Backend Developer Intern

June 2021 – September 2021

Technoscope, Mersin University | Mersin, Turkey

- Developed backend functionalities using Python and Django.
- Designed optimized MySQL database structures and integrated RESTful APIs.

PROJECTS

Fitness App (JavaScript)

- A Fitness App built with JavaScript is a dynamic web application designed to help users track and manage their fitness goals. It typically includes features such as user authentication, exercise logging, goal setting, and real-time progress tracking. The app can allow users to input their workouts, track calories burned, monitor daily steps, or even generate personalized workout plans based on fitness levels.
- Leveraging JavaScript, the app ensures an interactive and responsive user interface, enabling features like data visualization for tracking progress through charts or graphs. Additionally, JavaScript's integration with APIs allows the app to pull data from wearable fitness devices, enhancing the user experience by syncing real-time data.

Technical Skills

- **Programming Languages:** Python, Java, C++, JavaScript, HTML/CSS, SQL
- **Web Development:** HTML5, CSS3, JavaScript, React.js
- **Database Management:** SQL, MySQL, PostgreSQL
- **Operating Systems:** Windows, IOS
- **Customer Relationship Management (CRM):** Familiarity with CRM tools to manage customer information and sales processes effectively

VOLUNTEER WORK

Organization Team Member

April 2024

Turkish Society of Canada
