US Citizen | 909-632-9915 | armantausif64@gmail.com | [linkedin](#) | [github](#)

EDUCATION

University of California, San Diego

San Diego, CA

B.S. in Mathematics and Computer Science

Expected Graduation, 2027

Concentrations: Quantitative Mathematics and Theoretical Computer Science

Relevant Coursework: Discrete Mathematics, Probability, Statistics, Linear Algebra, Calculus, Object-Oriented Programming, Systems Programming, Machine Learning: Algorithms, Data Structures, Cryptography

EXPERIENCE

VedasLabs

New York, NY

Blockchain Engineer

May 2025 – Present

- Created VED VedasLabs crypto token using Solidity and OpenZeppelin's ERC20 to start the DAO development
- Developed smart contracts in Solidity to implement shares with 100M initial token mint and 500+ token holders
- Enabled proposal execution for varying vote types, such as a 75% and 50% threshold to allow top-level governance

Software Engineer

Sept 2024 – May 2025

- Updated and implemented 30+ REST APIs to the dashboard, integrating both routes and controllers
- Migrated codebase to Strapi V4 using JavaScript, optimizing database queries and reducing load times by 40%
- Implemented secure user authentication system with JWT tokens, bcrypt password hashing, and role-based access control (RBAC), giving the platform future ability to successfully serve 1,000+ registered users

PROJECTS

Real-time Collaborative Editor | *Next.js, Typescript, OAuth, PostgreSQL, Vercel*

Jan 2025 – Present

- Building a collaborative editor using Next.js, React, and Tailwind with WebSocket-powered synchronization
- Implementing conflict-free data structures (CRDTs) to ensure seamless 100+ user editing and consistency
- Integrating unique 10+ style diagram animations into the editor for new easy presentation options in the editor
- Adding OAuth-based authentication with NextAuth for secure 100+ user access and permissions

Decentralized Crypto Exchange | *Solidity, Foundry, ZK Proofs, TypeScript*

Jun 2025 – Present

- Developing full-stack crypto trading platform using Next.js, TypeScript, and Node.js
- Implementing infrastructure with off-chain matching and on-chain settlement processing 1,000+ orders/second
- Building an orderbook with PostgreSQL + Redis, supporting spot/margin trading and all orders (OCO, stop-loss)
- Deploying to Ethereum blockchain testnet to serve 500+ traders with real-time market simulation

Gallery | *Typescript, React, Tailwind, PostgreSQL + Prisma, Clerk Auth*

Oct 2024 – Dec 2024

- Developed a ratable media gallery with Next.js, React, and Tailwind supporting file upload, download, and display
- Integrated Clerk authentication for secure user sign-up, login, and session management
- Utilized Prisma + NEON Postgres for scalable storage of 500+ file metadata, user data, and access control
- Implemented real-time sub 5ms database and UI updates to reflect new uploads and changes without page refresh

ACTIVITIES AND LEADERSHIP

Blockchain @ UC San Diego

San Diego, CA

President, Engineering Team

July 2025 – Present

- Teaching workshops for projects using Solidity and Foundry, helping 20+ students learn smart contract basics
- Hosting events with various organizations such as ETHGlobal to create numerous opportunities for students

TECHNICAL SKILLS

Programming: JavaScript, C++, C, Java, HTML, CSS, Solidity, Assembly, Python, SQL, MATLAB, JSON

Tools: React.js, Next.js, Node.js, Prisma, AWS (Lambda, S3), Docker, Kubernetes, Git, Jest, Cypress, Socket.io

Technical: Data Structures and Algorithms, Machine Learning, Microsoft Excel

Languages: English, Bengali, Arabic (reading and writing)

Interests: Kickboxing, Powerlifting, Reading/Writing
