SKILLS

Interests : Roadmap, Market Research, Agile, Scrum, Data-Driven Decisions, Strategy, Product Lifecycle Management

Technical Skills : Python, Java, C, C++, AWS, Docker, PyTorch, SQL, MongoDB, Javascript, HTML, CSS, PHP, Git

Soft Skills : Leadership, Cross-functional Team Collaboration, Problem Solving, Conflict Resolution, Adaptability

WORK EXPERIENCE

Technical Product Manager - Internship at Starchild Music LLC, San Francisco

Aug 2023 – Feb 2024

- Utilized a combination of technical expertise and strategic vision to actively engage in shaping the product strategy for this start-up, while working closely with the leadership team.
- Spearheaded the development of Starchild's product to dynamically augment music based on users' mood preferences through a singular control. Led the creation and implementation of the innovative CLARA pipeline in Python, using cutting-edge machine learning models.
- Initiated and delivered both the marketing website and the MVP platform, utilizing NextJS for the marketing site and a robust tech stack for the MVP platform, comprising ReactJS, NodeJS, and MongoDB, hosted on AWS for the MVP platform. This approach ensured a seamless user experience across the board.

Associate Product Manager - Full time at Telelogix IT Services, Abu Dhabi

Apr 2020 – May 2021

- Led cross-functional teams for iOS, Android, and web development, ensuring timely and effective deliverables by utilizing Kano and MoSCoW analysis for feature prioritization.
- Spearheaded comprehensive testing of platform functionalities and integrations on both client and admin sides, ensuring flawless operation and optimal user experience across all platforms.
- Conducted in-depth data analysis to generate comprehensive online sales reports, identify market trends, and refine marketing strategies to align with product goals.

IoT Solutions Analyst - Internship at Emircom, Abu Dhabi

May 2019 – Jun 2019

- Developed a comprehensive compatibility report on Smart meters, identifying the optimal meter for the IoT-based energy management product, SEnergy.
- Resolved technical challenges at customer sites, significantly enhancing product reliability and driving higher client satisfaction.

PROJECTS

AI-Powered Legal Assistant for Immigration Law

Jul 2024 – Present

- Conceptualized a cutting-edge product to provide accurate legal opinions on immigration law, from ideation to development, including market research to validate the value proposition and align with user needs.
- Implemented a Retrieval-Augmented Generator (RAG) architecture with the Llama LLM model via LangChain to deliver precise, contextually relevant responses to complex legal queries.
- The platform is hosted on AWS using EC2, with a user-friendly front-end interface built to streamline access and enhance user experience.

Automated Retail Checkout System Using Face Recognition

Aug 2022 – Dec 2022

- Developed a platform to reduce long queues, implementing face recognition using Python with DeepFace and FaceNet, and created a Java-based application for user profiles, purchase tracking, and payment processing.
