PROFESSIONAL SUMMARY

Data Analyst with over 6 years of experience delivering actionable insights across banking, manufacturing, and enterprise sectors. Proficient in **SQL, Python (Pandas, NumPy, Scikit-learn), R**, and advanced visualization tools including **Power BI, Tableau, QuickSight, Looker, and Qlik**. Skilled in designing **ETL pipelines (Apache Spark, Azure Data Factory, AWS Glue, Informatica)** and integrating cloud-based solutions on **Azure, AWS, and GCP**. Experienced in **data warehousing with Snowflake, Redshift, and Synapse**, as well as working with **Salesforce and SAP**. Known for creating **KPI dashboards**, automating reporting, and building predictive models that improve efficiency, reduce costs, and support data-driven decisions.

Key Achievements:

- Automated complex reporting workflows using Python and Excel VBA, reducing manual effort by 70
- Integrated data from multiple cloud platforms to support enterprise-wide decision-making.
- Designed and deployed executive KPI dashboards in Power BI, Tableau, and QuickSight, enabling faster, data-driven decisions across manufacturing, finance, and operations.
- Built scalable ETL pipelines across AWS, Azure, and GCP, integrating large, multi-source datasets to support enterprise-wide analytics.
- Developed predictive models in Python and R that identified cost-saving opportunities and improved operational efficiency.
- Led impact analysis for supply chain disruptions, delivering actionable recommendations that reduced downtime by 25%.

TECHNICAL SKILLS

Programming Languages and Libraries :	Python(Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R
Database Tools :	SQL, MySQL, T-SQL, PL/SQL, Dynamic SQL, PostgreSQL, NoSQL (Cassandra, MongoDB, HBase)
Data Visualization :	Tableau, Power BI, Excel(PivotTables, PowerQuery, Vba Macros), Quicksight, Looker, Qlik, Grafana, KPI Dashboard Design
CRM and Enterprise Systems:	Salesforce, SAP
Packages :	MSOffice Suite(Excel, PowerPoint, Word, OneNote, OneDrive) MS Project Professional
RDBMS/DBMS :	MS-SQL Server 2008/2012/2016/2019, Oracle 11g
Design Technologies/Tools :	Erwin, MS Visio
ETL and Data Integration Tools :	Apache Spark, Apache Airflow, Apache Sqoop, Apache Hive, Impala, Azure Data Factory, AWS Glue, AWS Lambda, Informatica, PowerCenter, Talend, Apache NiFi
DataBase Technologies :	SSMS, SQL Profiler, Visual Studio 2015, Data Transformation Services (DTS), OLTP, BCP, SSIS
Data Warehousing :	Snowflake, Azure Synapse Analytics, AWS Redshift, Oracle Data Warehouse, SSAS, 2012/2018 ,SSIS ,Business intelligence Development studio
Cloud Services :	Azure Functions (SQL Database, Blob Storage, App Services), AWS: (S3, EC2, Lambda, Redshift, DynamoDB, Kinesis, Elastic Beanstalk, API Gateway), Google Cloud Platform (BigQuery, Google Sheets, Looker Studio)
Version :	GitHub, Visual Studio, Jenkins
Reporting Tools:	SSRS, Crystal Reports
Methodologies:	Agile, Waterfall

PROFESSIONAL EXPERIENCE

Data Analyst - Samsung
Seattle, WA

Feb 2023 – Present

- Developed end-to-end ETL solutions using **AWS Glue, Lambda, and Informatica**, ingesting data from global supply chain systems.
- Used **Python** and **R** for statistical modeling and trend forecasting, identifying cost-saving opportunities in production lines.
- Worked extensively with **Python libraries including Pandas, NumPy, Matplotlib, and Scikit-learn** for data cleaning, analysis, visualization, and predictive modeling.
- Designed and delivered **KPI dashboards** in **Tableau, Power BI, and Amazon QuickSight** to monitor manufacturing metrics like yield, downtime, and failure rates—improving decision-making at both plant and leadership levels.
- Used **Excel PivotTables** and **Power Query** for quick data exploration and ad hoc analysis, especially when handling raw datasets before integration into larger BI tools.
- Developed **VBA Macros** to automate repetitive Excel tasks, cutting down manual reporting effort for cross-functional teams.
- Integrated data across **AWS Redshift, DynamoDB, and S3** to support business intelligence and ML-driven defect prediction models.
- Ran A/B tests to evaluate manufacturing line changes and measure operational impact.
- Collaborated with engineering teams to document data dictionaries, schemas, and governance policies.
- Led weekly analytics sync-ups with operations, QA, and leadership teams to present findings and optimization strategies.
- Built monitoring systems for real-time alerts on production variances, reducing resolution time by 25%.
- Created SQL-based control tables to dynamically manage **ETL logic** without code changes.
- Used **SQL** extensively to pull data from Redshift and DynamoDB for daily operations reporting, helping teams quickly troubleshoot issues on the production floor.
- Designed audit-ready logging mechanisms for pipeline success/failure events.
- Visualized multi-plant data in cross-region dashboards, enabling comparative efficiency analysis.
- Developed machine learning pipeline prototypes for predictive maintenance analysis.
- Built Python-based validation tools to compare system records against warehouse entries.
- Partnered with plant managers to create custom Tableau dashboards tailored to local KPI needs.
- Conducted impact analysis for supply chain disruptions using scenario modeling.
- Automated end-of-line test result aggregation across product SKUs for defect tracking.
- Built interactive **Power BI** dashboards for manufacturing teams using data from AWS Redshift and S3, helping track production metrics and spot delays faster. This cut down weekly reporting time by half.
- Used **DAX and Power Query** to create custom visuals and calculations, making it easier for plant leads to drill into defect trends and equipment issues without relying on technical teams.
- Managed reporting version control using **GitHub**, ensuring consistency and traceability across releases.

Technologies: Python, Python Libraries, R, SQL, AWS (Glue, Lambda, Redshift, S3, DynamoDB), Power BI, Tableau, Informatica, Quicksight, GitHub, Excel(PivotTables,PowerQuery,Vba Macros)

Data Analyst - Wells Fargo
Hyderabad, India

Nov 2020 - April 2022

- Designed and implemented complex **SQL, T-SQL** and **PL/SQL queries** and stored procedures for financial data analysis, reducing manual processing by 40%.

- Built automated data pipelines using **Azure Data Factory** and **Apache Spark** to load and transform millions of records daily.
- Created interactive KPI dashboards in **Power BI** and **Tableau** for real-time tracking of loan performance and risk metrics.
- Integrated data from **Salesforce CRM** to enrich customer profiles and support more granular reporting on borrower behavior and product performance.
- Used **Google Cloud Platform (BigQuery, Looker Studio)** for exploratory analysis and rapid dashboard prototyping when working with distributed data requests from across teams.
- Leveraged **Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn)** for anomaly detection, forecasting, and data cleaning.
- Led the creation of a centralized analytics platform integrating data from finance, lending, and customer systems.
- Conducted detailed variance analysis and anomaly detection using Python and SQL, supporting audit and regulatory teams.
- Collaborated with data architects and cloud engineers to optimize Azure data storage and pipeline performance.
- Performance tuning performed using **SQL Profiler** and improved the efficiency of the SSIS package across multiple business units.
- Partnered closely with product owners and stakeholders in Agile sprints to define metrics, KPIs, and business requirements.
- Developed forecast models for loan delinquency using historical payment data.
- Implemented **role-based security** in Power BI to control sensitive financial data access.
- Integrated external data sources (credit bureaus, economic indicators) for broader risk modeling.
- Designed data lineage documentation for all core financial reports and dashboards.
- Conducted workshops for business users to enhance self-service analytics adoption.
- Led data governance initiatives to ensure consistency in definitions, naming conventions, and quality metrics.
- Worked closely with the compliance department to ensure reports aligned with regulatory policies.
- Monitored pipeline performance and created alerts to flag job failures or data anomalies.
- Established **GitHub-based version control** and **CI/CD pipelines** to manage Power BI report deployment and maintain clean release cycles.

Technologies: SQL, T-SQL, PL/SQL, Python(Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL Profiler, Azure Data Factory, Apache Spark, Power BI, Tableau, SSMS, SSIS, Salesforce, Google Cloud Platform (BigQuery, Looker Studio), GitHub, Agile

Business Analyst - Paytm
Hyderabad, India

July 2018 – Oct 2020

- Analyzed structured and semi-structured data using **SQL, T-SQL**, and **Qlik** to uncover key insights into user engagement, payment trends, and loan repayment patterns, enabling data-informed business strategies.
- Built and maintained executive dashboards in **Power BI, Looker**, and **Qlik** visualizing KPIs like GMV, active user metrics, and conversion rates to support real-time monitoring and decision-making.
- Partnered with ETL teams to improve data integration processes using **Azure Data Factory** and **Apache Spark**, ensuring clean, reliable data pipelines feeding into reporting environments.
- Worked with **SAP** data sources to validate merchant onboarding and transactional flows, ensuring proper integration into the central reporting environment.
- Validated data transformations and business logic within **SSIS** and **Informatica PowerCenter**, ensuring data integrity during onboarding of merchant and financial datasets.
- Worked closely with QA and data governance teams to conduct data quality checks and profiling using **SQL Server Management Studio (SSMS)**, resolving inconsistencies across operational systems.

- Contributed to the development of serverless analytics workflows using **Azure Functions** supporting real-time triggers for payment alerts and transactional notifications.
- Delivered both routine and ad hoc reports using **SSRS**, and **Excel**, supporting compliance, finance, and marketing use cases.
- Authored comprehensive documentation such as BRDs, FRDs, and data dictionaries, helping align technical execution with business goals and ensuring clarity across teams.
- Used **Excel (PivotTables, Power Query, VBA Macros)** for quick analyses, reporting, and prototyping ahead of full dashboard deployments.
- Leveraged **PowerPoint, Word, OneNote, and OneDrive** from the **MS Office Suite** to present findings, track project documentation, and collaborate across cross-functional teams.
- Delivered routine and ad hoc reports using **SSRS**, addressing critical needs for regulatory compliance, finance, and marketing teams.
- Actively engaged in **Agile** development practices, participating in sprint planning and retrospectives to prioritize features and align project scope with evolving business needs.
- Supported stakeholder decision-making by performing ad hoc data pulls and deep dives into payment performance, customer segmentation, and operational bottlenecks.
- Conducted impact analysis for proposed system enhancements, helping product and engineering teams anticipate data-related risks and integration challenges.

Technologies: SQL, T-SQL, SSMS, Power BI, SAP, Qlik, Excel, PowerPoint, Word, OneNote, OneDrive, Azure Data Factory, Apache Spark, SSIS, Informatica PowerCenter, Azure Functions, Agile, SSRS

CERTIFICATIONS

- **Microsoft Certified:** Azure Fundamentals (AZ-900)
- **Microsoft Certified:** Power BI Data Analyst Associate
- **Microsoft Certified:** Azure Database Administrator Associate

EDUCATION

Master of Science, Information Studies

Trine University, Angola, USA

2023
