OBJECTIVE:

My name is Bernard Kite, I am looking for an entry level position to gain industry experience and learn the best software development and implementation methodologies and also other fields. I am also interested in learning new skills and using them in my daily work.

EDUCATION:

Jackson State University

College of Science Engineering and Technology

Bachelor of Science

Major: Computer Science

GPA: 3.8

Master of Science

GPA: 3.7

HONORS & ACTIVITIES:

2018-2019 JSU Athletics, Male Athlete of the Week

2018-2022 JSU President's and Dean's List:

GRADUATION:

Undergraduate May 2022

Masters Spring 2025

SKILLS:

C++, Python, Java, Windows Operating System, Android Studio, Git, Kotlin

WORK AND LEADERSHIP:

Tutor on campus, Calculus, Algebra, C++ Programming.

Research:

I did school Research about Boston crime using K-means and Clustering. I had to display the number of crimes that happened and sort them according to the date and time it occurred. This helped me acquire a skill that I never had and now I know how to apply it.

Skills:

- R-Studio using K means and Clustering.
- Worked with excel files using data from some cities in New York.

Projects: 2021-2022

I did my final project with my group where we created a website chatbot that can help students when they log in to their paws account and need help in finding their documents or information. This is by only opening a chatbot that we created where they will get help when they need account information like transcript, registration and more.

- Used Visual Studio.
- I used an android studio and helped in developing the app.
- Used Kotlin to develop the chatbot.

WORK EXPERIENCE: 2022-2023

I also worked as an Android developer for over 9 months with experience using Kotlin and Java. My skills are Java, Kotlin, Espresso, Mockito, Singleton, Adapter, Observer, Builder and more.

- Used Android frameworks and APIs to efficiently load data and update databases: Loaders, AsyncTaskLoader and SyncAdapters.
- I also have experience with architectural design patterns like MVP and MVVM.
- I Implemented newer features in Kotlin and migrated older features coded in Java to Kotlin.
- I also Helped code merges, builds, debugging.
- Used knowledge of design patterns in Android development, employing development tools such as Android Studio.
- Practiced pair programming as part of collaborative project development/delivery strategy.
- Applied Kotlin extension functions to efficiently re-use existing codes and reduce code duplication.

WORK EXPERIENCE: SUMMER INTERN 2024-2025: HITACHI ENERGY

I did an internship at Crystal Springs MS for summer 2024 where I interned as a Design Engineer. I had a chance to try new skills such as using AutoCAD, Engraving, working on Transformers, helping in code solutions and converting old code from Fortran to Python. I also got more certifications from the Company, and I loved the environment a lot. It felt great sharing my skills with them and getting to acquire new skills from them.

Skills:

- Designing and Engraving using AutoCAD.
- Helped with converting code from Fortran to Python.
- Data collection using excel and Visual basic Macros as a coding set.
- Helped in Designing some parts of the transformers.
- Testing code and developing new code.
