Ph #: 916-336-4133

Folsom CA

Professional Summary:

- **4 years** of experience as a **Web/Application Developer** and coding with programming using **Python**.
- Experienced with full software development life-cycle (SDLC), architecting scalable platforms, **object-oriented programming (OOPs) database design**.
- Experienced in developing web - based applications using **Python, Flask, Django, AWS**.
- Experience in List Comprehensions and Python inbuilt functions such as **Map, Filter** and **Lambda**.
- Experienced in developing Web Services with Python programming language.
- Experience in AWS Cloud platform and its features which includes **AWS CloudFormation, EC2, S3, REDSHIFT, EBS CloudWatch, IAM user management, and AWS S3**.
- Expertise in test automation and continuous delivery of web applications, client server applications, web services/**REST APIs**, with Python.
- Experience in writing code in **Typescript** for creating resources for AWS services such as S3 bucket, Dynamodb table, Aws lambda etc.
- Experience in writing Subqueries, Stored Procedures, Triggers, Cursors, and Functions on **MySQL** and **PostgreSQL databases**.
- Familiarity with development best practices such as code reviews, unit testing, **system integration testing (SIT)** and **user acceptance testing (UAT)**.
- Experience in creating **ETL** pipelines using **Apache Spark** which includes **Azure Databricks, Synapse analytics, Data factory**.
- Experience in containerizing the application code using docker and deploying on cloud such as AWS and GCP.
- Proficient with various Python Integrated Development Environments like PyCharm, Jupyter Notebook and code editors like Sublime Text, Visual Studio Code.
- Experience in using version control systems like Git, GitHub and Amazon EC2.
- Problem solver with an ability to work independently in a fast-paced environment and quickly adopt emerging technologies.
- Hands on experience in creating **DAG** using **Apache Airflow** for orchestrating the task, creating custom operators based on use cases.

Technical Skills:

Languages	Python, SQL, PostgreSQL, Relational Database
Web Technologies	Flask, Django
Cloud	AWS, GCP
Databases	CloudSQL, Bigquery, S3, DynamoDB, AWS Redshift, AWS Athena
Defect Tracking	JIRA
Version Control	Git (GitHub)
Methodologies	Agile, Scrum
Operating systems	MAC, Windows
Libraries	Pandas, numpy, pyspark, logging, dotenv, sys, unittest

Professional Experience:

Client: Intuit, Mountain View, CA

Nov 2023– Aug 2024

Role: Data Engineer

Responsibilities:

- Utilized Google Drive API and Box API to **extract, transform, and load data** from various sources into centralized data warehouses.
- Collaborated with cross-functional teams to identify and resolve **data quality issues**.
- Collaborated with cross-functional teams to gather requirements and deliver solutions aligned with business goals.
- Implemented Unit testing and monitoring scripts to ensure data pipeline reliability
- Implement **Cloud Development Kit** for **AWS** Infrastructure using **TypeScript**
- Utilized **AWS secret manager** to store client ids and client secrets.

- Developed Infrastructure as code for **AWS Step Function, DynamoDb Table, IAM Policy, Lambda, EC2**
- Developed custom Python scripts to extract data from various sources, including CSV, JSON, and Excel files.
- Insured **90% Code Coverage** of Drive, Box API Automation through unit test cases in Python
- Handled exceptions and used-test cases by writing python-scripts to refrain AWS service from rendering Error codes
- Created a Git repository and added the project to **GitHub**.
- Utilized **multithreading and concurrency library** to execute the task concurrently to optimize the solution.
- Used **JIRA** for bug and issue tracking and Used JIRA to assign, track, report and audit the issues.

Environment: TypeScript, JSON, AWS, Boto3, IAM, DynamoDB,, Jira, Typescript, AWS, GCP, JSON, UnitTest, GitHub, JIRA, AWS Step Function, service account, S3 , AWS Glue.

Client: Spotify(Upwork)

Aug 2022 – Nov 2023

Role: Data Engineer

Responsibilities:

- Followed **AGILE development methodology** to develop the application.
- Optimize existing **ETL pipelines** using Apache Airflow to orchestrate the tasks, using airflow webserver monitoring logs in identifying the errors and resolving them effectively..
- Implemented **AWS lambda** function for extracting, transforming and storing data.
- Led a cross-functional team in the design of a data lake, integrating S3 with Athena, which streamlined the ad-hoc query process, resulting in a 25% reduction in time spent on data analysis.
- Designed **ETL pipelines** leveraging **AWS Glue** which automated the preprocessing of over 1TB of new data daily, enhancing the reliability of downstream data consumption.
- Collaborated with machine learning teams to productionize algorithms, effectively improving recommendation systems.
- Introduces data governance practices, including data cataloging with **AWS Glue**, which improved data discovery and compliance adherence by over 50%.
- Developed architecture using **lucidchart** to showcase the architecture for data flow.
- Implemented **Docker** build tool for scheduling, deploying Python jobs.
- Used **JIRA** for bug tracking and issue tracking and added several options to the application to choose a particular algorithm for data and address generation.
- Used **Git** version control system for collaborating with teammates and maintaining code versions

Environment: Python, AWS Athena, Apache Airflow, Postgres, AWS Glue, Docker, Github, SQL, Jira, S3.

Company: ANR Software Pvt Ltd, Noida, India

Jun 2014 – Apr 2016

Role: Python Developer

Responsibilities:

- Model View Template (MVT) architecture is implemented using **Django Framework** to develop applications.
- Designed RESTful Web Services using **Django**.
- Used **Python** and **Django** data exchange and business logic implementation
- Worked with **JSON** based **REST Web services**.
- Supported responsive user interface and standards throughout the development and maintenance of the website using the **HTML, CSS**.
- Collaborated within a team using an agile development workflow and widely-accepted collaboration practices using **Git**.
- Responsible for debugging the project monitored on **JIRA** (Agile).
- Performed troubleshooting, fixed and deployed many **Python** bug fixes of the two main applications that were a main source of data for both customers and internal customer service team.

Environment: Python, Django, HTML5, Bootstrap, JSON, CSS3, Jira, GIT, Oracle, Agile.

Certifications:

Google Cloud Professional Data Engineer
AWS Cloud Practitioner certificate
