SUMMARY

Software Engineer with backend and full-stack expertise in Java, Python, Node.js, and AWS cloud. Skilled in building scalable web applications, optimizing system performance, and delivering reliable solutions through collaborative development. I am driven to contribute to impactful projects while growing within a fast-paced environment focused on innovation and user experience.

EDUCATION

Binghamton University, State University of New York Master of Computer Science	Aug 2023 – Dec 2025
Vishwakarma Institute of Information Technology Bachelor's in Electronics and Telecommunication	Aug 2018 – May 2022

TECHNICAL SKILLS

Languages: JavaScript, Node.js, Python, TypeScript, Java, SQL, Bash, C++, HTML, CSS
Development Tools & APIs: Git, CI/CD, RESTful APIs, GraphQL, WebSockets, Postman, Test Automation, OAuth2, IAM
Cloud & Infrastructure: AWS (Lambda, ECS, EC2, RDS, EKS, EBS), Docker, Kubernetes, Terraform, Linux, Windows
Database & Storage: MongoDB Atlas, PostgreSQL, Redis, InfluxDB

WORK EXPERIENCE

Software Engineering Intern, Entertainment Technologists – Los Angeles, CA	Aug 2024 – Dec 2024
- Developed a full-stack Flask web platform (HTML, CSS, JavaScript) enabling users to upload and process raw videos with automatic subtitle generation, reducing manual video processing time by 10+ hours per week - Built a high-performance processing pipeline using multiprocessing and streaming techniques, reducing resource utilization by 50% and handling 200+ hours of video weekly. Implemented multilingual subtitle support with silent part detection and descriptive annotations, achieving 95% precision in subtitle generation - Engineered a scalable video processing pipeline capable of handling high volumes concurrently, decreasing processing bottlenecks and enhancing system throughput by 75% compared to the legacy system	
Research Engineer, The Research Foundation for SUNY – Binghamton, NY	Sept 2023 – Aug 2024
- Engineered real-time GPU cooling monitoring platform handling 100GB+ daily data using microservices architecture - Optimized data processing pipeline achieving sub-500ms latency for 95% of data points and 99.9% system uptime - Configured secure network access protocols and provided technical guidance across research teams - Developed React dashboard with TypeScript and WebSockets for real-time GPU performance monitoring	
Software Engineer, Accenture Solutions Pvt. Ltd – Pune, Maharashtra, India	Sept 2022 – Aug 2023
- Built custom vacation management platform in Java, integrating GraphQL for selective data retrieval from client systems - Optimized PostgreSQL queries with composite indexing and advanced pagination strategies, reducing manager dashboard load time from 10s to 400ms (96% improvement), enhancing user experience for 500+ daily active managers - Developed RESTful APIs and backend services deployed via Docker with CI/CD pipelines, reducing deployment time from 2 hours to 30 minutes and supporting 3 manufacturing facilities	

PUBLICATION

S Rathi; **Atharv Raje**; G Ghule; S Sankpal; Soham Shitole; P More, “Visual Question Generation Using Deep Learning”, 2023 International Conference on Computing, Communication, and Intelligent Systems (ICCCIS), Greater Noida, India, 2023, pp. 82-87, doi: [10.1109/ICCCIS60361.2023.10425302](https://doi.org/10.1109/ICCCIS60361.2023.10425302)

PROJECTS AND CERTIFICATION

Distributed E-Commerce Platform <i>Docker, Redis, PostgreSQL, REST APIs, JWT, CI/CD, AWS, Load Balancing</i>
- Architected a scalable, microservices-based e-commerce platform using Docker and Kubernetes, with Redis caching and PostgreSQL sharding, handling 10K+ concurrent users with sub-200ms response time - Built automated CI/CD pipelines with testing, monitoring, and AWS deployment, improving release velocity from weeks to hours while maintaining 99.9% uptime in distributed cloud-native services
Cross-Platform Data Analysis System <i>Python, Flask, APIs, Data Processing</i>
- Automated data pipeline processing 10GB+ daily social media data with 95% accuracy toxicity detection, identifying 1K+ harmful posts daily - Developed Flask visualization platform serving 1M+ data points with 2s load times, supporting real-time content policy decisions across multiple social media platforms
AWS Certified Cloud Practitioner
Gained expertise in AWS cloud services, security, and cost management for infrastructure implementation
