

Ashwini Valmiki

Business Analyst

NJ | (973) 283-5849 | ashwinivalmiki.1109@gmail.com

SUMMARY

- Around 4 years of experience as a Business Analyst, specializing in the software development lifecycle (SDLC) with proficiency in Agile/Scrum and Waterfall methodologies.
- Expert in developing and refining essential project documentation, including Functional Requirements Documents (FRD), Business Requirements Documents (BRD), and System Requirements Specifications (SRS), enhancing clarity and stakeholder alignment.
- Skilled in advanced data visualization and analysis using Tableau and Power BI, driving strategic decisions through detailed cost/benefit and impact analyses.
- Experienced in conducting comprehensive GAP, risk, and SWOT analyses, identifying critical areas for improvement and effectively managing operational risks.
- Proficient with MS Project, MS SharePoint, and Confluence for managing project timelines, enhancing document management, team collaboration, and project transparency.
- Utilizes Jira for project tracking and issue resolution, improving project delivery timelines and overall workflow efficiency.
- Strong analytical abilities demonstrated by designing and executing SQL queries and employing Excel's advanced features like pivot tables and VLOOKUP to support data-driven decision-making.
- Demonstrated leadership in managing small project segments independently, employing effective time management skills to deliver projects on time and to specifications.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall
Documentation: FRD, BRD, SRS
Project Management Tools: MS Project, MS Excel, MS SharePoint
Visualization Tools: Tableau, Power BI
Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis
Tracking/Other Skills: Jira, Microsoft Visio, HP Quality Center, JAD, Rational ClearQuest, RTM, SQL, Confluence
Soft Skills: Time management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication
Operating System: Windows, Linux

EDUCATION

Master of Science (MS), Data Science New Jersey Institute of Technology	Sep 2022 – Dec 2023
Bachelor of Technology (B. TECH), Electronics and Communication Engineering Geethanjali College of Engineering and Technology	June 2016 – Nov 2020

EXPERIENCE

BlackRock, NJ | July 2023 - Current | Business Analyst

- Designing the Business requirement collection approach based on the project scope, and creating Business Analysis using an agile methodology.
- Participate in GAP analysis around the identification of business rules and system process flows, user administration, requirements, and assumptions.
- Utilize MS SharePoint for effective document management and collaboration, enhancing team productivity and communication across departments.
- Developing complex data visualizations using Tableau and Power BI, supporting detailed cost/benefit and impact analyses that significantly drove strategic decisions, enhancing operational efficiencies.
- Conducting comprehensive GAP, risk, and SWOT analyses to identify critical areas for improvement, significantly enhancing operational risk management and boosting project success rates.
- Managing project tracking and issue resolution through Jira, enhancing project delivery timelines and overall workflow efficiency.

MAX HEALTHCARE, India | Nov 2019 – June 2022 | Business Analyst

- Utilized the Waterfall methodology of development for Requirements, Planning, Design, and Deployment.
- Orchestrated the development of Functional Requirement Documents (FRD), Business Requirements Documents (BRD), and System Requirements Specifications (SRS), enhancing project clarity and improving stakeholder alignment.
- Assisted in the management of project timelines and deliverables using MS Project and Confluence, which enhanced team accountability and project transparency.
- Helped design and execute SQL queries for data analysis purposes, enabling deeper insights into business operations and supporting data-driven decision-making.
- Utilized Excel features such as pivot tables, VLOOKUP, INDEX/MATCH, and complex nested formulas to analyze large datasets, significantly increasing reporting accuracy and supporting critical business decisions.
- Participated in conducting risk assessments and preparing risk mitigation plans, which significantly minimized potential adverse impacts on the business.
- Contributed to team meetings and documentation processes, improving the documentation quality and accessibility for all project stakeholders.
- Analyzed business processes to identify problematic areas and created solutions through the use of available database data and communication software.
- Developed skills in effective time management, leading small project segments independently and delivering on time and to specification.
