Summary

Marketing Data Analyst with 3+ years of experience in statistical analysis, data visualization, and campaign optimization. Proficient in Python, SQL, R, Tableau, Power BI, AWS Glue, and PySpark to deliver actionable insights and enhance marketing performance. Experienced in A/B testing, machine learning, and automating reporting workflows. Expertise in optimizing data processes to improve forecasting accuracy and drive ROI in the energy and financial sectors.

Technical Skills

- **Programming Languages:** Python, SQL, R
- **Data Analysis:** Pandas, NumPy, Statistical Analysis, A/B Testing, Feature Engineering
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, XGBoost, Logistic Regression, Random Forest, K-Means, (TensorFlow, PyTorch)
- **ETL & Big Data:** AWS Glue, PySpark, Apache Airflow
- **Marketing Analytics:** IBM Unica, Google Analytics, Clickstream Analysis
- **Cloud Platforms:** AWS (S3, Lambda, Redshift, EC2), Snowflake, Google Cloud (BigQuery), Azure Data Factory
- **Databases:** MySQL, PostgreSQL, BigQuery, Redshift, Oracle, MongoDB
- **Development & Tools:** Git, Jira, Excel (Power Pivot, VBA), Jupyter Notebook, Google Colab

Education

Master of Business Analytics

Clark University, Worcester, MA

Aug 2022 - May 2024

Bachelor of Technology in Information Technology

Manipal University, Jaipur, Rajasthan, India

Aug 2017 - May 2021

Experience

Bristol Myers Squibb, USA

Jun 2024 - Present

Data Analyst

- Conducted statistical analysis and reporting for the Rate Data Analytics (RDA) team using Python, SQL, and Tableau to improve energy usage forecasting and gas load predictions, reducing forecasting errors by 15%.
- Designed and deployed Tableau dashboards for tracking high energy usage and electric load, streamlining reporting processes and improving operational visibility.
- Developed data feeds for Tableau through Teradata SQL and SAS, optimizing the data pipeline and enabling faster decision-making across teams.
- Led the migration and automation of reporting workflows by converting legacy SAS code to Hive, resulting in a 25% reduction in reporting processing time.
- Analyzed web traffic and site behavior using Google Analytics and clickstream data, identifying conversion opportunities that improved site performance by 15%.
- Conducted A/B testing to evaluate site changes and determine the most effective design for landing pages, increasing conversion rates by 10%.
- Delivered actionable insights through visualizations created with Matplotlib and Power BI, helping stakeholders make informed decisions on improving customer experience.
- Streamlined reporting processes by automating data collection and analysis, saving 10 hours per week, and allowing for more efficient use of resources.

Hexaware Technologies, India

Apr 2020 - Aug 2022

Data Analyst

- Led analytics and reporting for traditional financial products (Home Equity, Investments, Credit) using SQL, R, and Tableau, optimizing campaign performance and improving marketing ROI by 12%.
- Performed A/B testing on digital marketing campaigns to identify the most effective strategies, resulting in a 12% increase in campaign effectiveness and customer engagement.
- Designed, built, and executed addressable marketing campaigns using IBM Unica, ensuring that the campaigns met specifications and were delivered within SLAs.
- Measured and reported campaign performance, assessing metrics such as LTV, ROI, and KPIs, and provided recommendations for optimization.
- Utilized AWS Glue and PySpark for ETL processes, improving data workflow efficiency by 30% and ensuring seamless integration across various data sources.
- Delivered weekly email marketing reports and insights using Excel (Power Pivot, VBA) to analyze trends and improve targeting strategies.
- Conducted ad-hoc analyses from multiple data sources, including historical performance and benchmarking, to support strategic decisions and business growth.
- Provided recommendations for optimizing campaigns based on data trends, leading to improved targeting and conversion rates.
