EDUCATION

Syracuse University , Syracuse, NY Master of Science - Business Analytics	May 2025
Mumbai University , Mumbai, India Bachelor of Engineering - Information Technology	Jun 2021

PROFESSIONAL EXPERIENCE

Vita Financial , Georgia, USA Business Intelligence Intern	Dec 2024 - present
---	--------------------

- Created **ETL** pipelines leveraging **AWS SFTP**, **S3**, **DynamoDB**, and **Lambda** to ingest and process daily client data from Wealth-box CRM and e-Money into a centralized **Snowflake** data warehouse, centralizing client records for analytics
- Solved high-volume **streaming challenges** by building a real-time data pipeline with **AWS Kinesis**, **Firehose**, and **Lambda**, enabling 100GB+ **parquet** and **JSON** files for smooth Snowflake ingestion and reducing data lag by 80%
- Enhanced **ETL system security** by 70% through risk assessments, vulnerability fixes, and restructuring of **AWS policies**
- Accelerated sales execution by building real-time, **interactive Power BI dashboards** that enabled the sales team to track lead generation and cold-calling performance, driving a 40% increase in reporting efficiency
- Generated vector data** to fuel client-behavior **AI models** by building an MS Teams bot to transcribe meetings, convert transcripts into vector embeddings, and storing in Pinecone—reducing manual effort by 90% and accelerating AI initiatives
- Led **Scrum** stand-ups, streamlined project tracking in **JIRA**, enforced **Infrastructure as Code (IAC)** practices to eliminate manual workflows, and oversaw 6 interns—boosting BI team delivery speed by 30%

The City of Rocky Mount , North Carolina, USA Business Data Analyst Intern	Jun 2024 - Aug 2024
---	---------------------

- Optimized customer data performance in **MySQL** by implementing **indexing** and **partitioning**, achieving 40% faster querying
- Refactored reporting layer by restructuring query logic using common table expressions (**CTEs**) in SQL to simplify queries, reducing scheduled refresh failures by 80%, resulting in more reliable reporting
- Developed **SQL views** in the Customer Information System (CIS) to optimize data flow into **Power BI dashboards**, cutting report generation time by 50% and enabling personalized utility service recommendations for clients
- Built a scalable **MS Power Apps** leave tracker for 100+ employees, integrating **SharePoint Lists** and **Power BI** dashboards to deliver real-time attendance insights to the department director, reducing workforce management time by 80%

Tata Consultancy Services Ltd. , Mumbai, India Business Intelligence Developer	Jul 2021 - Jul 2023
---	---------------------

- Engineered a comprehensive business intelligence solution using **Informatica** to integrate data into **SAP HANA**, creating complex **ETL** mappings that accelerated report generation speed by 60% through optimized data flow
- Administrated data flow for over **2.5 million** retail records using Informatica Product360 and Informatica PIM Rich Client
- Tuned performance by **identifying bottlenecks** across sources, targets, mappings, and sessions, boosting efficiency by 60%
- Generated automated **Tableau** reports from diverse data sources, including **OLAP** cubes, showcasing advanced **SQL** concepts and expertise, cutting manual efforts by 70%
- Synthesized Business Requirement Documents into comprehensive **Technical Design Documents**, mapping source-to-target data which streamlined data transformation logic, resulting in 25% faster project delivery

PROJECTS

Upstate Cancer Center Lean Six Sigma Project	Sep 2024 - Dec 2024
---	---------------------

- Led an LSS project using the **DMAIC** framework to improve post-visit coordination, delivering data-driven recommendations with projected savings of \$180K annually
- Architected **Power BI** reports using **DAX** to analyze quarterly **EPIC EMR data** to identify providers with the most inconsistencies in note entries, enabling targeted EPIC system training to achieve 100% consistency

On-premises to Cloud Migration Healthcare Insights Product	Feb 2024 - Apr 2024
---	---------------------

- Built and scheduled data pipelines using **Azure Data Factory** and Self-hosted Integration Runtime to automate daily data migration from on-premises SQL Server to Azure Data Lake Storage
- Mounted **Azure Data Lake** in **Databricks** using **PySpark** to perform advanced transformations on healthcare records with **Spark SQL**, and developed interactive KPI dashboards in **Power BI** to visualize business and clinical insights

TECHNICAL SKILLS/PUBLICATIONS

Certifications:	Lean Six Sigma- Green Belt (CSSGB), Snowflake Data Warehousing
Languages:	SQL, Python, R, DAX, M, PowerShell, JavaScript, PySpark, Spark
Databases:	Oracle SQL, Snowflake, DBT, AWS Redshift, Azure Data Studio SSMS, MySQL
Analytical Tools:	MS Excel, Power Query, Power BI, Tableau, Google Analytics, Microsoft Power Platform
Project Management:	Atlassian JIRA, Atlassian Confluence, GitHub, Bit Bucket
Cloud Platforms:	Microsoft Azure, Amazon Web Services, Google Cloud Platform
Publications:	"Monitoring of Suspicious Discussions on Online Forums", IRJET, Volume: 08 Issue: 04
