

Objective

Business Analyst with 3+ years of experience in IT Industry. Master's in Computer Science and Bachelor's in Computer Science. Ensured to Build and develop any business relationships vital to the success of the on-going project. Designed, recorded, and executed finalizing client's implementation according to deadlines and within the budget. Seeking an opportunity to bring expertise in analysis and testing of business requirements to drive the deployment of applications, business processes and system solutions.

Skills

Data Visualizations

Tableau(8,9,10), Business Objects, Power BI

Front End

HTML, XML, XSLT

Others

JavaScript, MDX, CSS

Database

Teradata, Oracle, Microsoft SQL, Big Query

Programming Languages

Java, C, PHP, Python

Operating Systems

Linux, Windows

Work Experience

TABLEAU/POWER BI DEVELOPER – Indus Group Inc. - Aug 17 - Present

- Gathered Business Requirements from stake holders, Interacted with the Users, Project Manager and IT teams to get a better understanding of the project goals.
- Performed gap analysis of the data and reviewing the requirements.
- Developing reports for the Quality and Claims team based on the business needs.
- Creating and modifying Business Intelligence analytical reports using Tableau.
- Responsible for creating Metrics, Filters, Calculated fields, parameters using Tableau Desktop.
- Used geographic view which clearly gives the performance of a particular state.
- Extensively used Tableau Web to enable users to run-predefined sales and inventory reports for building their own customized reports.
- Created various actions in database like filter actions to send information to other tableau worksheets and to connect the same in analytical flows, URL actions to connect views of data to external resources and Highlight action to provide rich visual interaction between the views on the sheet.
- Designed business intelligence dashboard using Tableau Desktop and publishing the same on Tableau server, allowing executive management to view current and past performance sales trends, forecast sales, and to track existing customer sales.
- Created Unit Test Cases and documented the Unit Test Results. Conducting the Unit testing of the module to identify the bugs.
- Actively involved in testing new/upgraded features like new Visualizations, Forecasting, Data Blending, Parallelized Dashboard, Hyperlink Objects, Color-coded tabs etc. in Tableau 8 desktop/Server.
- Worked on Performance tuning of report with huge queries using concurrent query execution for better performance of report.
- Responsible for daily communications to management and internal organizations regarding status of all assigned projects and tasks.
- Use MS Excel, Word, Access, and Power Point to process data, create reports, analyze metrics, implement verification procedures, and fulfill client requests for information.

TABLEAU DEVELOPER/DATA ANALYST – Randstad LTD, Client: Google- July 12- Dec 15

- Worked on the project that involved testing and implementation of a data warehouse.
- Responsible for testing process of extracting, transforming, and loading data from oracle, flat files and placing it into data warehouse.
- Analyzed and tested the mappings using Informatica.
- Interacted with the management to gather sources and their requirements.
- Involved in some part of performance tuning.
- Tested simple and complex mappings using Informatica to load dimensions and fact tables as per STAR schema techniques.
- Involved in defining the whole project life cycle, following agile methodology. Analyzed business requirements and segregated them into high level and low level priorities.
- Created reports and visualizations for the financial and sales team, and helped the team in fixing the data discrepancies.
- Developed complex queries in Teradata and Oracle to meet the business requirements and to extract the data in to Tableau.
- Found innovative ways to design graphs and charts visually exciting, and aesthetically pleasing, while at the same time maintaining the accuracy of the core information content that is being communicated.
- Created complex dashboards on YTD, QTD, MTD data to provide powerful insight of the Sales and Financial metrics.
- Extensively used data blending, embed functionalities in Tableau.
- Responsible for query performance tuning.
- Creating logical calculation and calculated fields where ever needed.
- Created various business metrics, filters and parameters for the reports using Tableau desktop.
- Created various actions on the dashboards for dynamic and interactive view of the reports.
- Developed business dashboards using Tableau desktop and published on the Tableau server and setting access privileges to the business users and stake holders.
- Restricted data for Particular users using row level security and user filters.
- Scheduled frequency and time to refresh data when sources are published or extracted to server.
- Worked on Performance tuning of report with huge queries using concurrent query execution for better performance of report.
- Bug fixes during unit testing and system testing.
- Supported the published reports and responsible for all the technical documentation.
- Extracted reports from Business Objects and migrated the data to Tableau reports.
- Responsible for daily communications to management and internal organizations regarding status of all assigned projects and tasks.
- Prepared project reports for management and assisted the project manager in the development of weekly and monthly status reports, policies and procedures.
- Prepared project reports for management and assisted the project manager in the development of weekly and monthly status reports, policies and procedures.
- Worked on the project that involved testing and implementation of a data warehouse.
- Responsible for testing process of extracting, transforming, and loading data from oracle, flat files and placing it into data warehouse.
- Analyzed and tested the mappings using Informatica.
- Interacted with the management to gather sources and their requirements.
- Involved in some part of performance tuning.
- Tested simple and complex mappings using Informatica to load dimensions and fact tables as per STAR schema techniques.

Education

MASTERS IN COMPUTER SCIENCE – Fairleigh Dickinson University, Teaneck, New Jersey- 2015-2017

BACHELORS IN COMPUTER SCIENCE- Jawaharlal Nehru University, Hyderabad, India - 2008-2012
