

# BALAJI GONIGUNTLA

SQL Developer

Email: goniguntlabalaji@gmail.com | LinkedIn | Phone: +1 (314)-783-6888 | Location: USA

## SUMMARY

- Experienced SQL Developer with 3.5 years of expertise in designing, developing, and optimizing database solutions across finance, healthcare, and compliance industries.
- Proficient in SQL, Python, and R, with expertise in PostgreSQL, SQL Server, MySQL, and Snowflake, ensuring efficient data storage, retrieval, and analysis.
- Skilled in leveraging cloud technologies, including AWS RDS, Azure SQL Database, and Google Cloud SQL, to deliver scalable and secure data processing solutions.
- Hands-on experience in building and automating ETL pipelines using Apache Nifi, Airflow, and Talend to streamline data workflows and improve operational efficiency.
- Strong knowledge of query optimization techniques, such as indexing, partitioning, and performance tuning, to enhance system performance and data analytics.
- Proficient in data analytics and reporting using Power BI, Tableau, and Looker, delivering actionable insights and facilitating informed business decisions.
- Expertise in data security and compliance, including GDPR and HIPAA, with practical experience implementing encryption techniques and role-based access control (RBAC).
- Experienced in scripting and automation using Python and PowerShell, ensuring data processing efficiency and integrity.
- Skilled in utilizing DevOps tools, including Git, Jenkins, Docker, and Kubernetes, to support CI/CD pipelines and deployment processes.
- Collaborative team player with strong problem-solving and analytical skills, working within Agile and Scrum methodologies to deliver high-impact data solutions.
- Committed to continuous learning with certifications such as Microsoft Certified: Azure Data Engineer Associate and Power BI Data Analyst Associate.

## SKILLS

- **Programming Languages:** SQL, Python, R
- **Database Management Systems:** PostgreSQL, SQL Server, MySQL, Snowflake
- **Cloud Technologies:** AWS RDS, Azure SQL Database, Google Cloud SQL, Snowflake
- **ETL Tools:** Apache Nifi, Airflow, Talend
- **Data Warehousing:** Snowflake, Redshift, Synapse Analytics
- **Query Optimization:** Indexing, Partitioning, Execution Plans, Performance Tuning
- **Data Analytics & Reporting:** Power BI, Tableau, Looker
- **Data Security & Compliance:** Role-Based Access Control (RBAC), Encryption Techniques, GDPR, HIPAA
- **Scripting & Automation:** Python, PowerShell
- **DevOps & CI/CD:** Git, Jenkins, Docker, Kubernetes
- **Project Management & Methodologies:** Agile, Scrum
- **Big Data Technologies:** Spark, Kafka
- **Soft Skills:** Analytical Thinking, Problem-Solving, Communication, Collaboration
- **APIs & Integration:** RESTful APIs, JSON, ODBC

## WORK EXPERIENCE

JPMC

August 2024 – Present

SQL Developer

- Developed and optimized complex SQL queries in Snowflake and PostgreSQL to support the Real-Time Fraud Detection System, enabling rapid identification of fraudulent transactions with minimal latency.
- Designed and implemented ETL pipelines using Apache Nifi and Airflow to automate real-time data ingestion from multiple payment sources, ensuring seamless processing and integration.
- Applied indexing, partitioning, and performance tuning techniques to optimize query execution and improve the efficiency of fraud detection algorithms.
- Collaborated with cross-functional teams to integrate Tableau and Looker dashboards, providing real-time visualization of fraudulent activities and transaction trends for stakeholders.
- Ensured data security and compliance by implementing role-based access control (RBAC), encryption techniques, and aligning with GDPR and HIPAA regulatory requirements.

Infosys

April 2020 – February 2022

SQL Developer

- Developed and maintained the Healthcare Analytics Dashboard, leveraging SQL, PostgreSQL, and Snowflake to provide real-time insights into patient outcomes, treatment efficiency, and regulatory compliance.

- Designed and optimized complex SQL queries, implementing partitioning and performance tuning techniques to enhance query efficiency and data retrieval speed.
- Built and automated ETL pipelines using Apache Nifi and Airflow to streamline data ingestion from multiple healthcare data sources, ensuring seamless integration and compliance with HIPAA regulations.
- Collaborated with cross-functional teams to create Power BI, Tableau, and Looker dashboards, offering actionable insights for healthcare professionals and stakeholders.
- Implemented encryption techniques and role-based access control (RBAC) to safeguard sensitive patient data and ensure compliance with GDPR and HIPAA standards.
- Developed Python scripts for automated data validation, improving data accuracy and consistency across healthcare systems.
- Deployed cloud-based solutions using Azure SQL Database and Google Cloud SQL to ensure scalability and high availability of analytics solutions.
- Applied Agile and Scrum methodologies to manage project timelines, track progress, and ensure efficient collaboration across teams.
- Integrated RESTful APIs and JSON data sources to enhance data interoperability and provide seamless communication between EMR systems and analytical platforms.

**IBM**

**March 2019 – March 2020**

#### **SQL Developer**

- Developed and implemented SQL-based data audit frameworks for the GDPR Compliance Data Audit, ensuring compliance with regulatory requirements by applying encryption techniques and access control mechanisms.
- Optimized SQL queries and indexing strategies to enhance the performance of compliance data retrieval processes, reducing query execution times and improving audit efficiency.
- Designed and deployed role-based access control (RBAC) models in SQL Server to restrict data access and enforce GDPR data protection policies across multiple business units.
- Automated data validation and auditing workflows using PowerShell and Talend ETL tools, ensuring consistent data quality and adherence to compliance standards.
- Integrated AWS RDS and Redshift data warehousing solutions to centralize sensitive customer information, providing secure storage and easy access for regulatory reporting.
- Collaborated with cross-functional teams to develop Power BI and Tableau reports, offering actionable insights into compliance status and risk assessment.
- Managed version control and deployment processes using Git and Jenkins, ensuring smooth rollout of compliance-related updates while adhering to Agile and Waterfall methodologies.

## **PROJECTS**

#### **Credit Risk Assessment Model**

Tools & Technologies: PostgreSQL, Azure SQL Database, Python, Tableau, RESTful APIs

- Developed complex SQL queries and stored procedures in PostgreSQL and Azure SQL Database to analyze borrower profiles and automate credit scoring processes.
- Designed interactive Tableau dashboards to visualize risk factors and lending patterns, enabling data-driven decision-making for credit approvals.
- Integrated RESTful APIs to fetch real-time credit score data from third-party providers, ensuring comprehensive risk assessment.

#### **Compliance and Regulatory Reporting**

Tools & Technologies: MySQL, Jenkins, PowerShell, Redshift, Agile

- Implemented data processing workflows in MySQL and Redshift to automate compliance reporting, ensuring adherence to regulatory standards such as GDPR and HIPAA.
- Developed PowerShell scripts for automated data extraction, transformation, and loading (ETL) tasks, improving efficiency in report generation.
- Collaborated with stakeholders using Agile methodologies to iteratively refine reporting frameworks and meet evolving compliance requirements.

## **EDUCATION**

#### **Master of Science in Engineering**

**Aug 2022 – May 2024**

Saint Louis University, MO | **CGPA:** 3.6/4

#### **Bachelor of Computer Engineering |**

**March 2016 - March 2020**

New Horizon College of Engineering, Bangalore | **CGPA:** 7.26/10.0

## **CERTIFICATIONS**

- Microsoft Certified: Azure Data Engineer Associate
- Advanced SQL Server Development Certification
- Power BI Data Analyst Associate
