

Areej Kalota

(630) 234-1151 | areejkalota@gmail.com | Chicago, IL

Education

Bachelor of Science, Information and Decision Sciences

GPA:3.56/4.00

University of Illinois at Chicago, Chicago, May 2021

Concentration: **Data Analytics** | Minor: **Architectural Theory** | Dean's list, Cum Laude

Relevant Coursework: Statistics, Business Object Programming, Database Technology, MIS, Systems Design, Data Mining, Business Model Simulation

Skills

Languages: Python, SQL (PL/SQL), Splunk SPL, Shell, Git, HTML/CSS

Analytics Toolkit: Numpy, Pandas, Scikit-learn, Dynatrace, Power BI, Microsoft Access, Microsoft Excel

Experience

PL/SQL Developer, Cognizant - Client: CVS

Sept 2022 – June 2023

- Tracked KPIs and trends in Pharmacy Benefits Management data using visualization dashboards in Tableau and created ad-hoc reports tailored to needs of cross-functional stakeholders
- Optimized Oracle database performance by writing and tuning queries & stored procedures for PBM microservices
- Improved data processing efficiency by implementing automated type conversion & normalization workflows
- Built real-time dashboard in Splunk to monitor change deployment, ensuring 100% successful change deployment rate by identifying and resolving request failures, log generation issues, and server accessibility problems
- Standardized database issue response procedures and created best practices documentation, reducing incident response time by 30%

Analytics Intern, Optima Lab

Sept 2021 – May 2022

- Retrieved, cleaned, and visualized COVID-19 data from 40+ assisted living facilities to highlight vaccination and testing trends across demographic segments using dynamic charts and pivot tables in Excel
- Generated demand forecast reports, identifying areas with low vaccination and infrequent preventative testing and made recommendations for optimized resource allocation and targeted market expansion
- Facilitated communication between account managers, data engineers, and leadership through presentations and report generation using Power BI dashboards and PowerPoint

Data Scientist: Capstone Experience, UIC Applied Health Sciences

Aug 2020 – Dec 2020

- Conducted regression analysis with Python (Pandas) to identify 7 critical metrics to explain gap in disability services for disabled immigrant populations; presented insights with decomposition trees and key influencer visuals
- Visualized census data on employment for immigrants and refugees with disabilities with dashboards in Power BI, providing comparative analysis against native population benchmarks
- Synthesized findings in reports for postliminary research, grant applications, and publications, increasing government funding by approximately 15%
- Developed theoretical framework for bridging service gaps between US disability systems and marginalized disabled communities, informing policy recommendations

Writing Consultant, UIC Writing Center

Jan 2019 – May 2021

- Consulted on 600+ technical writing projects in biostatistics, engineering, and medical research
- Researched resources for field-specific citation and visualization standards in technical writing and grant proposals
