Education

Yildiz Technical University

September 2020- June 2025

Faculty of Chemistry&Metallurgy, Mathematical Engineering

- B.Sc. in Mathematical Engineering | Graduate Student, GPA: 3.21/4.00

Graduation Project: *Credit Risk Assessment Using Fuzzy Logic on MATLAB.*

Sırrı Yırcalı Anatolian High School

September 2015 – June 2019

Bilnet Anatolian High School

August 2019 – June 2020

Experiences

Mercedes-Benz Kamyon Finansman A.Ş. , IT Business Analyst PEP Intern

July 2024 – May 2025

- Collaborated with business units to gather and analyze requirements, transforming them into clear technical documentation.
- Prepared and documented Functional Requirements (FR) by analyzing stakeholder needs, ensuring alignment with business objectives and IT capabilities.
- Utilized Atlassian tools (JIRA, Confluence) to manage workflows, test cases, and progress tracking in IT projects.
- Queried and analyzed large datasets using SQL to support data-driven decision-making and process optimization.
- Acted as a liaison between development and business teams to ensure accurate implementation of solutions.
- Contributed to end-to-end project lifecycle, including requirement elicitation, documentation, testing, and deployment
- Participated in UAT processes, user training, and project meetings while continuously learning BA methodologies.

IEEE YTU CASMarine Team, Organization Department Member

November 2022 – July 2023

- Created and managed sponsorship deals, including outreach, proposal preparation, and relationship maintenance.
- Coordinated participation in underwater competitions and events, overseeing logistics and team planning.
- Monitored project progress, collaborated across departments, and proposed solutions to organizational issues.

Deniz Bank, Finance Intern

June 2022 – July 2022

- Analyzing business processes and providing suggestions to increase efficiency.
- Preparing reports on the work and projects carried out during the internship period.
- Having the opportunity to learn about the bank's products and services.

Projects

The Impact of Different Scoring Systems on Competition:A ComparatIve Analysis for the Turkish Super League and Europe's Big 5 Leagues, Multidisciplinary Design Project

Istanbul, 2024

- Developed and simulated an alternative scoring model to assess its effects on league competitiveness and financial balance.
- Conducted comparative data analysis using Python and Excel for Super League and top European leagues.

Credit Risk Assessment Using Fuzzy Logic, Graduation Project

Istanbul, 2025

- Developed a fuzzy logic-based model to evaluate credit risk levels of clients, improving accuracy over traditional binary methods.
- Analyzed customer financial data using MATLAB and implemented fuzzy inference systems to classify risk categories.
- Demonstrated enhanced prediction performance and provided actionable insights for financial decision-making.

Skills & Certifications

- Technical Skills:** SQL, Python, MATLAB, JIRA, Confluence, MS Office Programs, C, Canva
- Languages:** Turkish (Native), English (C1), German (A1)
- Certificates:** GNÇYTNK'25 Gelişim Rotası Programı (Turkcell, 2025), Denizaşırı Staj Programı (Deniz Bank, 2022)
- Interests:** Business Analysis, Business Intelligence, Data Analytics, IT Strategy, Data Visualization, Process Optimization, AI, Project Management, Sports Statistics & Analytics, SQL & Database Systems, Predictive Modeling, Strategic Thinking, Problem Solving.
- References:** Available upon request.
