

Professional Summary

Results-driven Business Intelligence developer with 5+years of experience designing and delivering scalable data solutions across healthcare, automotive, and financial sectors. Skilled in Power BI, SQL Server, Azure, and Python, with expertise in data modelling, ETL pipelines, DAX, and advanced Power Query transformations. Adept at building interactive dashboards, optimizing data workflows, and ensuring compliance with HIPAA and regulatory standards. Strong background in Agile/Scrum delivery, stakeholder collaboration, and cross-functional teamwork. Recognized for automating processes, improving data accuracy, and driving actionable insights that enhance decision-making and operational efficiency.

Technical Skills

Business Intelligence & Reporting: Power BI (Desktop, Service, Gateway, Report Server), Tableau, SSRS, SSAS

Data Warehousing & Modeling: Star/Snowflake schemas, Fact/Dimension modeling, Semantic models, DAX, Power Query

ETL & Data Integration: SQL Server Integration Services (SSIS), Azure Data Factory (ADF), DBT, Informatica, ODI

Databases: SQL Server (2008–2019), Azure SQL DB, Oracle, Snowflake

Programming & Analytics: SQL, T-SQL, PL/SQL, Python, R

Cloud Platforms: Microsoft Azure, AWS (Glue, Redshift), Power BI Service

Version Control & DevOps: Git, GitHub, Azure DevOps, CI/CD pipelines

Project Management: Agile, Scrum, Kanban, Jira, Confluence

Professional Experience

Sr. Data Analyst, Walmart

Oct 2024 – Present | Bentonville, AR

- Led the end-to-end design, development, and deployment of scalable Power BI dashboards and reports, ensuring high performance, data accuracy, and strong user adoption across business functions.
- Experienced with Azure Data Services (Data Factory, Synapse, Databricks) and other cloud platforms, integrating relational and cloud data warehouses into BI solutions.
- Developed and implemented data governance policies to ensure accuracy, consistency, and accountability in enterprise data management.
- Designed and developed tabular and multidimensional data models using DAX and Power Query (M), writing and optimizing complex DAX expressions for calculated measures, columns, and advanced business logic.
- Designed and maintained robust SQL queries, views, stored procedures, and functions to support BI and analytics solutions across diverse business needs.
- Developed and scheduled Python/R scripts to automate ETL workflows, ensuring data integrity, accuracy, and consistency across systems, reports, and dashboards.
- Provided training and support to end-users while staying updated on the latest Power BI features to maximize adoption and solution effectiveness.

BI developer, Daimler Truck North America (DTNA)

Dec 2023 – Sep 2024 | Portland, OR

- Designed, developed, and maintained interactive Power BI dashboards, KPIs, and semantic data models, leveraging advanced DAX, Power Query, and Power BI Service to deliver actionable insights.
- Extracted, cleansed, and integrated data from multiple sources (SQL Server, Snowflake, Python, SAS, Excel, CSV files etc.), to build semantic layers and deliver BI analytical solutions across Power BI.
- Developed and optimized data pipelines in Databricks and integrated with Power BI to deliver scalable, cloud-based analytics and reporting solutions.
- Integrated and transformed data from multiple sources (ERP, CRM, & supply chain), performing data manipulation and building scalable BI solutions with strong data modeling expertise.
- Extracted, manipulated, and analyzed data from multiple sources by developing scalable SQL queries and stored procedures, ensuring accuracy and performance tuning.
- Developed automated testing scripts and partnered with product teams to define metrics and support statistically valid A/B testing practices.
- Applied Agile and Scrum methodologies using tools like Jira and Confluence to manage sprints, track deliverables, and ensure on-time BI solution delivery.

Power BI developer, CGI

Sep 2020 – Aug 2022 | Bangalore, India

- Designed and built BI solutions with Microsoft Power Platform (Power BI, Power Automate, Power Apps), administering environments and automating workflows to support financial and operational reporting.
- Proficient in Microsoft Office Suite and experienced in SQL Server, SSIS, and Crystal Reports with a strong understanding of relational databases and ETL development.
- Conducted detailed data analysis to identify trends and patterns, supporting ad-hoc queries, reporting, and decision-making through data storytelling, visualization best practices, and interactive Power BI dashboards.
- Ensured compliance with data security and privacy regulations by applying best practices in data protection, access control, and governance frameworks.
- Performed data validation, QA testing, and troubleshooting to resolve inconsistencies across BI assets, ensuring accuracy and reliability of reporting solutions.
- Created and maintained comprehensive documentation for Power BI solutions, including data sources, transformation

logic, business rules, and report specifications.

Power BI developer, *Xebia*

May 2018 – July 2020 | Hyderabad, India

- Designed and developed interactive Power BI dashboards and reports with advanced DAX measures, parameters, bookmarks, drill-downs, slicers, and custom visualizations (maps, waterfall, treemaps, scatter, heat maps, etc.) to deliver optimized business insights.
- Performed data modeling, cleansing, and shaping using Power Query (merging, splitting, filtering, transforming) and established efficient relationships to ensure accuracy, consistency, and high-performance reporting.
- Built and optimized SQL queries, views, and stored procedures, along with ETL pipelines to transform and integrate data from multiple sources, ensuring reliable and scalable reporting solutions.
- Implemented incremental refresh, scheduled refreshes, and gateways in Power BI Service to improve dashboard performance, reduce load times, and support enterprise-level reporting.
- Managed report deployment, security roles, and access permissions, while monitoring BI server performance and resolving bottlenecks to maintain system efficiency and governance.

Projects

Prediction of Historical NBA Elo Ratings – (Python, EDA, Regression Analysis, Pandas, NumPy, tableau)

Conducted comprehensive data analysis on a dataset with 126,315 records, performing exploratory data analysis, correlation analysis, and machine learning tasks. Using R, I implemented a Logistic Regression model to predict the target variable 'Elo,' and in Python, Pandas and NumPy utilized efficient data manipulation and analysis.

Analyzing and monitoring daily automobile sales in all areas to improve their business—(BigQuery, Spark, GCP, HIVE, OpenRefine)

Collected streaming data from Twitter via API, encompassing hashtags, descriptions, text, and images. Utilizing OpenRefine, I cleaned the dataset before importing it to GCP. Employing RDBMS models like BigQuery, Hive, and Spark facilitated data management, and I visualized exported data from BigQuery directly through Data studio for enhanced insights.

Certifications

- Agile Certification from Safe Agile
- Power BI Data Analyst Certificate from Microsoft
- Azure fundamentals certificate.
- Power BI, Python, SQL, Tableau, DBT certificate from Data Camp

Education

Master of Science, *University of North Texas, Denton, TX*

Aug 2022 - Dec 2023 | TX, USA

Advanced data Analytics

Bachelor of Technology, *Keshav Memorial Institute of Technology(KMIT)*

Aug 2018 - May 2021 | Hyd ,India

Computer Science
