Summary

Data Analyst with nearly 3 years of experience in SQL, Python, and BI tools, specializing in translating complex datasets into actionable insights. Skilled in data visualization using Power BI, dashboard migration to cloud-native solutions, and advanced querying across Snowflake, PostgreSQL, and MongoDB. Adept in performing data profiling, ad-hoc analysis, and KPI reporting to guide business decisions. Strong track record supporting finance, marketing, and operations teams in both enterprise and startup ecosystems, delivering measurable improvements in accuracy, efficiency, and cost optimization.

SKILLS & OTHER

Languages & Scripting: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, T-SQL, PL/SQL, Shell Scripting, Bash

Databases: PostgreSQL, MySQL, SQL Server, Oracle, MongoDB (Aggregation, Atlas), NoSQL (Document-based, Key-value), Snowflake

ETL & Data Integration: SSIS (Data Flow, Control Flow, Lookups), AWS Glue, Snowpipe, Python-based ETL scripts, SQL Server Agent

Data Warehousing & Modeling: Star & Snowflake Schema Design, Fact/Dimension Tables, Data Marts, OLAP Cubes (basic)

Data Visualization & BI Tools: Power BI (DAX, Power Query, Custom Visuals), Excel (Pivot Tables, Macros), Tableau (basic), Streamlit

Big Data & File Formats: JSON, Parquet, CSV, Delta Lake, Semi-structured Data Handling

Cloud Platforms & DevOps Tools: AWS (S3, Lambda, Glue, Athena, Kinesis), Snowflake, Git, GitHub, GitLab, SQL Server Agent, Azure

Testing & Validation Tools: Postman, JMeter, Data Quality Checks, Exception Handling, and Logging Pipelines

Project & Collaboration Tools: JIRA, Confluence, Agile (Scrum), Notion, Slack

PROFESSIONAL EXPERIENCE

Uber

Mar 2025 – Present

Data Analyst

- **Migrated** legacy dashboards to **Snowflake**, cutting reporting lag by **55%** and delivering **real-time KPIs** in **Power BI** for surge pricing and SLA monitoring.
- **Designed** governed analytics frameworks in **Snowflake** with **role-based access**, **time-travel queries**, and **materialized views** supporting finance, operations, and marketing analytics.
- **Developed** and integrated **streaming data pipelines** (AWS Kinesis → S3 → Snowpipe) into **Snowflake staging layers**, enabling real-time behavioral analytics for live market monitoring.
- **Executed** advanced geospatial analysis using **PostGIS** to identify high-demand clusters and implemented **data lineage and audit layers** ensuring accuracy and compliance in analytics reporting.
- **Collaborated** with product and DevOps teams to build reusable **Snowflake UDFs** and apply **warehouse optimization policies**, achieving **30% compute cost reduction** and improved query performance.

Wipro Ltd

Oct 2021 – Dec 2022

Data Analyst / Project Engineer

- **Deployed** automated SSIS packages for extracting payroll, attendance, and asset data from **SQL Server**, reducing manual reporting effort by **70+ hours per month**.
- **Integrated Conditional Split, Derived Column, and Lookup** transformations to manage complex joins and conversions, increasing processing speed by **30% per execution cycle**.
- **Created** optimized indexed views, and CTEs powering **Power BI** dashboards with **real-time data refreshes** handling **500K+ daily records**.
- **Implemented** SSIS logging, alerts, and failure recovery mechanisms using event handlers and checkpoints, ensuring consistent uptime in production workflows.
- **Developed** interactive dashboards and data visualizations in **Power BI**, directly connected to **Azure SQL Database** and **Azure Data Lake** for seamless data access.
- **Constructed** and scheduled **Azure Data Factory pipelines** to automate ETL workflows, enabling end-to-end data movement between cloud and on-premise systems.
- **Tuned** performance bottlenecks using **SQL Profiler**, reducing query runtime by an average of **30 minutes per query** across high-volume datasets.
- **Developed** parameterized and reusable SSIS packages, cutting duplicate logic by **60%** and saving **25 analyst hours monthly**.
- **Automated** real-time health check reports using **Python** tracking **10+ key operational metrics** for bot performance and system stability.
- **Deployed** scheduled jobs through **SQL Server Agent**, integrated with **Git-based version control**, maintaining automated updates across **15 production systems**.

Adani

Oct 2020 – Oct 2021

Data Analyst Intern.

- **Modeled** and maintained customer interaction datasets in **MongoDB**, implementing **schemas, TTL indexes, and versioning logic** to ensure accuracy and real-time data freshness.
- **Developed** multi-stage **aggregation pipelines** and **map-reduce operations** for dynamic cohort analysis, revealing actionable insights on churn, engagement, and conversion trends.
- **Built** interactive analytical tools using **Streamlit, Matplotlib, and Seaborn**, enabling stakeholders to visualize performance metrics and align marketing decisions with business objectives.
- **Automated** campaign tracking and alert systems through **MongoDB Atlas Triggers**, with full documentation in **Notion**, improving data visibility and collaboration across **4 cross-functional teams**.

EDUCATION

St. Francis College

Masters in Information Technology

Sep 2023 — Dec 2024

Centurion University of Technology and Management

Bachelors in Technology

Jul 2017 — May 2021
