

BalaRamaKrishnaKantipudi

Atlanta,GA| +13367098781| bkrishnakantipudi@gmail.com

PROFESSIONALSUMMARY

Results-driven C# .NET Engineer with 4+ years of experience developing scalable enterprise applications using .NET Framework/.NET Core, ASP.NET MVC, and WPF. Proven expertise in full-stack development, automated testing, and MVVM architecture with a track record of improving application performance by 40% and reducing deployment time by 60%. Strong background in object-oriented programming, database design, and Agile methodologies.

TECHNICALSKILLS

Programming Languages:C# (Advanced), VB.NET (Intermediate), F# (Familiar), TypeScript, JavaScript, SQL, T-SQL
.NETTechnologies:.NETFramework4.5-4.8,.NETCore3.1/.NET5+,ASP.NETMVC,ASP.NETWebAPI,.NET Standard
Frameworks& Libraries:Entity Framework, Entity Framework Core, LINQ, ADO.NET, AutoMapper, Newtonsoft.Json
Desktop Development:WPF (Windows Presentation Foundation), MVVM Pattern, XAML, Windows Forms, Prism Framework
WebTechnologies:ASP.NETCoreMVC,RazorPages,HTML5,CSS3,Bootstrap,jQuery,Ajax,SignalR
Cloud&DevOps:MicrosoftAzure(AppServices,SQLDatabase,BlobStorage),AzureDevOps,Docker,Git,CI/CD
Databases:SQLServer2016-2022,PostgreSQL,MySQL,Redis(Caching),AzureSQLDatabase
Testing&Quality:UnitTesting(xUnit,NUnit,MSTest),IntegrationTesting,MoqFramework,Test-Driven Development (TDD)
Development Tools:Visual Studio 2019/2022, Visual Studio Code, ReSharper, SQL Server Management Studio, Postman
Methodologies:Agile/Scrum,SOLIDPrinciples,DesignPatterns(Repository,Factory,Singleton),CleanArchitecture

PROFESSIONALEXPERIENCE

Senior.NETDeveloper <i>OrbitalIT</i>	Jan2025–Present <i>Atlanta,GA</i>
- Architected and developed enterprise-level financial reporting system using .NET 6, ASP.NET Core MVC, and EntityFrameworkCore,supporting1M+dailytransactions with 99.9% uptime and sub-200ms response times - Designed and implemented RESTful APIs with comprehensive Swagger documentation, enabling seamless integration with 15+ external services and reducing integration time by 50% - Built responsive WPF desktop application using MVVM pattern and Prism framework, improving user productivity by 45% through intuitive data visualization and real-time updates via SignalR - Optimized complex SQL queries and implemented efficient database indexing strategies, resulting in 60% improvement in query performance and reducing server load - Established comprehensive testing strategy using xUnit and Moq, achieving 85% code coverage and reducing production bugs by 70% through automated unit and integration testing - Led code reviews and mentored 2 junior developers on .NET best practices, SOLID principles, and clean architecture patterns, improving team code quality by 40% - Implemented Azure DevOps CI/CD pipelines for automated testing and deployment, reducing deployment time from 4 hours to 30 minutes and eliminating manual deployment errors	
.NETDeveloper <i>SaanTekGlobal</i>	Mar2024–Dec 2024 <i>Atlanta,GA</i>
- Developed data-driven web applications using ASP.NET Core 3.1, C#, and Entity Framework, processing 500GB+ daily data volumes with real-time analytics dashboards serving 5 business domains - Created robust ETL data processing pipelines using .NET Core background services and Hangfire scheduler, automating data transformation workflows and reducing manual processing time by 65% - Built scalable microservices architecture using .NET Core WebAPI, Docker containers, and Azure Service Bus for message queuing, improving system modularity and enabling independent service deployments - Implemented comprehensive logging and monitoring using Serilog and Application Insights, enabling proactive issue detection and reducing mean time to resolution (MTTR) by 50% - Developed custom validation frameworks and business rule engines using C# and reflection, ensuring data integrity across multiple systems and preventing 95% of data quality issues	

- Collaborated in Agile development environment using Azure DevOps for project management, participating in sprint planning, daily standups, and retrospectives while consistently meeting sprint commitments

.NET Developer

Jan 2019–Nov 2021

Wipro

Hyderabad, India

- Designed and developed enterprise WPF applications using MVVM architecture, XAML, and C#, serving 5,000+ concurrent users with responsive UI and seamless data binding capabilities
- Implemented full-stack solutions integrating ASP.NET Web Forms with SQL Server 2016, creating automated reporting systems that reduced manual report generation time by 80%
- Built data access layer using ADO.NET and Entity Framework, implementing repository pattern and unit of work for maintainable and testable code architecture
- Developed Windows Services for background processing and data synchronization between multiple systems, ensuring 99.5% data consistency across enterprise applications
- Created comprehensive unit test suites using NUnit and MSTest frameworks, achieving 75% code coverage and establishing testing best practices for the development team
- Participated in requirement analysis, system design, and technical documentation, collaborating with cross-functional teams including QA, UX designers, and business analysts
- Mentored 3 new team members on .NET development practices, conducted knowledge transfer sessions, and contributed to team's coding standards documentation

NOTABLE PROJECTS

Enterprise Resource Planning (ERP) System | .NET 6, ASP.NET Core MVC, Entity Framework Core, SQL Server 2024

- Developed comprehensive ERP solution with modules for inventory management, financial reporting, and user administration using clean architecture principles and Domain-Driven Design (DDD)
- Implemented role-based authentication and authorization using ASP.NET Core Identity with JWT tokens, ensuring secure access control across different user levels with granular permissions
- Built real-time notifications system using SignalR for instant updates on inventory changes, financial transactions, and system alerts with push notifications to 500+ concurrent users
- Designed responsive UI using Bootstrap 5 and jQuery with AJAX calls, creating intuitive dashboards with advanced filtering, sorting, and pagination for handling 100K+ records efficiently
- Integrated automated email reporting system using Hangfire background jobs and SendGrid API, generating and distributing daily/weekly financial reports to 50+ stakeholders automatically

Real-Time Data Visualization Dashboard | WPF, MVVM, SignalR, Chart Controls

2022

- Created interactive WPF dashboard application using MVVM pattern with real-time data updates from multiple REST APIs, displaying critical business metrics with sub-second refresh rates
- Implemented custom data visualization controls using LiveCharts.WPF and OxyPlot libraries, providing interactive charts, graphs, and heatmaps for complex financial and operational data analysis
- Developed efficient data binding architecture using ObservableCollections and INotifyPropertyChanged interfaces, ensuring smooth UI updates without blocking the main thread for 10K+ data points
- Built configurable alert system with threshold monitoring and visual indicators, enabling users to set custom business rules and receive instant notifications for anomalies or target achievements
- Integrated with multiple data sources including SQL Server, REST APIs, and CSV imports using async/await patterns, implementing robust error handling and retry mechanisms for data reliability

EDUCATION

University of North Carolina Greensboro

Greensboro, NC

Master of Science in Information Technology & Management

Dec 2023

- **Relevant Coursework:** Advanced Database Systems, Software Engineering, Object-Oriented Programming, Data Structures & Algorithms

Jawaharlal Nehru Technological University

Kakinada, India

Bachelor of Technology in Computer Science and Engineering

Apr 2018

- **Relevant Coursework:** Software Engineering, Database Management Systems, Web Technologies, .NET Programming
