

Bhakti Shah

+1 610-416-8413

bhaktigshah@gmail.com

Professional Summary:

- **Data analytics expert with 13+ years of IT experience**, including 8+ years specializing in **Tableau, python, Power BI and SQL Server**. Proven track record in leading and delivering solutions for clients across various industries including Retail, Healthcare, Talent Acquisition (HR) and Finance. Adept at creating dynamic, high-performance dashboards, administering Tableau servers, and utilizing cloud.
- **Tableau Desktop Specialist certified.**
- **Proficient in Tableau Desktop** - Architecture and dashboard design, with hands-on experience connecting to diverse data sources, including Amazon Redshift, Snowflake, PostgreSQL, Oracle, and SQL Server. Created various dynamic Tableau Dashboards, performance tuning of Dashboards, Created interactive Data Visualizations and Storytelling.
- **Skilled in Tableau Server administration** - Worked as Tableau Server Administrator (Walmart, Wells Fargo) and managed users, user groups, Projects and Tableau Prep Workflows scheduled refreshes on Tableau server, published it on Tableau Server/Cloud, migrated Tableau Server contents and monitored the server performance.
- **SDLC** - With Strong Knowledge in all phases of Software Development Life Cycle (SDLC) such as Requirement gathering/analysis, Design, Developing, Testing, Migrating, Administration, Security Management and Production Supporting on various platforms like Windows, UNIX and LINUX.
- **Data Model** - Expertise in creating data model with Tableau Extracts, Live connection, Joins, Cross Database Joins, Custom Queries, Data Blending, Alteryx workflow, Tableau Prep workflow and Python scripts.
- Expertise in creating data model with Power BI Relationship, Measures, Calculated Columns, Data Transformation and Security.
- **Requirement Gathering:** Extensively involved in day-to-day **Communication & Collaboration** with business users to gather requirements and documentation.
- **Strong Technical Skills** - Extensively used Filters, Context Filter, Data Source Filters, Filter Action, Functions, **LOD calculations**, Row Level Securities, calculated fields, Parameters, Custom Queries, customized charts, Trends to create Data Visualizations and Storytelling.
- Hands on experience creating complex charts with multiple measures like Invoices and Payments. Prodigy in creating different visualizations/Dashboards using Bars, Lines and Pies, Maps, Scatter plots, Gantt, Bubbles, Histograms, Bullets, Heat maps and Highlight tables, Page Trails and Density Chart.
- **Power BI Desktop and Power BI Service** - Developed and published interactive Dashboards and reports using Power BI Desktop enabling data-driven decision making across departments. Managed and maintained Power BI reports in Power BI Service, including scheduling data refreshes, sharing Dashboards with stakeholders, and setting up data security and access controls. Created paginated reports and embedded Power BI visuals into SharePoint and other applications.
- **Power Query** - Utilized Power Query to extract, transform, and load (ETL) data from various sources including SQL databases, Excel files, CSVs, and cloud services.
- **Integrated Fabric Data Lake with Power BI** - Developed comprehensive Power BI dashboards using data sourced from Fabric Data Lake, providing actionable insights to business stakeholders.
- **Python scripts** – Hands on experience creating and running python scripts to read data from multiple data sources, perform ETL operations on it, merge multiple tables to create data model and write it on Excel file as output with the help of python scripts
- **SQL Queries** – Expertise in writing SQL queries using joins, Union, Group by and Sub queries for nested queries.
- **Data Validation** – Assured the accuracy of data by Unit Testing, Integrated Testing and Troubleshooting during production release and created unit testing documents. Efficient in writing **SQL queries** and **comparing** backend and frontend data while testing.

- **Alteryx and Tableau Prep** - Designed and developed **ETL workflows** and datasets in **Alteryx and Tableau Prep** to be used by the BI reporting tool. ETL Used **advanced SQL scripting to write** custom queries using different functions like **UNION, CASE, JOINS and DATE functions** etc.

Education:

- **MCA** (Master of Computer Application) from Gujarat University 2005 India
- **BSC Mathematics** (Bachelor of Science) from South Gujarat University 2002 India

Technical Skills:

- BI Tools: Tableau, Tableau server, Microsoft Power BI, Tableau Online, Tableau public, Excel
- Scripts: Python
- ETL Tools: Alteryx, Tableau Prep, Looker, Google Analytics
- Cloud Technologies: Fabric Data Lake, AWS Redshift, Snowflake, SAP, ORACLE ERP, Google Big Query, Tableau Online
- Databases: Microsoft SQL Server, Oracle, PostgreSQL, MySQL, Tableau Server, Excel Flat files, Advance Google Sheet

Experience:

Wells Fargo

Nov 2024 to Present

Sr. BI Developer

Domain – HR and Talent Acquisition (TA) Workday

Talent Acquisition Package: The Tableau Dashboards are developed for HR Talent Acquisition team to visualize Requisition, Opens, Closed and Candidate data provided by Workday. Designed and automated Tableau Dashboards for recruitment analytics, integrating workday data which saved 100+ hours effort of the team daily. leveraged Tableau, Python, Alteryx, and Agile practices to streamline reporting, optimize processes, and deliver actionable insights.

Responsibility:

- Collaborating with stakeholders to understand business needs, gather the requirements and provide the efficient technology solutions.
- Provided actionable insights to **optimize recruitment processes** and **reduce time-to-hire**.
- Automated 150 manual reports into Tableau Dashboards, **saving 100+ hours daily**.
- Build interactive pipeline, aging analysis, maintain the diversity and recruiter workload Tableau dashboards for improved hiring efficiency.
- Take care of preparing the **Python scripts** and designed Alteryx workflows for data cleaning and transformation.
- Automated data refreshes and scheduling via Tableau Server integrated with Workday, providing access to end users.
- Created **extracted data sources** and publish it to Tableau Server, **schedule** the **refreshes** for the extracted data sources.
- Used Agile technologies and kept the track of stories, releases, refreshes using Kanban board throughout the project to deliver timely and efficient solutions. Actively participated in Replenishment, sprint planning, the daily stand-up, the sprint review and the sprint retrospective meetings.
- Developed complex Tableau Dashboards using dynamic parameter, filters, context filters, action filters, charts, **LOD calculations**, year to date (**YTD**), month to date (**MTD**), **YoY**, **PYTD** calculations, groups, complex business logic calculations, Table view and line by line reports, pie charts, bar charts and heat map.
- Implemented interactive Data Visualizations to effectively visualize Hires, Requisitions, Opens, Closed and Candidates data and helped to take business decisions.
- Migrated Tableau Dashboard to Power BI Dashboard using Power BI Query, Charts, Slicers, Line by line chart and DAX.
- Responsible to validate data (SQL server query) using unit testing, integrated testing, troubleshooting while release, test data with backend to ensure accuracy and create unit test document

Tools and Technologies: Tableau Desktop 2023, Tableau server, Power BI, SQL Server, Python, Jupiter notebook, Visual Studio Code, Alteryx designer, Agile Methodologies, Microsoft office

Walmart Global Tech, Remote

Mar 2023 to Oct 2024

Data Analyst

Domain – Supply Chain

Server Usage Analytics: The Dashboards are developed to visualize Success and Failure rate of Flows per month, active vs inactive flows, frequency of flows, total number of users, users with schedules, users logged in last n number of days, number of flows run in last n number of days etc. Developed various ad hoc Dashboards and Reports for Tableau PostgreSQL repository to monitor the performance of Tableau server.

Responsibilities:

- Extensively worked on **Tableau PostgreSQL repository** and developed n number of reports for the team to analyze and monitor the performance server.
- Prep Usage Dashboard helps to improve the performance of Tableau server by 40%.
- Density Workflow Dashboard helped to reduce workflow traffic by 25%.
- Led the Requirement gathering/analysis, Design, Development, Testing, Migrating, Administrating, Security Management, Production Supporting and Deployment of Tableau that can be deployed across all our clients, meeting their business goals and configurable to their technical needs.
- Created advanced Complicated charts (stack bars, scattered plots, whisker plots, geographical maps with Tableau functionalities. Groups, Sets, Calculations, Reference lines etc.), Data Visualizations, and Complex Calculations to manipulate the data and acted as the Point of Contact in Data Interoperability, Analytics and BI and Production Support issue resolution.
- Designs and implements ETL (Extract, Transform, Load) procedures for intake of data from both internal and outside sources; as well as ensures data is verified and quality is checked with Alteryx and Tableau Prep designers, published it on Tableau Server and Scheduled Refreshes.
- Developed interactive Dashboards to Analyze the performance tuning of Servers with Detailed reports and multiple filters using LOD calculations.
- Extensively used Filters, Context Filter, Data source Filters, Filter Action, Functions, LOD calculations, Row Level Securities, calculated fields, Parameters, Custom Queries, customized charts and Trends.
- Developed Data Models with Tableau Extracts, Live connection, Joins, Cross Database Joins, Custom Queries and Data Blending.
- Provide support to **migrate** content from Tableau Server.
- Involved in weekly meeting with **Salesforce** team to resolve the issues, successfully connected Salesforce data to Tableau with Salesforce connector and Embed the Dashboard into Salesforce.
- Involved in **day-to-day communication** with the **Tableau users** to provide support to change the **ownership** or add or remove the users from the group etc.

Tools and Technologies: Tableau Desktop 2021.3, Tableau server, Tableau Prep Builder, Alteryx Designer 2019.4, Google Big Query, Azure Synapse, Azure SQL RADL, AWS Redshift, PostgreSQL, MongoDB, Salesforce, Advance Google Sheet, Microsoft Office

Xerox, Remote

Aug 2022 to Feb 2023

Tableau Developer

Domain – Finance

EFAP (Enterprise Financial Analytics Platform) Systems: The system is developed to enhance **Sub Ledger and/ Transactional data from both SAP and Oracle ERP systems** on the top of Balance Sheet and Journals. SAP and Oracle ERP are data sources. **Account Payable & Payment Summary Dashboard** is developed to visualize Invoices, Payments, and Outstanding balance for the Vendor. Users can check invoices against the payment for the selected period.

Responsibilities:

- Works with **key stakeholders** within all **business functions** to align technology solutions with business strategies
- Involved in **requirement gathering/analysis, Design, Development, Testing and Client Demo.**
- **Enhanced** Tableau dashboard **performance** by 25%, managing over 60 million records from Snowflake data source and optimizing large-scale, real-time data visualizations.
- Created **Dynamic Account Payable drill down functionality using calculated fields** from multiple Dashboards to a single Dashboard using Conditional Based Calculated Fields and URL based drill down between multiple reports.
- Developed **Account Payable Dashboard, Purchase Order Dashboard and Variance Dashboards for Invoices and Payments** from scratch.
- Designed interactive graphs to visualize **Multiple Measures.**

- Successfully done Dashboard **tuning**, developed finance **data visualizations**, improved the **performance of Tableau Dashboards** and successfully download the report less than 40 seconds.

Tools and Technologies: Tableau Desktop 2021.3, Tableau server, Snowflake, SAP, ORACLE ERP, Microsoft Excel, Advance Google Sheet, Microsoft Office

CISCO Systems Inc, Remote

Jan 2022 to July 2022

Data Analyst

Cisco Learning: Cisco is a US technology company that is best known for its networking products. The company provides their clients with different kinds of training. Cisco Learning is a platform for internal and external users to learn and get certifications. Migrated BO Reports migration to Tableau.

Responsibilities:

- Used an SSH tunnel to connect data behind the firewall with Putty.
- Connected Tableau Desktop to multiple data sources like AWS Redshift, PostgreSQL and MySQL and generated detailed view Drill Down reports as per the user requirements with Tableau Desktop.
- Built Detailed view and established a high visibility Course multi-level drill down Tableau dashboards for Business leaders and provided ranking based on best performances.
- Provided ad-hoc reports and detailed analyses with forecasts which influenced leadership decisions.
- Used Microsoft Power BI Power Query to extract data from external sources and modify data to certain format as required in Excel and created SSIS packages to load excel sheets from PC to database.
- Published Power BI Reports in the required originations and Made Power BI Dashboards available in Web clients and mobile apps.

Tools and Technologies: Tableau Desktop 2021.1, Tableau server, Microsoft Power BI 2.100.261.0, Microsoft Power BI Report Server on Prem, Power BI Report Server on Cloud, AWS Redshift, PostgreSQL, MySQL, Alteryx, Microsoft Excel, Microsoft Office, Jira, Putty

Assurant Solutions, Wayne, PA

Aug 2018 to Mar 2021

Tableau Developer

Domain- Insurance

Description: Assurant Solutions is an American corporation providing Extended Protection, Vehicle Protection and Mobile Protection. The company protects a wide range of mobile devices, from phones and tablets to mobile hotspots, routers/modems, netbooks and more. The company protects them from things like loss, theft, accidental damage and mechanical or electronic malfunction ...for long beyond the manufacturer's warranty. Based upon the loss type system creates the claim through different platforms like call center website, IVR, Public website, carrier Api's & Carrier Portals. After the claim is authorized, it is fulfilled through logistic and repair centers. The goal of the project's new claim system (NCS) was migrating data in BI Tools from different sources and creating various reports.

Responsibilities:

- Creating Reports for the Sales team to help them understand Seasonal Business and understand the needs of Customers.
- Developed dashboards in Tableau Desktop and published them on to Tableau Server for marketing department employee base on offers, latest client benefits and newly launched plans and improved business by 20%.
- Rebuilding existing Reports into Tableau Visualizations with user and filters for Inventory department based on Stock and availability of products.

Tools and Technologies: Tableau Desktop 2019.1, 2018.3, Microsoft Power BI 2.8, Power BI Report Server on Prem, Power BI Cloud, Google Analytics, Python, MS SQL Server, Oracle, Excel Flat files, JSON

All scripts, India

April 2014 to May 2017

Data Analyst

Domain: Healthcare Management System

Bro Eclipsys system: This Project is for one of the major IT Healthcare Service Providers in India. The objective of this project is to help the new clients and the existing clients migrating from their existing systems to the new Allscripts professional practice Management systems and code usability.

Responsibilities:

- Working as Tableau Developer with expertise in Tableau Reports development for the healthcare domain.

- Extracting data from multiple sources like flat files, SQL server and transforming, validating data, and loading into Destination.
- Used Alteryx tool to transform data from MYSQL Server and oracle database and create data model and apply business logic in the workflow for smoother reporting process.

Tools and Technologies: Tableau Desktop, Tableau server, Tableau Online, MS Excel, Alteryx

IBM India Private Limited, India

Jul 2008 to Apr 2011

System Engineer

VODAFONE Phoenix Applications: Project Phoenix is the retailer engagement scheme where with various promotions the retailer of Vodafone can be benefited in turn by Vodafone business too. Different modules of the project are Enrollment System, Configuration System for product points, Gift redemptions, Gift Booking PRE-RDSE points and Bonus points, Point calculation system, Points/Gift redemption system, Points/Gift Booking system, Additional ETOP number system, MIS, ASKH

Tools and Technologies: ASP. Net, C#, ORACLE, Windows XP.

Hexaware Technologies Ltd, India

Jun 2007 to June 2008

Software Developer

KPS (Kiewit Purchasing System): KPS is a Purchasing System for Kiewit Construction Company. It contains the modules like Requisition, Quote, Purchase Order, Receiving, Accrual and Journal. With the help of Requisition Module users can send requests for items. Quote Module is used to get quotations for the items. With the help of Purchase Order Module users can order items. Accrual and Journal modules are used to maintain Accounting in the system.

Tools and Technologies: VB.Net, SQL Server 2005, SSRS Report, Windows XP

Aurionpro Solutions Ltd., India

Mar 2006 to May 2007

Software Developer

Money Market HDFC Bank India: This application forms part of Quick Solutions system and will allow the users to update the database of the application through various file uploads, maintain certain master data not available in the core banking system, and generate reports based on defined criteria. The reports are generated to comply with reporting formalities of RBI, as well as for internal usage. These enhanced reporting and storage utilities will help the users in avoiding manual preparation and maintenance of records.

Tools and Technologies: C#, SQL Server 2000, Windows 2000
