Experience & Projects

3D Shirt Model Website – 2025.

Personal Project.

- Developed an interactive 3D environment using **Three.js** and **React** for real-time rendering and customization of shirt models.
- Integrated the DALL-E (OpenAI) API via an Express backend to generate unique AI-powered textures and decals.
- Implemented a React frontend with **Tailwind CSS** and Framer Motion for a modern, fluid, and animated interface.
- Managed the application state using **Valtio** to allow for instant color changes, texture application, and synchronization.

Wordle Clone – 2025.

Personal Project.

- Developed the core game logic and UI components using **React** to manage user guesses and keyboard input.
- Implemented a React *custom hook* to handle complex game states, including turns, guess history, and letter status.
- Styled the user interface with **Tailwind CSS** for rapid development and a responsive design.

Little Lemon Website (Meta Capstone Project) – 2025.

(Capstone Project - Meta)

- Developed a **single-page application (SPA)** using **React** to create a dynamic website with a fully functional table reservation system.
- Implemented robust form state management and validation for the reservation system, ensuring data integrity with **Formik** and **Yup**.
- Designed and coded a fully responsive layout using **CSS/HTML** to provide excellent experience across all devices.
- Integrated mock API logic to dynamically manage available booking times based on the selected date.

MERN Stack MarOil HRMS – 2024.

MarOil Inc.

- Designed and built a scalable **MERN stack** application (**MongoDB, Express, React, NodeJS**) for employee data management.
- Implemented user roles and secure authentication with Node.js/Express and utilized **MongoDB** for flexible data

storage.

- Leveraged **Redux Toolkit (RTK)** for centralized state management, enhancing user productivity on a responsive interface with **React** and **Tailwind CSS**.

Failure Log - Full Stack System for MarOil– 2023. MarOil Inc.

- Designed and built a scalable **full stack** application (**MongoDB, Express, React, NodeJS**) for failures management on a wagon system.
- Implemented a backend using nodejs.
- Implemented an UI with EJS and CSS.

Technical Abilities & Languages

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.

Backend/Databases: Node.js, Express, MongoDB, MERN Stack, RESTful APIs.

DevOps & Cloud: Git, Version Control, Microsoft Azure Fundamentals (AZ-900).

State Management: Redux Toolkit (RTK), Custom Hooks.

Languages: Spanish (Native), English (Advanced – C1).
