

EDUCATION**Master of Professional Studies in Analytics**

Northeastern University, Boston, MA

May 2025

- Related Courses: Data Analytics, Data Management and Database Design, Computation and Visualization, Data Mining in Engineering

Bachelor of Business Administration

ICFAI Business School, Hyderabad, India

June 2022

- Related Courses: Business organization, strategy & management, Product Management, Product Management, International Business

WORK EXPERIENCE

Data Analyst

May 2025 – Present

Little Caesars, Detroit, MI

- Executed complex **SQL** queries on **Snowflake** databases to extract, transform, and analyze operational and financial data, supporting enterprise-level reporting and decision-making.
- Developed automated data pipelines and cleaning scripts using **Python**, enhancing data accuracy and reducing manual reporting effort by over 30%.
- Designed and deployed interactive **Power BI** dashboards integrated with Snowflake datasets to track key performance indicators (KPIs) such as revenue, transaction volume, and operational costs
- Partnered with cross-functional teams to deliver data-driven insights, directly contributing to improved forecasting accuracy, resource planning, and overall strategic alignment.

Data Analyst

June 2023 - July 2023

Infinity Learn, Hyderabad, India

- Created “Social Media Benchmarking” **Tableau** dashboard to track key metrics such as subscription rates, clicks, conversions, and impressions across social media platforms like Facebook, Twitter, Instagram, and TikTok, enabling data-driven decision-making.
- Leveraged **Google BigQuery** and **BigQuery Studio** to perform data analysis and schedule automated jobs using **BQ assistant**, ensuring seamless data flow and timely updates for stakeholders to optimize campaign performance.

Business Analyst

Feb 2023 - April 2023

Square Yards, Hyderabad, India

- Analyzed sales data, customer feedback, and industry reports in MySQL to provide insights and recommendations for improving sales strategies and Read Estate offerings, leading to a **15% increase in sales conversions**.
- Conducted data analysis on customer purchase trends and high-sales areas each quarter using **Snowflake**, providing data-driven insights and visualizing them on heat maps and area charts in **Tableau** that contributed to strategic planning and business growth
- Created the “Operational Performance Dashboard” showcasing metrics like **ROAS**, **Spend**, **Revenue** to track progress of property sales on the website and different campaigns done onsite and offsite, towards business goals and objectives.

Data Analyst

July 2022 – January 2023

Square Yards, Hyderabad, India

- Provided **ETL (Extract, Transform, Load)**, **data cleaning, and handling** services to Square Yards, leveraging **SQL** and **Python** to process thousands of real estate transaction records. Generated monthly reports based on property listings and client interactions, created visualizations using Tableau.
- Implemented and maintained a scalable data warehousing solution using **Snowflake**, optimizing data storage, processing, and improved **query performance by 20%** for efficient data analysis and reporting in a real-estate environment.
- Spearheaded the deployment and management of a robust **data warehousing** solution tailored to Square Yards' requirements, optimizing **data storage**, processing efficiency, and **query performance** to support data analysis, and **reporting** functionalities.

SKILLS

Languages and Libraries: Python, R, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Pyvis.**Database System:** My SQL, SQL Server, Azure SQL Databases, Google cloud platform, Bigdata.**Software and Tools:** Azure Data Studio, Tableau, Power BI, Excel, Flourish, Airflow, GitHub, PyCharm.**ACADEMIC PROJECTS**

Movie Ticket Booking System

December 2023

- Led data analysis efforts for a Movie Ticket Booking System project, utilizing **SQL** to manage and analyze customer data. Implemented **robust security measures** to protect sensitive information stored in the **AWS cloud**.
- Enhanced technical skills in SQL during the project, employing it for complex data queries and analyses. This experience in data protection, confidentiality, and access controls significantly bolstered my capabilities as a data analyst.

Visualizing Climate Change.

March 2022

- Developed an engaging website using **Flourish** and **Tableau** to dynamically illustrate **climate change** across multiple years. Designed an intuitive platform offering **interactive charts**, allowing users to delve into the **root causes** and far-reaching impacts of climate change, fostering enhanced understanding and awareness.

A study on attitude towards apple products.

July 2021

- Performed extensive analytical investigations into Apple's market strategies, dissecting their effectiveness and limitations to enrich market understanding and insight.
- Utilized analytical methodologies to conduct rigorous evaluations of Apple's product strategies, discerning their influence on consumer behavior and market dynamics, contributing to informed decision-making and strategic planning processes.
