

ASAD PATEL

Des Plaines, USA 60016 • 773-574-9754 • asadpatel517@gmail.com • [LinkedIn](#) • [GitHub](#) • [Bold Profile](#)

Professional Summary

Motivated Data Analyst with expertise in healthcare and data science. Recently I earned the **Apexus 340B ACE (Certified Expert)** credential, demonstrating deep knowledge of 340B program compliance and data operations. Experienced in analyzing complex datasets and developing insightful dashboards using tools like Power BI, Tableau, and Python. I am skilled in statistical analysis, predictive modeling, and database management. Successfully completed data-driven projects in healthcare and finance, showcasing a passion for solving problems and driving decision-making through data. Recently completed the Google Data Analytics Professional Certificate to further enhance analytical proficiency.

Skills

- **Data Analysis & Visualization:** Tableau, Power BI, Python (Pandas, Matplotlib, Seaborn), Excel, Google Sheets
- **Database Management:** MySQL, SQL Server, PostgreSQL, Google Big Query
- **Machine Learning:** TensorFlow, scikit-learn
- **Statistical Analysis:** Regression models, hypothesis testing, exploratory data analysis
- **Soft Skills:** Problem-solving, critical thinking, effective communication, teamwork, time management, and adaptability

Projects

Automated 340B Data Pipeline – Microsoft Fabric – 07/2025

Built an end-to-end pharmacy data pipeline using Medallion Architecture (Bronze → Silver → Gold) in a hospital setting.

- Ingested six monthly raw datasets using PySpark notebooks into Fabric Lakehouse Bronze layer
- Cleaned, deduplicated, and joined datasets using Dataflow Gen2 into Silver layer
- Modeled star-schema fact and dimension tables in gold layer for analytics
- Built automated trigger-based pipeline using Microsoft Fabric for seamless end-to-end execution
- Created Power BI dashboards for eligibility, dispensing, claims, and inventory KPIs
- Reduced manual data handling and enabled real-time pharmacy analytics and compliance tracking
- **GitHub :** [340B-Data-Integration-Analytics-Pipeline-Microsoft-Fabric](#)

340B Data Pipeline & Power BI Dashboard – 03/2025

- Designed and developed a data pipeline for a 340B-covered hospital to ingest, store, and analyze data.
- Built a web portal for contracted pharmacies to upload 340B transaction data.
- Automated data ingestion using GC Storage and Google Cloud Functions, triggering processing upon file upload.
- Created a master dataset in Big Query, consolidating data from multiple pharmacy sources.
- Developed an interactive Power BI dashboard for hospital stakeholders to track 340B program performance, revenue, and compliance
- **GitHub:** [340B-Covered-Entity-Data-Integration-Analytics-Dashboard](#)

Hospital Billing Dashboard – 02/2025

- Developed an interactive dashboard to analyze hospital claims, revenue, denial rates, and late payment trends.
- Utilized Power BI for visualizations, SQL for data extraction, and DAX for advanced calculations.

- Key metrics included total claims, revenue collected, denial rate, and average claim processing time.

• **GitHub:** [Hospital Billing Dashboard – Power BI](#)

Hospital Emergency Room Dashboard – 01/2025

- Developed an interactive Power BI dashboard to visualize emergency room data from April 2019 to October 2020, focusing on patient wait times, satisfaction scores, and peak periods
- Utilized DAX and SQL for data analysis and preprocessing, providing insights to optimize staffing and improve resource allocation
- Aim to empower hospital administrators to enhance patient care and streamline operations during peak demand period
- **GitHub:** [Hospital Emergency Room Dashboard](#)

340B Data Analyst Dashboard -11/2024

- Designed a Power BI dashboard to analyze synthetic 340B program data, using Python libraries.
- Visualized medication usage, cost savings, and reimbursement trends.
- Applied SQL and advanced DAX for efficient data processing.
- **GitHub:** [340B Program Dashboard](#)

Credit Card Financial Dashboard

- Created a Power BI dashboard to analyze credit card transactions from a SQL database.
- Streamlined data processing and highlighted financial metrics for stakeholders.
- Employed SQL queries and Python for data extraction, cleansing, and transformation
- **GitHub:** [Credit Card Financial Dashboard](#)

Work History

Ambulatory Medication Access Coordinator, 10/2023 to Current

The University of Chicago Medicine – Chicago, IL

- Managed Prior Auth. for high-cost medications, improving reimbursement efficiency and reducing delays.
- Analyzed patient insurance data to optimize payment sources and prevent medication access issues.
- Coordinated with patients, providers, and insurers to track approvals and resolve issues promptly.
- Conducted insurance and financial verifications to ensure timely medication access.
- Coordinate and schedule patient medications on time. Communicated inventory-related problems to pharmacists, managers or providers
- Expedite clinic workflows and prevent therapy interruptions, ensuring continuous care and enhancing the patient's experience. Provided exceptional customer service to outpatients, contributing to improved care coordination at UCMC.

Oncology Pharmacy Technician & Pharmacy Operations Analyst, 03/2020 to 10/2023

The US Oncology Network – Chicago, IL

- Led daily operations of the Medically integrated Dispensary (MID), managing medication orders, inventory, and prescription fulfillment to ensure compliance with protocols.
- Analyzed large amount of patient data to identify prescriptions filled outside the pharmacy, created plans to bring them back, and developed workflows to keep prescriptions in-house, significantly increasing volume.

- Played a key role in growing the dispensary by identifying potential opportunities through data insights, streamlining processes, and implementing sustainable solutions, helping the MID grow revenue by 300% and gross profit by 160%.
- Presented data insights to providers and visualized key performance metrics using Excel, enabling better decision-making and improved patient outcomes.
- Created and maintained spreadsheets to track patient refills and PAP applications, ensuring timely access to medications and improving patient adherence.
- Prepared detailed reports for insurance audits, ensuring compliance and avoiding payment recoupment.

Pharmacy Technician, 08/2016 to 03/2020

Various Roles at: Genoa Healthcare (Chicago, IL), **RXpert Pharmacy** (Morton Grove, IL), **Care One Pharma** (Niles, IL), **Pharmore Drug Store** (Skokie, IL)

- Entered prescriptions, filled with medications, managed inventory, and processed insurance claims.
- Monitored patient records and collaborated with healthcare teams to improve outcomes.

Registered Pharmacist, 04/2015 to 02/2016

Vasant Drug Store – India

- Managed pharmacy operations and reviewed prescriptions for accuracy and suitability.
- Maintained pharmacy records for controlled drugs and ensured compliance with regulations.
- Collaborated with healthcare professionals to evaluate and optimize drug regimens.

Education

Master's Program: Data Science, 07/2022

Simplilearn - San Francisco, CA

- Hands-on projects in healthcare, insurance, and banking domains.
- Utilized Python libraries (Pandas, NumPy, Matplotlib) and tools like Power BI and Tableau.
- Built predictive models using TensorFlow and scikit-learn.

Bachelor of Pharmacy: Pharmaceutical Sciences, 07/2013

Rajiv Gandhi University of Health Science – Karnataka, India

Associate of Science: Pharmaceutical Sciences, 05/2008

Maharashtra State Board of Technical Education – Maharashtra, India

Certification

- **Apexus Advanced 340B Operations Certificate** – Apexus | 2025
- **Google Data Analytics Professional Certificate** – Coursera | 2024
- **Master's Program in Data Science** – Simplilearn | 2022
- **Tableau Desktop 10** – Simplilearn | 2022
- **Data Science with Python** – Simplilearn | 2021
