EXPERIENCE

• Marketeq Digital

Software Engineer

Miami, Florida

Aug 2025 – Nov 2025

- **Infrastructure Automation:** Automated **CI/CD** pipelines for 20+ backend services using Jenkins, introducing staged deployments and automated validation to **improve release reliability** and reduce deployment time by **30%**.
- **Performance Tuning:** Optimized PostgreSQL performance through query optimization, index redesign, and execution plan analysis, reducing **P95 API latency by 26 ms** under production traffic.
- **Platform Development:** Collaborated with **product and operations stakeholders** to translate workflow requirements into scalable backend services.

• LogiNext Solutions

Software Engineer

Mumbai, India

Oct 2021 – Jul 2024

- **Form and List Builder:** Delivered a configurable Form and List Builder service enabling real-time form schema customization, cutting form setup time by **40% for 100K+ daily users**.
- **System Optimization:** Refactored backend integrations during frontend migration from AngularJS to ReactJS, improving **API contract consistency** and contributing to an **80%** improvement in application responsiveness.
- **Auto Assignment:** Engineered an Auto Assignment backend service in an **Agile/Scrum** environment, evaluating geospatial order data and predefined constraints to select optimal trips, **balancing performance and accuracy across 10K+** daily assignments.
- **Order Report Microservice:** Deployed a serverless reporting microservice on **AWS Lambda** to process **500K+ daily orders**, supporting large-scale data processing and operational reporting workflows, **decoupling reporting workloads** from core services and improving overall system throughput by **50%**.
- **Redmine Project Dashboards:** Designed and implemented centralized Redmine dashboards with **ReactJS and Java** to visualize project metrics, track task progress, and monitor team performance, reducing report generation time by **60%** for **15+ team members** and streamlining project workflows.

SKILLS

- **Languages:** Java, Python, SQL, C++
- **Backend & APIs:** Spring Boot, Spring Security, Spring Data JPA, REST APIs, gRPC, GraphQL, JWT, OAuth
- **Databases & Messaging:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Apache Kafka
- **System Design & Architecture:** Microservices, Distributed Systems, API Design, HLD, LLD
- **Cloud & DevOps:** AWS, CI/CD, Docker, Kubernetes (exposure: Azure, GCP)
- **Testing & Tools:** JUnit 5, Mockito, Postman, Git, Maven, Gradle

PROJECTS

- **My Journal App:** Designed a layered backend architecture for a journal application using Java and MySQL, modeling relational data with normalized schemas and ensuring **transactional consistency under concurrent access**.
- **AuthX – Authentication & Authorization Service:** Architected a modular authentication and authorization service using Java, implementing JWT-based access control, refresh token rotation, and role-based permissions, with design considerations for **statelessness and extensibility**.
- **Crypto Trading Platform:** Built a backend-driven crypto trading platform with **wallet management** and **portfolio tracking**, integrating **real-time market data** via the CoinGecko API and handling **transactional balance updates** using **MySQL** with **consistency guarantees**.

EDUCATION

• California State University

Master of Science in Computer Engineering

Northridge, CA

Aug 2024 – Dec 2025

• Centre for Development of Advanced Computing, AICTE Approved

Diploma in Advance Computing – Ranked in Top 10

Mumbai, India

Feb 2021 – Oct 2021

• Chhattisgarh Swami Vivekanand Technical University

Bachelor of Technology in Civil Engineering

Bhilai, India

Aug 2016 – Jul 2020
