

BHANU SRI AKKENAPALLY

• Missouri, Saint louis • 618-500-9181 • bhanusri925@gmail.com

SUMMARY

Pharm.D graduate with a master's in health data science, combining clinical expertise with strong analytical skills to support data-driven decision-making in healthcare and pharmaceutical settings. Experienced in leveraging tools like Python, SQL, and Excel to analyze healthcare data and contribute to research and clinical projects. Seeking opportunities in healthcare analytics, research, or clinical trials to drive impactful outcomes.

EDUCATION

Master of Science in Health Data Science

Jan 2023 - May 2025

Saint louis university, Missouri

- Capstone project on Medicaid coverage for smoking cessation treatments.

Doctor of pharmacy (Pharm.D)

June 2016- Aug2022

Bhaskar pharmacy college, Hyderabad

- Project on Impact of a pharmacist led prescription audit on the quality of prescriptions in an urban tertiary care hospital.

INTERNSHIP

Capstone Intern – Health Data Science

Jan 2025- May 2025

Saint louis university, Missouri

- Analyzing Medicaid coverage for smoking cessation treatments using Python, SQL, and Excel
- Identifying gaps in access and recommending data-driven public health solutions

Healthcare Consultant (Project Head) – Excelerate Internship

Aug 2023- Sep 2023

- Led a team project on healthcare innovation and strategy development
- Conducted stakeholder research and presented implementation plans to mentors

Clinical Intern – Pharm.D 6th Year

Aug 2021- Aug 2022

Bhaskar general hospital, Hyderabad

- Completed hospital-based clinical rotations in departments including Internal General medicine, psychiatry, paediatrics, and DVL.
- Assisted in prescription audits, patient counselling, and adverse drug reaction monitoring
- Worked collaboratively with pharmacists and physicians to enhance prescription quality and patient safety

PROJECT

Impact of a pharmacist led prescription audit on the quality of prescriptions

Premier Hospital, Hyderabad (6 Months duration)

- Conducted a hospital-based, prospective observational study to assess and improve prescription quality in an urban tertiary care setting.
- Evaluated medication charts for prescribing errors, drug interactions, therapeutic duplications, and adherence to clinical guidelines.
- Aimed to enhance patient care through regular audits, medication reconciliation, and collaboration with healthcare teams for corrective actions.

SKILLS

Technical: Beginner-level Python, R programming, SQL, Excel (actively improving through hands-on practice and coursework)

Healthcare Knowledge: Clinical pharmacology, drug safety, patient counselling

Research & Analysis: Basic knowledge of clinical research methods, statistical analysis, and study design from coursework

Soft Skills: Attention to detail, critical thinking, communication, time management

CERTIFICATION

Good Clinical Practice (GCP) for Clinical Trials with Investigational Drugs and Medical Devices
CITI Program | Valid: Apr 2025 – Apr 2028
