
Full-stack software engineer passionate about building efficient, impactful solutions. Skilled at tackling challenges, exploring new technologies, and enhancing user experiences. Eager to contribute to innovative projects and grow as a developer.

EDUCATION

- Purdue University - *Masters in Computer Science* | GPA: 4.0/4.0 Aug 2024 - May 2026
 - Osmania University - *Bachelors in Computer Science* | GPA: 4.0/4.0 May 2021
-

SKILLS

- Languages:** • Java • Python • JavaScript/TypeScript • C • C++ • PHP
 - Frameworks & Libraries:** • React • Node.js/Express • Django • MUI • Bootstrap
 - Databases & Caching:** • MySQL • MongoDB • Redis • Firebase
 - Developer Tools & Platforms:** • GitHub • Bitbucket • Jenkins • Jira • Postman • Azure Servers
 - Other Skills:** • REST APIs • Full-stack web development • Containerized deployments • Agile/Scrum • SDLC
-

PROFESSIONAL EXPERIENCE

TEACHING ASSISTANT – PROGRAMMING LANGUAGE DESIGN

Spring 2025

PURDUE UNIVERSITY

- Assisted professor in delivering course material for **40+ students**, clarifying concepts during labs and tutorials.
- Graded assignments and provided constructive feedback, improving student learning outcomes.
- Supported course administration, including preparing teaching materials and coordinating student queries.

SOFTWARE ENGINEER

Apr 2021 - Aug 2024

PRODAPT

- Developed and deployed high-performance C++ microservices for encryption and randomization, strengthening data privacy and operational safety in telecom systems.
- Designed and implemented a centralized infrastructure management tool, reducing manual effort by 30% and automating invoicing and approval workflows across projects.
- Automated raw data processing with stored procedures to encrypt sensitive fields and generate structured CSV outputs, creating a fully independent, zero-intervention pipeline.
- Enhanced system security and reliability by integrating enterprise-grade authentication, leading root cause analysis to cut downtime by 40%, and reducing unauthorized access by 35%.
- Migrated legacy infrastructure to Azure with CI/CD pipelines, automated server upgrades, and hotfix deployments, reducing deployment time by 45% and enabling secure cloud operations.
- Collaborated directly with clients to gather requirements, estimate LOE, and deliver timely, aligned solutions that earned repeat engagements.

VOLUNTEER

Aug 2018 - May 2021

COMPUTER SOCIETY OF INDIA

- Led 5+ coding workshops and 2 hackathons for university students, reaching over 200 participants.
 - Mentored peers on project development and problem-solving during CSI events.
 - Supported CSI initiatives by ensuring well-organized events, effective outreach, and successful execution
-

PROJECTS

ATTENDANCE TRACKING SYSTEM - <https://attendance-tracking-weba-f327c.web.app/login>

Fall 2024

- Built a **QR code-based attendance system** using React, Firebase, and MUI, enabling instructors to track student attendance and generate class/student reports.
- Improved instructor efficiency by **80%** through automation and real-time reporting.

CAMPUS MART - <https://campusmart-purdue.vercel.app/>

Fall 2024

- Developed a **student marketplace** for Purdue University using React, MongoDB, and Cloudinary.
- Designed seamless product listing and search functionality, supporting a user-friendly e-commerce experience.

ARTIFICIAL INTELLIGENT VOICE ASSISTANT

Jan 2021-May 2021

- Implemented a Python-based voice assistant leveraging speech-to-text and GTTS for audio playback.
 - Engineered customizable command functionality using Python, enabling users to automate 50+ routine tasks and personalize interactions, which reduced processing time by 40% and improved user satisfaction
-

ACHIEVEMENTS AND CERTIFICATIONS

- Winner, Coding Competition – Osmania University Technical Fest (100+ participants)
- Machine Learning Certification – [Kaggle, 2025]
