SUMMARY

Data Analyst with 1.5+ years of experience in data analytics, reporting automation, and business intelligence. Skilled in SQL, Python, and BI tools (Power BI, Tableau) to transform complex datasets into actionable insights. Strong background in predictive modeling, churn analysis, KPI dashboards, and ETL validation. Known for bridging business and technical teams to deliver data-driven recommendations that support growth and operational efficiency.

SKILLS

Programming & Tools: SQL, Python (Pandas, NumPy, Scikit-learn), R, Excel (VLOOKUP, INDEX/MATCH, Pivot Tables, SUMIFS, COUNTIFS)

Analytics & Statistics: KPI Analysis, Funnel Analysis, Regression, Forecasting, Clustering, A/B Testing, Churn Modeling

Data Visualization: Power BI, Tableau, Looker, Google Data Studio

Databases: MySQL, PostgreSQL, SQL Server

Other: ETL Testing, Data Governance, UAT, Requirement Gathering, Reporting Automation

EXPERIENCE

Data Analyst Intern

TechStart Analytics, New Jersey, USA | Jan 2024 – Apr 2024

- Analyzed e-commerce and marketing datasets to identify engagement trends and optimize KPIs such as deliverability, CTR, and churn.
- Built interactive Power BI dashboards and advanced Excel models to monitor campaign performance.
- Developed clustering models in Python to segment users, improving targeting and retention strategies.
- Automated SQL-based reporting workflows, reducing manual reporting time by 30%.
- Presented findings to stakeholders in clear, actionable business terms.

Data Analyst

IBM, Bangalore, India | Feb 2022 – Aug 2023

- Conducted analysis of large datasets to identify patterns in customer behavior, operational efficiency, and revenue trends.
- Designed self-serve dashboards (Power BI/Tableau) to track business KPIs and performance metrics.
- Created predictive models in Python for churn forecasting and engagement scoring.
- Collaborated with stakeholders to run A/B testing, validating feature performance and campaign impact.
- Wrote and optimized SQL queries to support ETL testing, troubleshoot data quality issues, and ensure reporting accuracy.
- Delivered presentations to business teams, highlighting actionable recommendations.

PROJECTS

E-Commerce Funnel Analysis (SQL + Tableau)

- Built SQL-driven funnel analysis (add-to-cart → checkout → purchase) and visualized results in Tableau.
- Identified a 30% checkout drop, leading to UX changes that increased conversion by 7%.

Customer Churn Prediction (Python + Power BI)

- Built logistic regression + clustering models to predict churn with 82% accuracy.
- Integrated results into a Power BI dashboard to track churn risk and reduce attrition by 10%.

EDUCATION

Master of Science in Computer Science

Rowan University, Glassboro, New Jersey
