Data Analyst

Results-driven Data Analyst with over 4 years of comprehensive experience in collecting, analyzing, and visualizing data to drive strategic business decisions. Proficient in SQL, Python. Skilled in using Power BI for creating interactive dashboards. Possess expertise in data analysis, data modeling, and delivering actionable insights to stakeholders. Adept at working independently in dynamic remote environments and collaborating with cross-functional teams to solve complex business problems.

Professional Experience

Data Analyst II

Rotomaker

07/2020 - 01/2022

- Utilized SQL for extracting, transforming, and validating large data sets from diverse relational databases, ensuring optimal data integrity and accuracy.
- Developed ELT/ETL pipelines using Infosphere Data Stage.
- Collected, cleaned, and analyzed large datasets from multiple sources to identify trends and patterns.
- Created power BI systematic models using Oracle and Teradata as backend databases.
- Developed weekly and monthly business performance reports using Power BI, providing actionable insights to enhance decision-making.
- Developed and optimized interactive dashboards using Power BI presenting insights into stakeholders and driving data-driven decisions.
- Created and optimized views, materialized views, and indexed tables to improve query performance.
- Managed schema changes, database migrations, and version control for SQL scripts.

Data Analyst

Rotomaker

03/2017 - 07/2020

- Wrote complex SQL queries using JOIN, UNION, GROUP BY, and subqueries to extract data from relational databases for reporting purposes.
- Conducted statistical analysis to identify correlations and forecast trends in business operations.
- Collaborated with cross-functional teams to Supported ad-hoc data requests and provided insights into strategic business improvements.
- Designed and developed dynamic Power BI dashboards to visualize supply chain KPIs, enabling real-time performance tracking and strategic decision-making.
- Collaborated with data architects and analysts to design scalable and normalized data models
- Utilized window functions (RANK(), ROW_NUMBER(), LEAD(), etc.) for advanced data analysis

Key Skills

- Data Analysis & data Modeling | SQL & Relational Databases
- Python for Data Manipulation | Data Visualization: Power BI
- ETL Processes & Data Pipeline Development(IBM Infosphere Data Stage)

Education

- Bachelor of Technology in Computer Engineering -- Jawaharlal Nehru Technological University, India | 2014
- Master of Technology in Computer Engineering -- Jawaharlal Nehru Technological University, India | 2017
