Professional Experience

Computer Science Instructor

India - 1.5 years

- Developed and implemented lesson plans for computer science courses, training students in Java, SQL, HTML, and data analytics.
- Managed student projects focusing on data management, web development, and system automation.
- Conducted workshops on Power BI and project management software, enhancing students' analytical and visualization skills.

Project: Crime Logger

Technology Stack: ASP.NET, C#, SQL, Windows/Linux

- Designed a complaint management system for police stations, streamlining reporting and tracking of cases.
- Implemented user authentication, case filing, and multimedia evidence submission features.
- Improved data accessibility and security, reducing manual paperwork and enhancing police response efficiency.

Project: E-Commerce Website Development

Technology Stack: Python, Django, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, AWS

- Developed a full-stack e-commerce platform with user authentication, product search, and real-time inventory updates.
- Integrated secure payment gateways and cloud deployment, ensuring high availability and performance.

Education

5-Year Integrated Master of Science in Computer Technology

Anna University, India

Certifications & Training

- Project Management Certification
- Data Analytics Bootcamp – Thinkcloudly
- AI & Data Analytics Bootcamp – SkillArbitrage

Achievements

- College Topper (2010)
- Top Percentage in Anna University (2010-2013)
- Awarded Best Outgoing Student (2009-2013)
