PROFESSIONAL SUMMARY

Business Analyst with 4+ years of global experience in **ERP, CRM, and BI**-driven business solutions. Proven ability to lead cross-functional teams, drive requirements engineering, and deliver data-backed recommendations that improve process efficiency by **25%+**. Proficient in **SQL, Power BI, SAP S/4HANA**, and Salesforce with a passion for solving business problems through data and automation.

EDUCATION

SUNY at Albany | *Master of Science in Business Analytics*

Aug 2023 – Dec 2024

Focused on advanced data mining, business intelligence, and ERP integration strategies.

TECHNICAL SKILLS

- **Business Analysis & Requirements Engineering:** JIRA, Confluence, Azure DevOps, Rational Requisite pro, Lucid chart, Microsoft Visio
 - **Process Modeling & Improvement:** BPMN, UML, Lean Six Sigma, ARIS, Signavio
 - **Data Analysis & Visualization:** SQL (MySQL, PostgreSQL, SQL Server, Oracle), Microsoft Excel, Tableau, Power BI, Looker
 - **ETL & Data Warehousing:** Informatica, Talend, SSIS, Alteryx
 - **Customer Relationship Management (CRM):** Salesforce, Microsoft Dynamics 365, HubSpot
 - **Enterprise Resource Planning (ERP):** SAP S/4HANA, Oracle NetSuite, Workday
 - **Business Process Automation:** UiPath, Power Automate, Zapier
 - **Agile & Project Management:** UAT, Functional Testing, TestRail, Selenium (for automated UAT), JIRA Xray
 - **Financial & Risk Analysis:** SAP FICO, QuickBooks, Risk Analysis with Monte Carlo Simulation
 - **Stakeholder Communication & Reporting:** Microsoft PowerPoint, Google Slides, Business Storytelling Techniques
-

WORK EXPERIENCE

Research Analyst – SUNY at Albany

Albany, NY

Jan 2025 – Present

- Collaborating with external maritime data clients to analyze storm-prone routes using **AIS vessel records** and **NOAA weather data**.
- Identifying correlations between atmospheric pressure, wind speed, and temperature to detect high-risk zones for severe weather events.
- Developing **Power BI dashboards** and **Python-based** forecasting scripts to support real-time decision-making and route optimization.
- Delivering weekly progress reviews to clients and academic advisors, showcasing predictive insights and risk mapping visuals.

Business Analyst – SUNY at Albany

Albany, NY

Aug 2023 – Dec 2024

- Led **50+** business requirement documents (**BRDs**) and functional requirement documents (**FRDs**) using **JIRA** and **Confluence**, ensuring **100%** project alignment with stakeholder needs.
- Designed and optimized **20+** process workflows using **Microsoft Visio & Lucidchart**, improving operational efficiency by **20%**.
- Conducted **30+** JAD sessions, collaborated with cross-functional teams, and translated complex business needs into actionable user stories in Azure DevOps.
- Performed **SQL-based** data mapping across multiple datasets, increasing data retrieval and analysis efficiency by **30%**.
- Directed full-cycle **UAT planning** and triage with QA teams and business users, achieving **95%** first-pass success rate and reducing post-release defects by **40%**.
- Built **Power BI** dashboards to track project **KPIs**, reducing manual tracking efforts by **35%** and increasing data accuracy.
- Developed **ETL workflows** with **Informatica & SSIS** to streamline data integration, reducing processing time by **25%**.

Senior Business Analyst – HCL technologies**Bengaluru, India****Feb 2023- Jul 2023**

- Liaised between **100+** stakeholders and technical teams, ensuring seamless requirement gathering and project execution through **JIRA & Confluence**.
- Conducted **GAP analysis** on **15+** system enhancements, leading to significant functionality improvements in enterprise applications.
- Designed interactive dashboards in **Power BI**, resolving **50+** critical business intelligence reporting gaps, optimizing decision-making.
- Partnered with ExxonMobil to modernize **HR analytics** using **SAP S/4HANA** and **Power BI**, reducing reporting lag from 3 days to 6 hours.
- Drove sprint planning and backlog refinement for **SME tools**, delivering 12 high-impact features in <90 days.
- Developed wireframes & use case diagrams in **Lucidchart** to align with business objectives, ensuring seamless system implementation.
- Managed Agile sprint planning & backlog grooming using **JIRA**, ensuring on-time delivery of HR and SME-focused system enhancements.
- Automated monthly reports using **SQL & Power BI**, reducing reporting errors by **40%** and increasing efficiency.
- Enhanced data governance strategies by implementing data validation rules in **SQL**, improving data integrity by **30%**.

Business Analyst – Infosys Limited**Hyderabad, India****Nov 2021 – Feb 2023**

- Drove **10+ Agile projects**, participating in 20+ sprint planning, review, and retrospective meetings, improving sprint efficiency.
- Conducted **15+ GAP analyses** to ensure alignment between business needs and ERP capabilities in **SAP S/4HANA**.
- Led post-implementation training and knowledge transfer for **50+** users during **SAP FICO** deployment, reducing support tickets by **60%**.
- Collaborated with offshore teams to deliver finance dashboards on **Tableau** for leadership, improving strategic reporting by **30%**.
- Trained **50+** end-users on new system functionalities, ensuring seamless adoption and minimizing post-implementation support issues.
- Led **UAT efforts** for a major **ERP** upgrade, successfully testing **200+** system components and reducing post-go-live defects by **90%**.
- Developed custom dashboards in **Power BI** to track project milestones, reducing project status meetings by **50%**.

PROJECTS

- Impact of Calming Music on Stress Reduction – Conducted a **JASP-based study** with **200+** participants, using **SPSS & Python** to analyze data, revealing a **35%** stress reduction and informing wellness strategies.
- Data Analysis on Hair Salon No-Show Patterns – Predicted customer no-shows (**85% accuracy**) for a salon chain, reducing cancellations by **20%** and increasing booking efficiency.
- Puma Brand Marketing Strategy Analysis – Analyzed global marketing data for Puma using **Power BI** and Google Analytics, identifying underperforming channels and increasing visibility by **15%**.
- Automatic Identification System for Vessel Data Analysis – Processed **10M+ AIS records** to identify inefficient maritime routes, resulting in **25%** fuel savings
