

Ashutosh Amogh Moghe

Data Analyst

Phone: +1 (862) 372-5459 | Email: ashutoshmoghe01@gmail.com | Location: New Jersey, USA

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience in healthcare, insurance, and life sciences, specializing in **data visualization, ETL automation, and statistical analysis**. Skilled in **Python, SQL, Tableau, Power BI, and Apache Airflow**, with a proven track record of delivering insights that drive business strategy and operational efficiency. Adept at working in **Agile environments**, applying **machine learning techniques**, and presenting data-driven stories to cross-functional stakeholders.

EXPERIENCE

Boston Scientific | Data Analyst

Dec 2024 - Present

Project: Customer Engagement

- Automated customer engagement tracking workflows **by integrating Microsoft Forms, Power Automate, and SharePoint Excel, eliminating 100% of manual data entry and saving 10+ hours/month; streamlined data pipelines with automated extracts and scheduled Tableau refreshes, reducing data latency from 1 day to near real-time for 25+ stakeholders.**
- Developed 3 interactive Tableau dashboards (**Customer Type, Engagement Trends, Site of Service**) that informed weekly business decisions, reduced reporting time by 35%, and surfaced actionable engagement insights that improved regional resource allocation by 10% and aligned 3 commercial strategy teams.

Project: PRU (Prosthetic Urology) Trends Dashboard

- Designed and developed a Tableau dashboard** integrating 2017–2023 PRU data across 5 diagnosis/procedure categories (IPP, AUS, Male Sling, ED, SUI) and 1,000+ physicians, while standardizing 5,000+ records in Excel across 30+ states, which enhanced data consistency and reduced manual reporting efforts by **40%**.
- Delivered 10+ strategic insights** for Marketing and Strategy teams by identifying 3 high-opportunity states and 5 underpenetrated markets, leading to a **5–7% early pipeline growth**; led 8+ biweekly stakeholder reviews, where visual insights improved cross-functional alignment and accelerated decision-making by **20%**.

Blue Cross Blue Shield, New Jersey – USA | Data Analyst

Aug 2022 – Nov 2024

- Transformed large-scale healthcare data using Python (pandas, NumPy), improving data integrity by 20%, and uncovered behavioral insights through EDA in Jupyter Notebooks with matplotlib and seaborn.**
- Built real-time Tableau dashboards and optimized ETL pipelines using Airflow, SQL, and AWS RDS, boosting data processing efficiency by 30% and streamlining decision-making.**
- Enhanced member segmentation by 15% through clustering models (K-Means, Hierarchical) in scikit-learn, enabling more targeted outreach and improved personalization.**
- Partnered with Agile teams to deliver data storytelling, statistical analysis, and predictive insights using techniques like regression, hypothesis testing, and confidence intervals.**

Prop Technology, India | Data Analyst

Jan 2019 – Aug 2021

- Led a predictive analytics initiative **to optimize property pricing using Random Forest and XGBoost, achieving 85% model accuracy and contributing to a 12% increase in successful transactions.**
- Analyzed over 500K real estate listings **across 10 Indian cities using Python and SQL and built scalable ETL pipelines in Apache Airflow to process 50GB of data daily from multiple sources.**
- Designed and deployed Power BI dashboards **tracking 15 key performance indicators (KPIs), delivering real-time business insights to 50+ stakeholders and enabling faster decision-making.**
- Conducted 10+ A/B tests to evaluate campaign performance and user behavior, leading to a 15% boost in lead generation through data-driven optimization.**

EDUCATION

Master of Science in Information System, New Jersey Institute of Technology, Newark, NJ - USA

Bachelor of Technology in Information Technology, Manipal University Jaipur - India

SKILLS

Project Methodologies: Agile (Scrum), Waterfall, Kanban, SDLC

Programming Languages & IDE's : Python, R, SQL, Visual Studio Code, PyCharm, Jupyter Notebook

Frameworks & Packages : NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit learn, PySpark, Keras, TensorFlow

Visualization Tools: Tableau, Power BI (Power Query, DAX), Excel (Pivot Table, Pivot Chart, VLOOKUP, XLOOKUP, VBA

Database: MySQL, SQL Server, Mongo DB, PostgreSQL

Cloud Technologies: AWS (S3, RDS, Glue), AZURE Fundamentals

Version Control Tools: Git, GitHub, Bitbucket, SVN

Operating System: Windows, Linux

Programming & Modeling: Machine Learning Algorithms, Regression, Classification, Clustering, Forecasting

Statistical Techniques: Probability Distributions, Hypothesis Testing, Confidence Intervals, Regression Analysis

Data Operations: Data Wrangling, Data Cleaning, Transformation, Warehousing, Ad Hoc Analysis
