

Bhanu Sravani Mudireddy

BUSINESS ANALYST

bsravani.m26@gmail.com | +1 973 554-4982 | linkedin.com/in/bhanu-sravani-mudireddy/

McKinney, Texas (Open to Relocate)

SUMMARY

- Data-driven Business Analyst with 5+ years of experience delivering measurable business outcomes ranging from a 50% reduction in customer churn to a 25% increase in claim approvals across healthcare and technology sectors.
- Proficient in SQL, Python (Pandas, NumPy, Scikit-learn), Power BI, Tableau, and AWS cloud services.
- Skilled in requirements gathering, stakeholder engagement, and translating business needs into actionable technical solutions.
- Strong expertise in ETL development, predictive modeling, and data visualization to support strategic decision-making.
- Proven success leading initiatives that achieved a 25% increase in claim approvals, a 50% reduction in churn, and a 20% boost in lead conversions.
- Experienced in Agile/Scrum environments with practical use of Jira, Confluence, Azure DevOps, and RTM documentation.
- Built scalable dashboards and automated reporting pipelines, improving data accuracy and decision-making speed by over 40%.
- Adept at UAT, data governance, and cross-functional collaboration, ensuring seamless project delivery from concept to implementation.
- Led full-cycle project execution, including sprint planning, backlog refinement, stakeholder alignment, and team coordination, reducing delivery timelines by 15% and improving sprint velocity.

SKILLS

Methodologies	Agile (Scrum), Rational Unified Process (RUP), Waterfall
Programming Languages	Python, R, SAS
Database Management	SQL, MS XS, MS Excel, Requirements Traceability Matrix (RTM)
Documentations	FRD, BRD, SRS, User Guide, User Stories, Use cases
Project Management Tools	MS Project, MS Excel, MS SharePoint, Asana, Trello, Rally
Visualization Tools	Tableau, Power BI, QlikView
Business Analysis	Cost/benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis
Tracking Tools	Jira, HP Quality Center, Rational ClearQuest, RTM
Cloud Computing Platforms	AWS (S3, EC2, RDS, Redshift), Azure
ERP Planning & CRM	SAP, MS Dynamics Nav, Salesforce, HubSpot
Technical Skills	KPI, UAT, Test Plans, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS 360, Web XP, Software development & testing, Data Cleaning, Data Wrangling, Data Sets, Data Modules, Data Modelling, Database Knowledge, Requirement Gathering, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping, Data Presentation, Mathematics, Probability Distributions, Confidence Intervals, Hypothesis Testing, Regression Analysis, Linear Algebra
Soft Skills	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-making, Documentation, Presentation, Verbal communication, Sprint Planning

EDUCATION

Master of Science in Computer Science | Northern Arizona University, AZ

Bachelor of Technology in Computer Science and Engineering | MLR Institute of Technology, Hyderabad, India

CERTIFICATIONS

- Salesforce AI Specialist
- Microsoft Azure Fundamentals
- Power BI Data Analyst Associate
- Power Platform Solution Architect Expert
- Power Automate RPA Developer Associate

EXPERIENCE

Business Analyst | CVS Health, AZ (Remote) | Sep 2023 – Present

- Restructured the health coverage review process by analyzing claims data, resulting in a 25% increase in approval rates and delivering \$500K in profit growth within six months.
- Led stakeholder interviews and requirement gathering sessions to align business objectives with enhancements to coverage workflows and data architecture.
- Spearheaded a targeted skill development initiative that boosted team proficiency in digital marketing by 20%, contributing to a 25% rise in lead conversions.
- Created detailed user stories, use cases, and comprehensive user guides to streamline development and support processes, resulting in a 25% reduction in rework, a 30% improvement in test coverage, and a 20% decrease in post-implementation support queries.
- Designed scalable data architectures using SQL and Python to support predictive and prescriptive analytics; integrated clean, optimized data views into BI platforms, increasing decision-making efficiency by 40%.
- Developed interactive Power BI and Excel dashboards to track key operational KPIs, resulting in a 30% uplift in data visibility and efficiency.
- Collaborated with cross-functional teams to define and implement a data governance framework, improving data quality by 30% and enabling more reliable insights.
- Executed end-to-end data wrangling, profiling, validation, and visualization workflows, which led to a 50% improvement in data quality and more actionable strategic insights.
- Managed User Acceptance Testing (UAT) to ensure alignment between business requirements and technical solutions, driving seamless implementation and high user adoption.
- Facilitated JAD sessions with business stakeholders, product owners, and technical teams to define business rules, clarify requirements, and align expectations, expediting project timelines by 15% through early consensus.
- Maintained a comprehensive Requirements Traceability Matrix (RTM) to ensure full coverage of business and functional requirements throughout the project lifecycle, reducing scope creep and improving requirement validation accuracy by 30%.
- Partnered with project managers and developers to architect and deliver an ETL pipeline, accelerating data processing by 50% and enabling more timely analytics delivery.

Business Analyst | Accenture, India | Jun 2019 – July 2022

- Translated and prioritized business requirements from the product backlog into actionable solutions, driving a 35% increase in user engagement and contributing to 25% revenue growth.
- Conducted user interviews and cross-functional workshops to gather in-depth requirements for the design of dashboards, reports, and data analytics solutions tailored to business needs.
- Collaborated with cross-functional teams to design and deploy Tableau dashboards connected to AWS-hosted datasets, enabling real-time tracking of business KPIs and reducing report generation time by 50%, leading to faster and more informed decision-making.
- Revamped Jira project management processes by customizing boards, workflows, issue types, and fields—resulting in a 40% increase in task completion and a 25% reduction in project turnaround time.
- Embedded real-time feedback loops during requirement gathering and UAT phases, ensuring iterative improvements and delivery of user-centered solutions.
- Optimized SQL reports to monitor website traffic patterns and user behavior, uncovering insights that led to a 15% improvement in conversion rates and UX enhancements.
- Developed and fine-tuned SQL queries to analyze sales performance, uncovering actionable insights that delivered a 10% increase in revenue and a 5% gain in conversion rates.
- Applied Agile best practices user story mapping, backlog refinement, sprint planning, and retrospectives—boosting team productivity by 20% and cutting project delays by 15%.
- Integrated MS Dynamics/ Nav ERP system with internal reporting workflows, streamlining financial and operational data consolidation, which improved monthly reporting accuracy by 30% and reduced manual reconciliation time by 25%.
- Executed a client engagement strategy through clear, persuasive communication, driving a 15% increase in customer engagement and 20% growth in sales conversions.
