Outcome-driven full stack developer with 2+ years of experience building scalable, cloud-native applications using React, React Native, Node.js, and AWS. Proven ability to lead end-to-end development of real-time platforms. Passionate about performance optimization, intuitive user experience, and solving real-world problems with clean code.

EXPERIENCE

Onelab Ventures

Software Engineer

June 2023 – Present

Pune, Maharashtra

- Led the development of **Inteli-Doc**, an AI-powered Platform for real-time transcription and summarization of audio meetings. Built a HIPAA compliant Chrome extension as part of the solution, achieving 95% transcription accuracy and reducing manual note-taking effort by 50%. The platform now serves 300+ users and has received strong client feedback for its impact and reliability.
- Engineered Node.js microservices to process 12K+ HL7 SIU/ADT messages per day, enabling real-time appointment syncing and dynamic patient report previews.
- Integrated Azure Blob Storage for secure and scalable handling of audio recordings, enhancing data durability and reducing retrieval latency by 40%.
- Led the implementation of core features in a cross-platform mobile app (Afro-Pay), including push notifications, offline support, and dynamic linking—significantly improving user experience and accessibility.
- Live Projects 🌐 [Inteli-Doc](#) 🌐 [Obyami](#)

MobileFirst Applications

React Developer

Aug 2022 - May 2023

Ahmedabad, Gujarat

- Designed and developed dynamic, interactive web applications using React, resulting in an 11% improvement in page efficiency and user engagement.
- Refactored Redux-based state management and improved component-level performance, reducing re-renders by 25%.
- Wrote unit and integration tests using Jest, increasing code coverage and reducing production bugs.
- Collaborated closely with designers and backend engineers to deliver seamless user experiences across platforms.

PROJECTS

Rev Bus | *React Native, Firebase-Notification, Google Maps API, Socket.io, Native-Modules*

▶ [Preview](#)

- Designed and developed a comprehensive transport management system comprising three Android applications: a user-facing application to view schedules and track buses, an operator app to manage routes, and an admin application for supervision. Integrated a ticketing system, expense tracking modules, and real-time location tracking using Google Maps, significantly improving operational efficiency.
- Used Firebase Cloud Messaging for push alerts and Socket.io for real-time bus location updates.

Tab Tamer | *React, Node.js, JavaScript, Chrome Extensions API, MongoDB*

🔗 [Preview](#)

- Built a Chrome extension for advanced tab management including grouping, session saving, and keyboard shortcuts.
- Enabled cross-device sync and persistent session recovery, boosting productivity for 20+ daily active users.

Real-Time Tic-Tac-Toe Game | *React, Socket.io, Node.js, MongoDB*

🔗 [Preview](#)

- Developed a real-time multiplayer game with persistent user sessions, live leaderboards, and WebSocket-based communication for seamless interaction.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, HTML, CSS

Frontend: React.js, React Native, Next.js, Tailwind CSS, Material UI, Jest, Redux, Zustand

Backend: Node.js, Express.js, REST APIs, Microservices, Socket.io, OAuth, JWT, GraphQL

Tools: Git, GitHub, Docker, CI/CD, Postman, VS Code, Jira, Slack

Database: MySQL, MongoDB

ACHIEVEMENTS

Recognized: Successfully launched the AI medical platform "Inteli-Doc" at Onelab Ventures with 300+ user base.

Web Development: Led development for applications such as Afro-Pay, Beastfitness, Frank Darling and Interior Solutions achieving client satisfaction.

Publications: Articles in Javascript, React, React Native on Medium (Medium Profile).

App Development: Implemented key features in a fitness mobile app leading to 10,000+ downloads and a 4.7+ rating on Play Store Workout App.

Chrome Extension: The Chrome extension featured Tab Tamer improved tab organization and productivity for 20+ users.
