WORK EXPERIENCE

Acuity Business Analyst	Remote, US May 2023 - Present
--	--

Streamlined e-commerce and sales operations by integrating Salesforce, optimizing data accuracy, automation, and real-time analytics for enhanced decision-making in the housing industry.

- Led the complete **data migration** from an in-house e-commerce system to Shopify, ensuring seamless customer **data transfer**, order history synchronization, and payment integration, improving operational efficiency and reducing downtime
- Migrated and consolidated sales and customer data from **Salesforce** to Shopify, utilizing **Python (Pandas, NumPy)** and **SQL** to clean, standardize, and validate records, ensuring **99.9%** data accuracy and preventing data duplication
- Utilized **Microsoft Excel** to **analyze project data, create complex spreadsheets**, and **develop models** for forecasting project outcomes, enhancing decision-making processes
- Designed sales territory mapping and resource allocation models using **Python (Scikit-Learn)** and **Power BI**, optimizing sales lead distribution and improving sales team performance through **data-backed** insights.
- Utilized project management tools like **JIRA**, Confluence, and **MS Project** to track progress, manage risks, and ensure transparency
- Automated sales lead allocation pipelines by implementing Salesforce Workflows, reducing manual effort by **70%** and enhancing response time for high-priority leads.
- Developed interactive sales performance dashboards in **Power BI**, integrating Salesforce data to provide real-time insights into revenue trends, customer behavior, and lead conversion rates, empowering stakeholders with data-driven decision-making

ADALGO DIGITAL MEDIA PVT. LTD Marketing Data Analyst	Delhi, India Oct 2021 - Aug 2022
---	---

Client: Mama Earth, India

Leveraged data analytics to uncover sales trends, optimize customer segmentation, conduct A/B testing, develop real-time dashboards, and forecast inventory demand, driving data-informed marketing and business strategies.

- Centralized customer and sales data from multiple platforms, enabling seamless performance tracking and improving data accessibility.
- Engineered customer segmentation models in **Salesforce CRM** and **Python**, driving personalized marketing strategies and increasing customer retention by **15%**
- Optimized digital campaign performance through **A/B testing** in **Google Analytics** and **SQL**, **boosting ROAS** by **12%** and reducing customer acquisition costs by **30%**
- Designed real-time **Power BI** dashboards, providing leadership with instant campaign insights and cutting strategy turnaround time by **25%**
- Applied demand forecasting models in **Python**, reducing stockouts by **35%** and improving inventory efficiency to match sales demand

PROJECTS

Superstore Sales Analysis - [GITHUB LINK](#)

- Consolidated and cleaned 10K+ sales records using Pandas, SQLAlchemy, and Pymysql, eliminating 98% of duplicates and standardizing data for accurate trend forecasting and market segmentation.
- Enhanced revenue intelligence by crafting 30+ advanced SQL queries in MySQL Workbench, uncovering high-performing products, pricing trends, and consumer purchasing behavior, leading to improved product insights and better revenue optimization.
- Developed a real-time Tableau dashboard to automate sales performance tracking, cutting manual reporting by 70%, accelerating sales forecasting accuracy by 40%, and reducing executive decision turnaround time by 50%.
- Enhanced sales strategy, inventory management, and targeted marketing using data-driven insights while automating data ingestion and reporting with Python and SQL

BeanTrack: Coffee Sales Performance Analysis - [GITHUB LINK](#)

- Engineered a Power BI dashboard processing 149K+ sales transactions, enabling real-time revenue analysis, demand forecasting, and performance tracking, improving forecast accuracy by 45%.
- Optimized sales trend analysis by designing a custom Date Table, ensuring data consistency, seasonality insights, and promotional impact measurement, reducing reporting discrepancies by 22%.
- Developed interactive visualizations to accelerate stakeholder insights, cutting data refresh times by 60%, reducing query resolution, and enhancing decision-making across 10+ retail locations.

SKILLS

- **Databases:** MySQL, PostgreSQL (pgAdmin 4)
- **Programming Languages:** Python (NumPy, Pandas, Matplotlib, Scikit-learn), R (dplyr, ggplot2), Power Query, DAX
- **Tools & Platforms:** JIRA, Google Analytics, Shopify
- **Data Visualization:** Power BI, Tableau, Excel
- **Machine Learning:** Supervised ML (Linear and Logistic Regression, RF, Xgboost), Unsupervised ML (K-means, PCA), Hypothesis Testing, Classification techniques (binary classification, multi-class classification), A/B testing

EDUCATION

- **NORTHEASTERN UNIVERSITY** **Boston, US**
MS in Data Analytics Engineering **Sep 2022 - May 2024**
- **UNIVERSITY OF MUMBAI** **Mumbai, India**
B.E. Electronics & Telecomm Eng **Aug 2018 - May 2022**
