

ATTA UR REHMAN

ABOUT ME

I am a Computer Science graduate with a passion for technology and learning. I am currently looking for internship or entry-level opportunities where I can apply and improve my skills in programming, databases, and emerging technologies like Artificial Intelligence.

EDUCATION

Bachelor of Science in Computer Science.

University of Haripur

CGPA: 3.09

2021- 2025

The Punjab School And Degree College Swat Chowk Haripur

Haripur

67% 2019 -

2021

FIELD OF INTREST

Python Odoo Development, Artificial

Intelligence, Programming in Python

Technology Integration in Industry.

LANGUAGE

House # E-67 Near Jamia Masjid Tip Colony Haripur.

INTERSHIP OPPORTUNITY

- I am actively seeking an internship opportunity and gain hands-on experience in real-world environments, particularly in the areas of ERP development, system troubleshooting, and database management. I am especially interested in the role of an Odoo Developer, where I can deepen my understanding of business workflows, process automation, and enterprise software solutions. This opportunity will allow me to practically apply my academic knowledge, learn from experienced professionals, and contribute to digital innovation, operational efficiency, and overall process improvement with in a leading organization.

FINAL YEAR PROJECT

- I worked as part of a collaborative team to design and develop an **AI-powered Skin Disease Detection and Monitoring System**. Our goal was to automate the detection process with enhanced accuracy and user- friendly reporting. The frontend was developed using Flutter for a cross- platform mobile application with a smooth and responsive interface. The backend was built with Python, which handled model training, disease classification, and secure data processing. The system leverages computer vision and machine learning to accurately detect skin conditions, helping reduce diagnostic errors and improve healthcare accessibility.
