EDUCATION

Illinois Institute of Technology Master's in Artificial Intelligence 3.70 Course Work: Big Data, Data Preparation & Analysis, Machine Learning, Deep Learning.	USA Jan '24 - Dec '25
J.B. Institute of Technology Bachelor's in Information Technology 3.57 Course Work: C, python, DBMS, Probability and Statistics, DSA, Mathematics I, II	India Jul '19 - May '23

SKILLS

Programing Languages: Python, C++, R, Java.
Data Processing Tools: PySpark, Hive, SQL, PowerBI, Tableau, Excel, Numpy, Pandas, Matplotlib, Seaborn.
AI & ML: RAG, LangChain, LLMs, TensorFlow, PyTorch; LSTM, XGBoost, LightGBM, scikit-learn.
Cloud, Deployment & MLOps: AWS, SageMaker, Bedrock, Azure, Docker, Git, CI/CD pipelines, FastAPI, REST/JSON.

EXPERIENCE

Illinois Institute of Technology Teaching Assistant (Online Social Network Analysis)	Chicago, USA Aug '25 – Dec '25
- Held office hours covering graph and decision tree intuition, workflows, and key calculations. - Guided students in utilizing Power BI and Python-based GIS tools to build network maps and visualize similarities between Chicago communities leveraging ACS and decennial census data. - Reviewed student's work carefully, identified and corrected mistakes; clarified their code, data choices, and analysis results.	
Uplifty AI/ML Algorithm Engineering Intern	New York, USA July '25 - Nov '25
- Led Human Growth Index team, designed a multi-dimensional user well-being measure using a logit-based scoring system. - Designed a 100k+ text dataset using GPT-assisted weak labeling, reviewing, PII cleanup, dedup (OpenAI API). - Developed emotion and wellness models (<i>GoEmotions</i>, GPT-Labeled wellness dataset) with emoji handling, achieving F1 scores of 0.4–0.8 across 27+ emotions and 11+ wellness (<i>BERTweet</i>, <i>Transformers</i>, <i>spaCy</i>). - Deployed production-ready APIs with reliable batching/retries and scalable cloud deployment (Flask, Docker, GCP).	
Pantech Solutions Data Science Intern	Hyderabad, India Jan '22 - Jun '22
- Retrieved and preprocessed data with SQL, performing customer segmentation, automating data analytics workflows. Validated ML models (e.g., logistic regression, decision trees, SVMs) and evaluated performance using key metrics. - Created data visualizations and reports utilizing Power BI and Tableau, supporting business decision-making.	

PROJECTS

American Express - Default Prediction	Jun '25 - Jul '25
- Processed 15M-row time-series dataset with Parquet conversion, chunking, and vectorized processing. - Reduced features via statistical aggregations and column filtering. - Reached 79.97% AUC with LightGBM, close to leaderboard top.	
Optiver - Trading at The Close	May '25 - Jun '25
Processed 5.26M NASDAQ records to compute bid/ask imbalances, spreads, normalized time, and target lags. - Built a sequence-generation pipeline with sliding windows (length 55), padding, and train/inference batching. - Developed an LSTM model integrating numerical and categorical inputs for 10-minute auction forecasting.	
2024 USA Presidential and Congressional Election Prediction: Alaska.	Aug '24 - Nov '24
- Employed weighted scorecard approach, integrating sentiment, candidate data, and historical trends to predict winners. - Extracted and analysed political news with NewsAPI and TextBlob, and used a Decision Tree to forecast vote shares. - Generated precinct-level vote shares and GIS visualizations using tableau from U.S. Census Bureau, MIT Election Lab. - Visualized and found Economic Factors are major influencers in both elections, while demographic impact was minimal.	
Mercedes-Benz-Greener-Manufacturing	May '24 - Jun '24
- Optimized Mercedes-Benz car testing procedures, reducing time, resource usage while maintaining accuracy. - Loaded data via Kaggle APIs, removed 147 dominant features, handled outliers (IQR) after analyzing visualizations using seaborn and matplotlib, applied one-hot encoding and created preprocessing pipelines with column transformers. - Achieved 92% accuracy on Random Forest and deployed using AWS Beanstalk using Flask, Docker, CI/CD pipelines.
