Summary

Results-focused Data Analyst with over 3 years of experience extracting, analyzing, and visualizing data to drive business success in retail, logistics, and digital commerce. Proven ability to use advanced tools like Python, SQL, Tableau, and Power BI to identify trends, solve complex problems, and present data clearly to non-technical stakeholders. Adept at working independently and with cross-functional teams to automate workflows, build dashboards, and support strategic decision-making. Passionate about using data to improve customer experience, reduce costs, and uncover hidden opportunities.

Skills

- **Programming & Data Analysis:**
Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (PostgreSQL, MySQL, BigQuery), R (basic), Excel (advanced formulas, VBA)
- **Data Visualization:**
Tableau (interactive dashboards, storytelling), Power BI, Excel Charts, Looker Studio
- **Database & Data Engineering:**
SQL Server, Snowflake, Google BigQuery, ETL pipelines, dbt (basic knowledge), Apache Airflow (workflow scheduling)
- **Machine Learning & Statistics:**
Regression (linear/logistic), Clustering (K-Means, DBSCAN), A/B testing, Forecasting (ARIMA, Prophet), Hypothesis testing
- **Data Wrangling & Reporting Automation:**
Web scraping (BeautifulSoup, Selenium), REST API integration, batch data pipelines, automated reporting with Python & SQL
- **Cloud Tools & Platforms:**
AWS (S3, Athena), Google Cloud Platform (BigQuery, Cloud Functions), Streamlit
- **Collaboration Tools:**
Git, Jupyter, VS Code, Trello, Notion, Confluence, Slack, Zoom
- **Soft Skills:**
Communication, cross-functional collaboration, business acumen, presentation, critical thinking, stakeholder alignment

Experience

Data Analyst - Infocons Inc (Dallas City, TX)

June 2024 - May 2025

- Developed and maintained 20+ custom dashboards in Tableau and Power BI for executive leadership, operations, marketing, and supply chain teams.
- Conducted cohort and funnel analysis on over 3 years of customer

data to identify lifetime value (LTV) drivers, resulting in a 22% increase in customer retention.

- Built product performance models to determine profitability and recommend SKU rationalization, reducing unprofitable SKUs by 18%.
- Partnered with the engineering team to optimize data pipelines, reducing query time by 40% for large datasets (5M+ rows).
- Led the initiative to build a weekly revenue forecast using historical sales and time series models (ARIMA), improving forecast accuracy from 70% to 87%.
- Created and documented a company-wide data dictionary and best practices guide to improve data literacy across teams.

Junior Data Analyst - Six Pvt Ltd (Hyderabad, Telangana)

October 2020 - July 2022

ABC Logistics is a supply chain provider serving retail and e-commerce clients in the Northeast U.S.

- Used SQL and Excel to analyze delivery performance, truck routes, and warehouse operations across five distribution centers.
- Identified high-latency delivery zones and proposed alternate shipping routes, decreasing delivery times by 15%, and saving ~\$80K annually in fuel costs.
- Created daily and weekly reports for senior operations leadership to monitor KPIs, like delivery success rate, average load time, and package accuracy.
- Performed root cause analysis on delayed shipments; surfaced vendor issues that led to process changes, and a 12% increase in SLA compliance.
- Cleaned and normalized raw logistics data from CSV and API-based sources for integration into BI dashboards.

Additional Contributions:

- Built an Excel-based dynamic route cost calculator tool, adopted by logistics planners.
- Mentored two interns on SQL basics and helped train new analysts on internal reporting standards.

Education and Training

Master of Science in Information Technology

May 2024

Northern Arizona University, Flagstaff, AZ
