioning. Supported GRC Access Control (ARM, EAM, BRM), firefighter ID management, and SoD risk remediation.
- Ensured SAP compliance through internal audits, SLA management, and security patch implementation. Supported business implementations, sharing best practices and ensuring seamless transitions.
- Developed and managed Fiori catalogs, groups, and roles including configuring target mappings and resolving launchpad issues, ensuring consistent and role-based UI experience for end-users.
- Acted as the lead SAP security point-of-contact for enhancements and go-lives during global SAP deployments and system upgrades, participating in all project phases from design through post go-live support.
- Supported GRC Access Control activities including firefighter ID assignment and monitoring, access request workflows (ARM), and business role management (BRM).
- Developed SOPs, audit documentation, and test cases for GRC integrations and access control workflows.

**Cognizant Technology Solutions – Hyderabad, India**  
**SAP Security Consultant**

January 2019– December 2022

- Configured and managed **SAP GRC 12.0 modules** (ARA, ARM, BRM, EAM), ensuring seamless integration with SAP ECC, BW, CRM, and GTS systems.
- Conducted **quarterly User Access Reviews (UARs)** and coordinated with auditors for **SOX & GDPR compliance**.
- Redesigned and optimized **security roles (Single, Composite, Derived)** across modules (FI, MM, SD, PP, HR), reducing SoD conflicts.
- Implemented **firefighter ID processes** and monitored emergency access usage, ensuring traceability and compliance.
- Led a **security redesign project** across multiple landscapes, delivering optimized role models aligned with business job functions.
- Partnered with IAM and ITSM teams to integrate **GRC workflows with ServiceNow**, automating access provisioning.
- Conducted **penetration testing, risk assessments, and log monitoring**, strengthening SAP security posture.
- Mentored junior consultants and delivered **knowledge transfer sessions** on SAP GRC best practices and compliance processes.
- Executed access control activities using SAP GRC 12.0, including Emergency Access Management (EAM), Access Risk Analysis (ARA), and Business Role Management (BRM).
- Facilitated secure transport management, solution lifecycle tracking, and ServiceNow ticket resolutions across multiple landscapes.
- Conducted penetration testing, reviewed security logs, and ensured readiness for SOX and GDPR audits.
- Supported quarterly user access reviews (UARs), audit reporting, and compliance workflows for internal stakeholders and external auditors.
- Provided SAP Security administration across **ECC, S/4HANA, BW, and CRM** landscapes.
- Led role redesign projects to resolve SOD issues and improve audit readiness.
- Implemented **SAP GRC 12.0 components: ARA, EAM, ARM**; configured workflows.

- Performed penetration testing, enforced SAP access policies and security baselines.
- Partnered with Basis team for secure transport and ChaRM process integration.
- Administered SAP HANA and BI security; restricted access to sensitive reporting objects.
- Integrated ServiceNow with SAP GRC; supported SAP IdP provisioning and mapping.
- Executed daily role provisioning, change requests, and transport movements.
- Led access review calls, resolved escalations, and ensured SLA compliance.
- Engaged in client workshops, defined security strategies based on requirements.
- Created custom auth objects, enhanced standard roles for business fit.
- Contributed across project phases: blueprinting, realization, go-live, hypercare.
- Redesigned existing SAP roles and implemented new security design aligned with business process models, minimizing excessive access and improving audit readiness.
- Worked with the SAP Basis and Change Management teams to implement and manage Solution Manager ChaRM workflows, ensuring secure transport of roles and objects.
- Supported quarterly User Access Reviews (UARs) and maintained audit documentation for SOX compliance across North American operations.
- Conducted penetration testing, monitored security logs, and enforced access control aligned with SOX/GDPR.
- Performed penetration testing and resolved unauthorized access incidents.

## Education

**University of Central Missouri** - *Lee Summit, Missouri*  
Master of Science in Computer Science

January 2023 – May 2024

## Professional Skills

- **SAP Security & Access Control:** Role design, user provisioning, authorization objects, PFCG, SU01, SU53, ST01, SUIM
- **Compliance & Audit:** SoD conflict resolution, SOX & GDPR compliance, security audits, mitigation controls
- **SAP GRC Expertise:** Access Risk Analysis (ARA), Emergency Access Management (EAM), Business Role Management (BRM), Firefighter ID
- **System Coverage:** SAP ECC, S/4HANA, BW, CRM, BI, SCM, Fiori
- **Identity Management:** SAP IDM, user lifecycle, job-role mapping
- **Tools & Methodologies:** STAUTHTRACE, ST03, GRC integration with ServiceNow, audit trail documentation
- **Soft Skills:** Stakeholder Engagement, Cross-functional Collaboration, Workshops & Training Delivery, Communication Skills

## • Certifications

- **SAP Certified Associate:** SAP S/4HANA System Administration
- **Microsoft Certified:** Azure Fundamentals
- **SAP Basis Administration:** Udemy
- **AWS Machine Learning:** Coursera
- **AI for Everyone:** Coursera
