

Augustus Newman

Technical Operations

Summary

Tech-savvy operations analyst with hands-on experience in scripting, automation, troubleshooting, and system optimization. Adept at reducing manual processes through custom-built scripts and driving operational excellence.

Work Experience

○ Computer Programmer

Texas Trust Credit Union | 2022 – 2025

Develop and maintain automation scripts in PowerOn to streamline core banking operations. Refactored legacy specfiles, improving system performance and reducing errors. Collaborate with cross-functional teams to implement solutions supporting compliance and efficiency.

○ IT Support Specialist

Truist Bank | 2021 – 2022

Provided technical support across hardware, software, and network systems. Resolved over 400 tickets with a 95% satisfaction rate and reduced resolution time by 30%. Led onboarding efforts by configuring workstations for new employees.

○ Technical Operations Support Specialist

TTEC | 2020 – 2021

Supported customer-facing and backend operations in fast-paced environments. Delivered technical assistance, resolved service issues, and ensured fulfillment accuracy. Collaborated with cross-functional teams to maintain workflow efficiency and meet quality standards.

○ Technical Fulfillment Associate

Amazon | 2017 – 2020

Supported operational quality through system-guided workflows and inventory accuracy checks. Utilized handheld technology and internal software to identify fulfillment errors, ensure compliance, and report technical discrepancies for resolution.

- Email Marketing (campaigns, retention, automation)
- Social Media Marketing

AUGUSTUS NEWMAN

COVER LETTER FOR TECHNICAL OPERATIONS ANALYST

Dear Hiring Manager,

I am writing to express my interest in the Technical Operations Analyst position at your organization. With a Bachelor of Science in Computer Science from the University of Houston-Downtown and hands-on experience in technical programming, systems analysis, and IT support, I am confident in my ability to contribute meaningfully to your operational efficiency and technology-driven initiatives.

In my role as a Computer Programmer at Texas Trust Credit Union, I have developed and maintained over 50 PowerOn automation scripts within the Symitar Episys core system, directly reducing manual processes by 50% and improving audit readiness. My work optimizing legacy specfiles has enhanced system performance during peak hours, and I've collaborated cross-functionally to implement solutions aligned with business and compliance needs.

Prior to this, I served as an IT Support Specialist at Truist Bank, resolving more than 400 technical support tickets with a 95% satisfaction rate. I successfully onboarded new employees and reduced average resolution times by 30%, demonstrating a proactive and detail-oriented approach to technical problem-solving.

My technical toolbox includes PowerOn scripting, SQL, data parsing, and system diagnostics, with proficiency in tools such as ServiceNow, Splunk, and Visual Studio. I am also well-versed in cross-platform environments (Windows, Linux, Mac) and take pride in bridging the gap between IT operations and business processes.

I am excited about the opportunity to apply my analytical mindset and technical expertise to your team. I would welcome the chance to further discuss how I can contribute to your operational goals. Thank you for considering my application.

Speak soon,

Augustus N.
