

BALA PRASOON

North Andover, MA, USA (Open to Relocate) | +1 (603) 512-5779 | balaprasoon1311@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of experience in data visualization, analytics, and automation, using Power BI, Tableau, SQL, and Python to deliver actionable insights. Experienced in AI/ML-based predictive analytics, data modeling, and KPI reporting, driving measurable process efficiency and smarter business decisions. Skilled in turning complex datasets into clean, visual, and business-ready insights that enhance operational performance.

SKILLS

- **Visualization & BI Tools:** Power BI, Tableau, Excel (Power Query, Pivot Tables, VBA, Dashboard Automation)
- **Databases:** SQL Server, MySQL, PostgreSQL, Azure SQL Database
- **Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib), DAX, SQL Joins, LOD Expressions, Data Wrangling, Exploratory Data Analysis (EDA)
- **AI & Machine Learning:** Predictive Modeling, Regression & Classification, Time Series Forecasting, NLP (Sentiment Analysis), Feature Engineering, Model Validation, and Performance Tuning
- **ETL & Data Processing:** Power Query, Alteryx, SSIS, Excel Macros, Data Cleaning, Data Transformation, and Automation Scripts
- **Reporting & BI:** KPI Dashboards, Data Modeling, Trend & Variance Analysis, Business Forecasting, and Data Storytelling
- **Cloud & Automation:** AWS, Azure Data Studio, Google BigQuery, Power Automate, SharePoint Integration
- **Version Control & Workflow:** GitHub, Jira, ServiceNow, Agile Environments

EXPERIENCE

- Data Analyst**
Team Wave Tech Inc., USA

Jun 2024 - Current

 - Designed and maintained Power BI dashboards for sales, operations, and profitability reporting, using DAX, data modeling, and incremental refresh to improve performance and user adoption by 25%.
 - Extracted, cleaned, and transformed large datasets from SQL Server and Azure SQL using joins, stored procedures, and views, ensuring consistent data definitions and reducing reporting mismatches by 18%.
 - Developed predictive models in Python (Scikit-learn, Pandas, NumPy) for sales forecasting and customer churn analysis, fine-tuning model accuracy by 15% and integrating outcomes into BI dashboards.
 - Applied NLP and sentiment analysis on customer feedback datasets using TextBlob and NLTK, identifying satisfaction patterns and embedding insights into Power BI for management visibility.
 - Automated data ingestion, refresh cycles, and quality validation using Power Query and Power Automate, saving roughly 6–8 hours weekly in recurring report preparation.
 - Conducted routine data validation, cross-source reconciliation, and anomaly detection across Azure, ERP, and CRM systems, achieving above 98% accuracy in business reports.
 - Collaborated with business, data science, and finance teams to interpret AI-driven outcomes, align insights with key KPIs, and support quarterly strategic planning and performance reviews.
- Business Data Analyst**
Innovor Digital, India

Jun 2021 - Jul 2022

 - Built interactive Tableau dashboards for campaign analysis and sales performance tracking, reducing manual reporting requests.
 - Cleaned, reshaped, and analyzed large datasets in Python using Pandas and NumPy to support dashboard metrics and quarterly performance studies. And optimized SQL queries in PostgreSQL to merge sales, marketing, and CRM datasets.
 - Created calculated fields, parameters, and LOD expressions to enhance dashboard interactivity and enable deep trend analysis.
 - Established quality checks and data audit scripts that improved data consistency and reduced duplication in regional datasets.
 - Automated Tableau data extracts and refresh cycles, reducing refresh delays and improving dashboard availability to 99%.
 - Partnered with marketing and finance leads to translate data findings into actionable insights, driving 10% improvement in campaign ROI measurement accuracy.
- Junior Data Analyst**
Clarion Technologies, India

Jul 2020 - Jun 2021

 - Created Excel dashboards using Pivot Tables and Power Query for sales and inventory teams, improving daily tracking efficiency.
 - Supported ETL data flows using SSIS and Alteryx to automate imports from CRM, ensuring timely data availability for analysis and Built SQL scripts for ad-hoc reporting and performed data validation to detect inconsistencies across monthly reports.
 - Developed macros to automate report generation, saving 3–4 hours per week for the operations team.
 - Conducted variance and trend analysis to identify production inefficiencies and presented findings to management.
 - Cleaned and standardized raw data for consistency across regions and departments, reducing manual rework during audits.
 - Maintained documentation of all data sources, mapping rules, and workflows, improving onboarding efficiency for new analysts.

EDUCATION

- Masters in computer science**
Rivier University

Sep 2022 - May 2024
NH, USA
- Bachelor in civil engineering**
Institute of Aeronautical Engineering College

Aug 2018 - Jun 2022
India
