

ASEEF BASHA SHAIK

Data Analyst

Dallas, TX | 940-843-3650 | aseefbasha01@gmail.com |

SUMMARY

Data Analyst with **over 4 years** of experience in **data processing, dashboard development, and workflow automation** across **healthcare, energy, and IT** sectors. Skilled in **Python, SQL, Power BI, Tableau, and Snowflake** for building **data pipelines**, conducting **trend analysis**, and supporting **cross-functional reporting**. Experienced in **Agile settings** with **Jira and Confluence**, emphasizing **data integrity, governance standards, and operational insight generation**.

EXPERIENCE

Data Analyst / Data Engineer | Molina Healthcare | Dallas, TX July 2024 – Current

- Engineered reusable **data pipelines** using **Snowflake, DBT, and Python**, integrating **4 clinical systems** to automate claims workflows and reducing manual processing by **12 hours/week** for the care coordination team.
- Synthesized and profiled **250,000+ patient records** with **SQL and Pandas**, performing anomaly detection and root cause analysis to resolve data quality issues across **3 operational departments**.
- Designed and deployed **5 Power BI dashboards** by collaborating with compliance and medical stakeholders, improving visibility into risk scores and enabling faster decision-making across **2 review cycles**.
- Standardized schema definitions across **4 data sources** and parsed log files using **Python (Regex, Seaborn)**, uncovering **3 recurring service failures** and reducing QA feedback delays by **3 workdays per report** through governance alignment and SLA improvements.

Data Analyst | Adani Group | India December 2020 – July 2022

- Integrated multi-source infrastructure and energy data using **Excel and SQL** from **5 regional units**, supporting project tracking and powering daily dashboards.
- Developed and maintained **Tableau dashboards** visualizing **100+ KPIs** across logistics, operations, and procurement, expediting monthly stakeholder reporting cycles.
- Streamlined inventory reconciliation workflows with **Python (Pandas, NumPy)**, reducing manual tasks by **8 hours/week** and improving data accuracy across **3 supply systems**.
- Coordinated cross-functional validation for **5 datasets** with engineering, finance, and warehouse teams, enabling real-time tracking of material movement across units.
- Diagnosed **12 data discrepancies** in energy consumption reports through **trend analysis**, resulting in corrected billing across **3 industrial accounts**.
- Built structured **ETL workflows** in **Excel and SQL** to consolidate power logs from **6 generation sites** and used **Tableau Prep** to process **300+ procurement records** for quarterly vendor evaluations.

Data Analyst | Trigent Software | India August 2019 – November 2020

- Extracted and transformed complex **inventory datasets** using **SQL and Python (Pandas, NumPy)**, enabling accurate tracking of **15,000+ SKUs** across warehouse systems.
- Designed and published **10 interactive Power BI dashboards**, equipping business teams with **real-time insights** to improve procurement and stock turnover analysis.
- Constructed **ETL workflows** by integrating **AWS S3, Lambda, and MySQL**, reducing data refresh intervals by **6 hours** and improving downstream report availability.
- Collaborated with product and operations teams to identify reporting gaps, documenting **40+ data anomalies** and driving resolution through structured **data validation checks**.

PROJECTS

Healthcare Utilization Analysis

- Orchestrated the transformation of **200,000+ patient visit records** using **Python (Pandas)** and **SQL**, uncovering care delivery patterns and enhancing data accessibility for clinical teams; **constructed 4 Power BI dashboards** to track operational KPIs, accelerating reporting cycles by **6 hours/week** and guiding strategy for **50+ healthcare stakeholders**.

Energy Consumption Auditing

- Diagnosed 15 anomalies across **350,000 smart meter logs** using **SQL and Excel audits**, which triggered financial corrections across **3 enterprise clients** and informed load pattern analysis.

Supply Chain Inventory Optimization

- Engineered automated reconciliation pipelines using **Python (NumPy)** and **DBT**, reducing validation effort by **8 hours/week** across **3 interconnected supply systems**; **unified inventory, procurement, and logistics data** from **5 units** in **MySQL**, enabling continuous forecasting and minimizing order delays across **2 warehouse hubs**.

TECHNICAL SKILLS	
Programming & Scripting:	Python (Pandas, NumPy, Regex), SQL (Joins, CTEs, Window Functions), Shell Scripting
Data Analysis & Processing:	DBT, Snowflake, Excel (Pivot Tables, Charts, VLOOKUP), Trend Analysis, Reconciliation
Visualization & Reporting:	Power BI (DAX, Data Modeling), Tableau, Tableau Prep
ETL & Data Engineering:	Informatica, Python ETL Scripts, AWS Glue, DBT Pipelines
Databases & Warehousing:	MySQL, SQL Server, Snowflake
Cloud Platforms:	AWS (S3, Lambda, Glue), Familiarity with Azure (optional if mentioned)
Data Management & Governance:	Data Cleaning, Auditing, KPI Definition, Metadata Standardization
Automation & Scheduling:	Python Automation Scripts, Job Scheduling, Data Extraction Workflows
Project Tools & Collaboration:	JIRA, Confluence, Agile (Scrum), Stakeholder Documentation
Domain Expertise:	Healthcare Analytics, Energy Consumption Monitoring, Supply Chain & Inventory Systems

EDUCATION	
University of North Texas Denton, TX	August 2022 – May 2024
Master of Science in Data Science	
Loyola Academy Degree & PG College Telangana, India	April 2016 – June 2019
Bachelor of Science in Computer Science
