

Arun Dumala

Data Analyst

Phone: (570) 903-8475 • Email: arunintel24@gmail.com • LinkedIn: [linkedin.com/in/arun-dumala](https://www.linkedin.com/in/arun-dumala) Scranton, PA

Professional Summary

Results-oriented Data Analyst with Master's in Business Analytics and 2+ years of experience in data visualization, processing, and Python-based analytics. Proven expertise in transforming complex datasets into actionable insights using Tableau, Power BI, and advanced statistical methods. Demonstrated ability to optimize data pipelines, ensure data integrity, and collaborate with cross-functional teams to support data-driven decision-making. Strong background in SQL database management and statistical analysis with experience in defense contracting environments.

Education

St. Francis College **May 2025 New York, NY**

Master's in Business Analytics, GPA: 3.80

Relevant Coursework: Advanced Statistical Methods, Database Systems, Data Mining, Business Intelligence
Bachelor of Science in Computer Science **May 2021**

Key Coursework: Data Structures, Algorithms, Database Management, Statistical Analysis **Hyderabad, India**

Experience

Data Analyst - Cognizant

06/2021 – 08/2023 Hyderabad, India

- Analyzed large datasets (1M+ records) to identify trends and patterns, creating compelling visualizations that improved decision-making speed by 30% for Fortune 500 clients
- Developed 20+ interactive dashboards and visualizations using Power BI and Tableau, translating complex data findings into clear, actionable insights for stakeholders across enterprise and government contracting environments
- Implemented comprehensive data cleaning and preprocessing workflows using Python and SQL, ensuring 98.7% data accuracy and reliability across enterprise data sources
- Built and maintained automated data pipelines for efficient data flow and storage, reducing manual processing time by 40% and infrastructure costs by 25%
- Collaborated extensively with cross-functional teams including data engineers to integrate Python-based analytics solutions into existing data infrastructure
- Conducted statistical analysis using regression models, hypothesis testing, and advanced analytical methods to support data-driven strategic initiatives and quality assurance protocols
- Provided training and support to team members on data tools, techniques, and best practices in Agile development environments using JIRA for project management

Projects

Enterprise Data Warehouse Analytics & Reporting Solution | SQL, Python, Power BI 2024–2025

- Transformed complex data from 8 disparate sources (200,000+ records) into interactive Power BI dashboards, identifying \$50,000+ in annual cost savings through advanced pattern analysis
- Engineered scalable data architecture with optimized SQL queries and stored procedures, reducing query response time by 55% and enabling real-time analytics
- Automated data quality monitoring using Python scripts with Pandas and NumPy libraries, maintaining 99.8% accuracy and eliminating manual validation bottlenecks

Supply Chain Analytics Dashboard | Tableau, Python, SQL 2024

- Created comprehensive Tableau visualizations analyzing supplier performance metrics and inventory optimization across multi-location operations
- Applied statistical forecasting models using Python to predict demand patterns with 82% accuracy, supporting strategic procurement decisions
- Integrated real-time data feeds from 5 systems using SQL stored procedures, enabling dynamic dashboard updates and automated reporting

Student Performance Analytics Dashboard | Python, Power BI, SQL 2024

- Applied machine learning algorithms and statistical techniques using Python to develop predictive models with 85% accuracy for academic performance forecasting
- Created comprehensive data visualization tracking 15+ KPIs across 2,000+ student records, resulting in 18% improvement in program effectiveness through data-driven insights

Technical Skills

Data Analysis & Processing: Python (Pandas, NumPy, Matplotlib), SQL, Statistical Methods (Regression, Hypothesis Testing), Data Cleaning & Transformation, Quality Assurance

Data Visualization & Reporting: Tableau (Advanced), Power BI (DAX, Power Query), Interactive Dashboard Development, Stakeholder Presentations

Database & Infrastructure: SQL Server, MySQL, PostgreSQL, Azure Cloud Services, Data Pipeline Development, ETL/ELT Processes

Analytics & Modeling: Machine Learning, Predictive Modeling, Pattern Recognition, Trend Analysis

Collaboration & Tools: Cross-functional Team Collaboration, JIRA, Git, Agile Methodologies, Training & Documentation

Certifications

Odin school: Data Analytics Professional Certificate
