

Bhagavath Sai Darapureddy

Data Engineer

Irving, Texas, 75038 | +1 (571)579-1077 | darapureddybhagavathsai@gmail.com | [LinkedIn](#)

SUMMARY

- **Data Engineer** with **4 years of experience** in designing and implementing **scalable, high-performance data solutions**.
- Expertise in **Big Data technologies**, including **Hadoop, Apache Spark**, and **Hive**, for efficient **large-scale data processing** and **analytics**.
- Proficiency in developing and optimizing **ETL pipelines** using **Apache NiFi, Apache Kafka**, and **Talend**, ensuring seamless **data integration** across multiple sources.
- Experienced in **cloud platforms** like **AWS, Azure**, and **Google Cloud Platform (GCP)**, leveraging **cloud-based solutions** for **cost-effective** and **scalable data processing**.
- Good knowledge of **database management** with **SQL Server, PostgreSQL, MySQL**, and **Oracle**, ensuring efficient **data storage, retrieval**, and **performance optimization**.
- Hands-on experience with **data science libraries** like **Pandas, Scikit-learn, NumPy**, and **TensorFlow** to support **analytics** and **machine learning initiatives**.
- Skilled in creating **interactive dashboards** and **data visualizations** using **Tableau, Power BI**, and **SSRS**, enhancing **business intelligence** and **decision-making**.
- Well-versed in **Agile methodologies, DevOps practices**, and the full **Software Development Life Cycle (SDLC)**, ensuring efficient project execution and **continuous improvement**.

SKILLS

Programming Language: Python, R, SQL, Scala	Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow
IDE's: PyCharm, Jupyter Notebook	Version Control Tools: Git, GitHub, GitLab
Big Data Ecosystem: Hadoop, MapReduce, Hive, Apache Spark, Pig, Sqoop, Pyspark, Snowflake, HDFS	Methodologies: SDLC, Agile, Waterfall
ETL Tools: SSIS, Apache NiFi, Apache Kafka, Talend, Apache Airflow, Informatica	Operating Systems: Windows, Linux, Mac
Databases: MySQL, SQL Server, PostgreSQL, Oracle	Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Data Management
Cloud Technologies: AWS, Azure, GCP, DataBricks	
Reporting Tools: Tableau, Power BI, SSRS	

WORK EXPERIENCE

McKinsey and Company, USA Data Engineer	Jan 2025 - current
• Designed and developed high-performance data pipelines using Python, Apache Spark, and Hive, enabling faster data processing and improving overall system efficiency. • Created ETL workflows using Apache Airflow, Talend, Apache NiFi, and Informatica, ensuring seamless data integration from multiple sources. • Conducted in-depth data analysis using Python, Seaborn, Matplotlib, and Pandas to identify patterns, trends, and anomalies. • Developed and deployed scalable AWS cloud solutions for data storage and processing, leveraging services like S3, RDS, Lambda, and EC2. • Designed and built interactive Tableau dashboards that provided real-time analytics and visual insights for stakeholders. • Processed and analyzed massive datasets exceeding 10TB using PySpark, Hadoop, and HDFS, improving data analytics efficiency by 30%. • Engineered ETL workflows using SSIS, Apache NiFi, and Talend to streamline data processing and reduce execution time. • Implemented distributed storage solutions with HDFS and Amazon S3, ensuring scalability, reliability, and support for structured and unstructured data. • Optimized Oracle database performance by refining indexing strategies and query execution plans.	
Hexaware Technologies, India Data Engineer	May 2020 - Jul 2023
• Controlled the implementation of agile methodologies in data engineering projects, promoting cross-functional collaboration, iterative development, and continuous improvement. • Designed and fine-tuned distributed data processing solutions using Apache Spark, Hive, and HDFS, enabling high-speed data transformation. • Industrialized and orchestrated end-to-end ETL workflows with Apache Airflow, Talend, and Apache NiFi, ensuring efficient data ingestion, transformation, and loading. • Spearheaded the migration of on-premises data infrastructure to Azure, optimizing cloud resource utilization and ensuring enhanced scalability, reliability, and cost-efficiency. • Built and deployed interactive real-time dashboards and analytical reports in Power BI, enabling data-driven decision-making and stakeholder alignment. • Optimized ETL pipelines using SSIS, Informatica, and Python, reducing data processing times and ensuring smooth data flow across various platforms. • Designed scalable and efficient data workflows using Hive, Sqoop, and Apache Airflow, streamlining data extraction, data migration, and parallel processing. • Developed high-performance data pipelines with Hadoop, Hive, and Kafka, optimizing real-time and batch data processing capabilities.	

EDUCATION

Master of Science in Data Science	May 2025
The George Washington University, Washington DC	

CERTIFICATIONS

Databricks Certified Data Engineer Professional	Sept 2025
--	------------------
