EDUCATION

- MS in Information Technology**, Worcester Polytechnic Institute, Worcester, MA Aug 2023 - May 2025
- Database Management, System Design, Business Intelligence, Marketing Analytics
- Bachelor of Engineering in Computer Engineering**, Pune University, India Aug 2019 - May 2023
- Cloud Computing, Machine Learning, Data Science, Big Data

CERTIFICATIONS

- [GitHub Foundations](#) Mar 2025
- [Tableau Desktop Specialist](#) Dec 2024
- [AWS Solution Architect Associate](#) Aug 2024

EXPERIENCE

- Software Engineer**, Humanitarians AI, USA Jun 2025 - Present
- Shipped Node.js/Express REST APIs for an NDA logistics system matching, pricing, and real-time tracking optimized PostgreSQL across six tables to 200 ms median for 100+ daily transactions, verified via logs and EXPLAIN ANALYZE.
 - Created Python analytics with pandas and SQL generating KPIs rides, cancellations, revenue processing 3,000+ monthly transactions and cutting reporting from 3 hours to 30 minutes via automated rollups and scheduled CSV exports.
- Graduate Assistant**, WPI Business School - Worcester, MA Oct 2023 - Oct 2024
- Led site diagnostics with Google PageSpeed, prioritized fixes, and improved load speed by 30% for local businesses, delivering accessible layouts and SEO hygiene that increased on-page engagement by 20% across redesigned pages.
 - Refined Wix sites with structured headings, alt text, and mobile-first layouts; elevated accessibility and usability metrics, raising average session duration 18% and lowering bounce rate 12% across monitored client pages.

PROJECTS

- HappyRobot: Real Time Logistics Tracking Platform** [\[Live Demo\]](#) | Next.js, Supabase Jul 2025 - Aug 2025
- Developed a real-time tracker in Next.js and TypeScript, integrating 4 Google Maps APIs; owned component patterns and accessibility; deployed on Vercel with code-splitting to reduce JavaScript payload 22% and improve initial render.
 - Implemented serverless infrastructure with Supabase authentication and Google OAuth; maintained 220 ms average API response time and deployed globally on using environment-scoped secrets and rollbacks for production
- Fintastic: CI/CD for MERN Expense Tracker** [\[Live Demo\]](#) | MERN, Github Actions May 2025 - Jun 2025
- Engineered Fintastic, a full-stack MERN expense tracker with JWT-secured Express APIs, MongoDB persistence, and scaling to 100+ concurrent users with 150 ms average API responses and 99% observed uptime on Vercel/Render.
 - Automated a Docker based CI/CD pipeline using GitHub Actions; achieving an 80-second average commit to production time across 70+ deployments, enabling rapid feature rollouts, instant rollback, and eliminating downtime during updates.
- Multi-Environment AWS Infrastructure Deployment with Terraform** | HCL Sep 2024 - Nov 2024
- Orchestrated modular Terraform infrastructure for multi-environment deployments with S3 remote state and DynamoDB locking, reducing provisioning complexity by 66% and maintaining zero drift across dev, staging, and production.
 - Designed Infrastructure as Code modules enabling rapid environment scaling and cost optimization via variable driven instance sizing, eliminating manual configuration errors and cutting deployment time from 47 minutes to 12 minutes.
- Serverless Web Application for Student Data Management Using AWS** | AWS, Python Sep 2023 - Nov 2023
- Built serverless architecture using AWS Lambda, API Gateway, and DynamoDB with CloudFront distribution, achieving sub-280 ms response times and reducing operational overhead by 74% through removal of server maintenance tasks.
 - Secured multi-user data with IAM roles, CORS, and HTTPS across API Gateway and CloudFront; achieved 99% availability and cut hosting costs 42% versus an always-on server using pay-per-request pricing.

SKILLS

Languages & Frameworks: Python, C++, SQL, JavaScript, Bash, PowerShell, Node.js, React.js, Express.js, REST API, HTML, CSS, TypeScript, Next.js

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, AWS CLI), Docker, Terraform, Git, GitHub, GitHub Actions

Data & Analytics: Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib, Jupyter Notebook, Power BI, Tableau, MySQL, PostgreSQL, MongoDB, DynamoDB

Tools & Platforms: Docker Compose, Postman, Visual Studio Code, Nginx, Vercel, Render, MacOS, Windows, Linux
