EDUCATION

University of Maryland, College Park

Expected May 2027

Bachelor of Science in Computer Science

- Relevant Coursework: Object-Oriented Programming II, Linear Algebra, Algorithms, Discrete Structures, Introduction to Computer Systems, Probability & Statistics, Programming Languages, Data Science, Introduction to Artificial Intelligence

EXPERIENCE

Software Engineer Intern

Feb 2025 - Sep 2025

Stealth Startup

Remote

- Developed an event management platform MVP with **Django and React.js** that was adopted by 10+ pilot users
- Enabled full **CRUD** functionality across 3 core models by developing **REST APIs** and serializers
- Integrated photo carousels and modular tab layouts with **React components**, creating a more dynamic interface
- Implemented **OpenAI content moderation APIs** to block inappropriate content, enhancing trust and usability for end users
- Built scalable relational schema supporting user, business, and event data
- Secured authentication by implementing **JWT + MFA**; managed **GitHub Actions** for CI/CD and collaboration

Technical Projects Coordinator

Sep 2024 - May 2025

UMD AI/ML Club

College Park, MD

- Facilitated industry collaborations, enabling student teams to deliver applied **machine learning projects** in domains such as **natural language processing** and **computer vision**
- Coordinated project infrastructure by setting up **GitHub repositories**, **version control workflows**, and **shared documentation** to streamline collaboration for **20+ members**
- Recruited **AI mentors** and organized workshops/hackathons
- Designed and delivered **technical onboarding sessions** for new members, introducing core **ML tools** and **coding practices** to accelerate project readiness

Full-Stack Engineer Intern

Jun 2024 - Jul 2024

SakhiDrapes

Naperville, IL

- Launched a mobile-responsive scheduling site with **HTML, CSS, and JavaScript**, generating **25+ bookings** in the first month
- Implemented **JavaScript form validation** to prevent incomplete or conflicting appointment submissions
- Integrated **EmailJS** to automate client confirmations, removing the need for manual follow-up
- Designed an end-to-end booking workflow that streamlined the client journey from submission to confirmation

PROJECTS

SupportBot Lite |

- Engineered a **retrieval-augmented chatbot** that converts CSV FAQ data into searchable embeddings using **SentenceTransformers (MiniLM)** and **pgvector** in PostgreSQL for vector similarity queries.
- Designed and deployed a **FastAPI backend** with REST endpoints for CSV upload, chat retrieval, and logging, supporting **semantic search** and **LLM-based fallback** for paraphrased responses.
- Built a **React frontend** that provides an interactive chat interface with real-time query handling via API integration.
- Containerized the full stack using **Docker Compose** for reproducible local and cloud deployment.

MenuLift |

- Developed an **OCR-based menu parsing system** that extracts and categorizes restaurant menu items from image and PDF uploads using **EasyOCR** and **OpenCV** for text extraction and layout analysis.
- Built a modular **FastAPI backend** with services for OCR, parsing, and rule-based section grouping using **regex heuristics**.
- Designed a **SQLite database** with **SQLAlchemy ORM**, modeling relationships between restaurants, menus, and items.
- Implemented RESTful APIs for uploading, retrieving, and searching menu data, connected to a **React frontend** for structured menu visualization.

SKILLS

Certifications: AWS Certified Cloud Practitioner (2025)

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL, Rust, OCaml, MATLAB

Developer Tools: AWS (SageMaker, S3, EC2, Lambda), Docker, Git, GitHub, VSCode, Eclipse, Arduino

Libraries & Frameworks: Django, React.js, Next.js, Node.js, Tailwind CSS, EmailJS, Pandas, Matplotlib, OpenAI API

Web/Other: SQLite, Microsoft Office Suite, XQuartz, MLOps
