EDUCATION

Missouri State University-Master’s in Computer Science	Dec 2024
Jawaharlal Nehru Technological University - Bachelor’s in Information Technology	June 2022

SKILLS

- Languages : Java, Python, C#, Vb.net, HTML, CSS, JavaScript, PHP, Typescript
- Frameworks : Mongoose, SyteLine, BarTender, SSRS, SSMS, ASP.Net Core, ASP.Net, Angular , Breeze, React, MVC, ADO.Net
- Software Development : REST APIs, OOP, Data Structures, Microservices, Unit Testing, Agile, SOAP
- Tools : Visual Studio Code, Git, SyteLine ERP, Docker, API, GitLab CI/CD, Powershell
- Databases : MySQL, MongoDB, PostgreSQL, Firebase.
- Skills : Front-end, Back-end, Unit-Testing, SCRUM, BI, OOPs, Problem solving, SDLC, Azure Fundamentals, ETL, AWS, Azure DataBricks

EXPERIENCE

Software Engineer Intern at OMNI RTLS (Springfield, MO)	Aug 2024-Dec 2024
- Developed and implemented a RESTful API using Node.js and Express, integrated with a MySQL database, which led to a 30% improvement in data processing speed and a 25% decrease in API response time. - Utilized Jira to manage and track tasks as part of Agile methodologies, ensuring timely project delivery and contributing to a 30% increase in team productivity. - Implemented Breeze for client-side data management, achieving performance gains of up to 50% through reduced server load and faster data operations. - Implemented Agile methodologies to manage software development projects, resulting in a 30% increase in productivity - Collaborated with the team to contribute ideas and insights for designing intuitive and efficient software solutions. - Developed and maintained API documentation and specifications, resulting in a 20% increase in developer productivity and a 10% reduction in API errors - Implemented responsive design to enhance compatibility and accessibility across devices for a better user experience. - Applied best practices in web development, optimizing code and using Git to maintain high quality and reliability.	

Graduate Assistant at CNH Industrial Reman (Springfield, MO)	July 2023-Dec 2024
- Executed key project activities for 2024, including automation, readiness, support, and pre-implementation of the ERP system upgrade. - Contributed to the successful elimination of 65% of customizations in the ERP system. - Contributed to two successful pilot tests and one confirmation testing run, resolving all identified issues to ensure a smooth transition for stakeholders and associates. - Efficiently created complex SQL queries and designed data mapping strategies to align source and target systems, reducing data transformation efforts by 40% and ensuring seamless data integration. - Developed and optimized complex SQL queries and stored procedures to improve database functionality and meet business needs. - Automated the process of extracting, transforming, and mapping files to relational databases, which minimized manual intervention by 35% and enhanced the accuracy of data workflows. - Upgraded the ERP system significantly, enhancing efficiency and reducing additional work by 70%. Utilized ETL processes and SSIS for data import/export and transformation. - Worked on a data pipeline use case in Azure Databricks, designing and implementing ETL processes to transform and load large datasets into a cloud-based data warehouse. - Designed, debugged, and deployed SSRS reports and dashboards, providing data insights for business stakeholders. - Collaborated with Subject Matter Experts (SMEs) to gather requirements, translate them into technical specifications, and deliver solutions, ensuring timely updates and features. - Conducted performance tuning and optimization of BI solutions to improve efficiency and user experience. - Utilized SQL, IDOs, Event handlers and VB code for backend ERP operations in Infor to maintain smooth business operations. - Created tables, views, triggers, and user-defined functions using T-SQL and adhered to data management best practices to ensure data integrity.	

Associate Software Engineer at Innova Solutions (Hyderabad, India)	Jun 2022-Jan 2023
- Designed and developed web applications using C#, SQL, ASP.NET, and Entity Framework, leveraging Agile/Scrum methodology to enhance the applications, improve efficiency and user-friendliness, and cut operational time by 50%. - Worked on ASP.NET Client side state management view state, cookies and query strings. - Implemented LINQ, .NET Framework, Object-Oriented Programming (OOP), and ADO.NET for efficient data access and application development. - Worked with MongoDB for NoSQL database management, optimizing data storage and retrieval for performance-critical applications. - Performed Unit testing and functional testing. - Gained hands-on experience with PowerShell scripting to automate repetitive tasks such as deployment, file management, and system monitoring, improving operational efficiency and reducing manual intervention by 30%. - Involved in requirement analysis and application design sessions with business analysts and team members to define the proposed IT solution.	

Web Developer Intern at The Sparks Foundation (Remote, India)	Jun 2021-Aug 2021
- Designed and developed web applications using JavaScript frameworks to increase target audience engagement by 12%. - Acquired corporate skills and gained a good amount of web- designing and handling experience in a short span.	

ACADEMIC PROJECTS

Automatic Surface Disinfecting Robot using Ultraviolet Lights
- It's an Automatic Surface Disinfecting Robot that can be used to disinfect the surface in hospitals and apartment buildings. - We have used an Arduino, some UV LEDs, and ultrasonic sensors.
AI-based college inquiry chatbot.
- The goal of the college inquiry chatbot project is to employ algorithms to read user queries and understand user messages - We have used Python, machine learning, Flask, PyTorch, Numpy
Emotion-Based Music Recommendation System
- An application that gives some recommendations based on the emotion detected by capturing our faces. - We have used Python, OpenCV, TensorFlow, Django, Deep learning models. Automatic Surface Disinfecting Robot using Ultraviolet Lights

CERTIFICATIONS

- Python for everybody
- Frontend Fundamentals
- Machine Learning
- PHP Course
