SUMMARY

Highly motivated employee with desire to take on new challenges. Strong work ethic, adaptability, and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills.

EXPERIENCE

UNIVERSITY OF NORTH TEXAS

Denton, USA

Instructional Assistant

08/2024 to Current

- Working under a Clinical Associate Professor for the course Fundamentals of Artificial Intelligence
- My responsibilities include giving lectures to students, clearing doubts, correcting assignments, exams and helping with projects
- Achievements: Got appreciation from the client to work on Vx Cutover to CO release
- Got 5/5 feedback from my manager at the time of appraisals
- Converted into Programmer Analyst in the very first year
- Converted into Associate in my second year with the increment of 2 lakhs

COGNIZANT TECHNOLOGY SOLUTIONS

Data Engineer

06/2021 to 06/2023

- **Client:** GlaxoSmithKline, Inc.
- **Project:** Glaxosm-Vx Spotlight Engagement
- **Role:** Associate
- **Responsibilities:** Worked on cloning tasks in different environments, like Dev, UAT, and Prod (cloning of tables using Python and SQL scripts).
- Monitored the triggers in Talend for different data products and rectified the errors in daily triggers, if any.
- Implemented some development codes based on the requirements of different projects by using Spark SQL, Python and Azure Databricks.
- I mostly worked on ETL tools, like Azure Databricks.
- **Skills and Technologies:** Python (Programming Language), MS SQL Server, Microsoft Azure Resources, Azure Blob Storage, Azure Databricks and Azure Power BI.

Automation Tester (Intern):

02/2021 to 05/2021

- **Testing:** Automation Testing using Selenium and Java
- **Selenium Technologies:** Maven, TestNG, Cucumber BDD, POM, Apache POI, Extent Report,
- Custom HTML Report, Jenkin
- **Projects:**

Mini Project - (Navigation Commands)

Website Used: Google

Description: First, I must launch the browser, then open the google page, there I must type "Selenium Automation" in search box, after going to the results page I have to use some navigation commands like going to backward, forward and refresh. For this project I used some technologies like POM, Apache POI, TestNG and basic things like taking a screenshot.

Hackathon Project - (Display all the Sports Activities of this weekend)

Website Used: Book My Show

Role: Team Lead

Description: In this project we must automate the Book My Show website. Mainly we have focused on 3 functionalities: Sign in, extracting all the sports details of this weekend and printing all the movie languages. Technologies used in this project are Maven, TestNG, Extent Report, POM, Apache POI, Jenkins, and some other basic things like listeners, taking a screenshot.

Main Project - (User Stories - To Do)

Website Used: Main Spring

Role: Team Lead

Description: In this project we mainly focused on the module called user stories. we mainly focused on Login Functionality, creating a new user story, entering all the details, doing some manipulations in To Do list and searching for our project. Technologies used in this project are Maven, TestNG, POM, Apache POI, Page Factory, Extent Report, Custom HTML Report, Cucumber BDD, and some basic things like listeners and screenshots.
