
Summary

Data Analyst professional with 3+ years of experience transforming complex data into actionable insights across financial services, healthcare, and academic sectors. Proven expertise in SQL, Power BI, Tableau, and Python to build automated reporting pipelines, design interactive dashboards, and conduct advanced analytics that improve KPIs like churn, CAC, and claims accuracy. Experienced in data modeling, ETL development, and integrating cloud-based platforms (Azure, AWS, GCP) to optimize performance and streamline decision-making. Effective cross-functional partner with a Master's in Computer Science and a track record of delivering measurable business impact through data-driven strategies.

Professional Experience

Data Analyst || Wells Fargo || Dallas, Tx

Jul 2024- Present

- Built auto updating reporting pipelines using **SQL** and **Power BI** to track **real-time KPIs** such as customer acquisition cost (CAC), churn rates, and digital adoption across 12+ regional branches.
- Integrated data from **Snowflake** and **AWS S3** using **Power Query** and custom connectors in collaboration with data engineering, improving report refresh cycles from daily to hourly.
- Conducted advanced data profiling and validation using **Python (pandas, seaborn)** to identify outliers, missing values, and inconsistencies across CRM and transaction systems, improving data accuracy by 18% and reducing error rates by 13%.
- Designed interactive **Tableau** dashboards with **calculated fields** and **user-level filters**, enabling secure, branch level insights to 50+managers and improving data access by 35%.
- Led A/B test analysis for customer reactivation campaigns, delivering insights that boosted engagement by 14% in underperforming customer segments.
- Delivered executive summaries and visual insights for quarterly business reviews, directly influencing strategic decisions in loan product uptake by 15% and mobile adoption rates by 20%.

Data Collection Analyst || Northern Illinois University || Dekalb, IL

Dec 2022-Apr 2024

- Improved daily survey response goals by 14% by optimizing interview workflows using **Excel** and **Python** for process analytics.
- Streamlined data tracking spreadsheets with data validation rules in **Excel** and **R**, reducing data discrepancies by 18% and enabling real-time, data-driven decision-making.
- Constructed advanced **Tableau** dashboards connected to **SQL** databases to analyze interviewer activity, identifying top-performing surveyors and increasing engagement across 15+ survey projects.
- Analyzed call metrics, including call-to-conversion ratios, using **SQL** and **Pandas in Python**, and visualized insights with **Power BI**, leading to a 22% improvement in conversion rates and a 17% reduction in average call handling time.

Data Analyst || Wipro || Hyd, India

Aug 2021-May 2022*Client : Leading U.S. Healthcare Payer*

- Analyzed and validated 5M+ insurance claims datasets using **SQL** and **Python**, identifying discrepancies and processing errors that improved claim accuracy by 15%.
- Enabled **real-time** tracking of claims lifecycle metrics by building **Power BI** dashboards that surfaced denial patterns, submission rates, and delays reducing resolution time by 25% and improving issue resolution efficiency by 18%
- Conducted root cause analysis of claim denials and coordinated with business units to implement corrective actions, reducing denial rates by 10% within six months.
- Collaborated with cross-functional teams to design and implement data quality frameworks ensuring 100% compliance with HIPAA and payer regulations.
- Performed trend and utilization analysis to detect fraud and abuse patterns, identifying anomalies that contributed to a 20% reduction in high-risk claims.
- Supported preparation of reports for regulatory submissions and audit readiness, improving data traceability by 22%.

Education:

Master of Science in Computer Science, Northern Illinois University**May 2024**

Skills:

Languages : Python, SQL, R, Bash**Data Visualization & BI Tools :** Power BI, Tableau, Matplotlib, Seaborn**Databases & Warehouses:** Snowflake, Bigquery, Redshift, SQL Server, PostgreSQL, MySQL, Oracle, MongoDB, Data Modeling**ETL Tools:** Azure Data Factory, AWS Glue, SSIS, Informatica**Cloud Platforms:** Microsoft Azure(ADF, Synapse, Databricks), AWS(Glue, S3, Redshift),GCP(BigQuery)**Data Quality & Testing:** PyTest**Machine Learning :** Linear/Logistic Regression, Supervised/Unsupervised ML, GLMs, Hypothesis Testing**Orchestration:** Apache Airflow, Cloud Composer**Developer Tools & IDEs:** VS Code, Jupyter**Other Tools:** Excel(Power Query), Jira, Confluence, SharePoint, Power Automate, VBA, Windows, Linux, Ubuntu
