

Ayesha Balkrishna Shetty

Boston, MA | 857-397-5084 | shetty.aye@northeastern.edu | [LinkedIn](#)

EDUCATION

Northeastern University, Boston, MA 2024

Master of Science in Quantitative Finance

Relevant courses: Fintech, Data Analytics in Finance, Financial math and Financial markets, Corporate Finance, Investment Analysis.

Xavier Institute of Engineering, University of Mumbai, Mumbai, India. 2021

Bachelor of Engineering in Computer Science

EXPERIENCE

Infosys Ltd, India 2021 - 2023

System Engineer

- Executed multiple projects as a Technology Analyst for Oracle HCM.
- Conducted comprehensive Azure testing in DbVisualizer, leveraging Oracle technology to meticulously assess a diverse range of test cases.
- Collaborated with DHL Supply Chain to conduct System Integration Testing (SIT), ensuring the robustness and reliability of implemented solutions.
- Engaged in end-to-end business process flow analysis for Kroger, utilizing DbVisualizer to enhance the technical team's efficiency.
- Led a dedicated team for DHL Supply Chain's SIT testing project, ensuring adherence to project timelines and quality standards.
- Recognized for exceptional contributions and awarded two promotions, transitioning from Trainee Engineer in 2021 to System Engineer in 2022

PROJECT MANAGEMENT AND PRODUCTIVITY TOOLS

- **MATLAB**
- **Web Technologies:** HTML, JavaScript
- **Programming language :** Python, R, C++
- **Database Management System DBMS**
- Microsoft Office: Excel, Word, Powerpoint

PROJECTS AND PUBLICATIONS

- **Compare various investing strategies using Python:** 2024
 1. Buy-and-Hold the SPY Exchange-Traded Fund(ETF).
 2. Hold SPY Intraday only.(buy at open and sell at close)
 3. Hold SPY overnight only.(buy at close and sell at open)
 4. Buy-and-Hold SPY except for worst n days and best n days each year, where $n \in 1,2,3$
- **The Values & Risks of Investor Judgement: A Comparison of the Markowitz & Black-Litterman Models** 2023

Explored the value and risk of considering an investor's perspective in a portfolio optimization model by comparing the Markowitz Mean-Variance and Black-Litterman Models in **MATLAB**.
- **Customer Purchase analysis on E-Commerce using Ensemble learning | XGBoost, Light Gradient Boosting and Logistic Regression, Jupyter** 2021

Analysed human behaviour of customers by creating a database with all the factors affecting customer purchasing decisions and using ensemble learning technique for analysis and accuracy.
- **Autocomplete Using NLP | Natural Language Processing (TFIDF Vectorizer, Ranking Function)** 2021

Utilized NLP techniques, including TFIDF Vectorizer, to analyse user-typed words' frequency and employed a Ranking Function to predict and suggest supportive words and phrases during typing.
- **Fake News Detection Using ML | NLP(TFIDF Vectorizer, Multinomial Bayes) and PYTHON Modules(Flask, Pickle)** 2020

Developed a Fake News detection system utilizing natural language processing techniques, including TFIDF Vectorizer and Multinomial Bayes, to analyse news articles extracted from a website, determining their authenticity and classifying them as fake or real, with results stored using Pickle.

CERTIFICATION

- Python DataCamp Certifications 2024
- MATLAB Onramp Certification from MathWorks 2023
- Excel SSC Advance certification from Certipoint quality assessment 2022

SKILLS

- Proficient in analysing financial data
- Proficient in identifying trends
- Strong statistical and calculus skills.
- Translating insights into strategic recommendations
- Strong written and verbal communication skills.
- Hands-on experience on Python.

EXTRA-CURRICULAR ACTIVITIES

- Head of Department for the Blog IT Committee for College cultural event.
- Beach cleaning on World Environment Day.
- Hosted the Induction program for Women's Development Cell.
- Part of the Finance team in Northeastern 's Sanskriti team.
